A. GENERAL

1.0 INTRODUCTION

Lake Macquarie City Council (Council) is located approximately 150 km north of Sydney. It is the largest and most populous city in the Hunter and the fourth largest city in NSW outside the Sydney region with a population over 217,000.

Lake Macquarie local government area (LGA) covers an area of 757 km² encircling one of the largest coastal saltwater lakes in the southern hemisphere. The lake has a surface area of 110 km2 and a shoreline of 195km. Lake Macquarie City is bordered by the Pacific Ocean to the east, and is encircled by the catchment of the Lake to the north and west. The City of Newcastle adjoins the boundary to the northeast and the Central Coast adjoins the City boundary at the southern end of the Lake.

Lake Macquarie has an enviable location with the City's proximity to beaches, bushland, lake and mountains. This presents an attractive living environment and attributes the City as one of the fastest growing areas in NSW. Lake Macquarie City is renowned for its open space areas and this document will provide guidance for the ongoing management, maintenance, use and development of these.

What is a plan of management?

A plan of management is developed to determine and guide the future management of a place – such as a park, sportsground or bushland reserve. They are developed in conjunction with the community, and act as an agreement between a Council and the community as to how a place is to be managed and its values protected. Current uses and activities are identified and future use and activities, including leases and licences, are approved by a plan of management (PoM).

Community land is land council owns and manages on behalf of, and for the benefit of the community. Community land is governed by the *Local Government Act 1993* and through this legislation is required to be placed in a PoM. Crown land and reserves that council has been appointed as Crown Land Manager are to managed as if they are community land, and are also required to be included in a PoM.

1.2

Why Council is preparing this plan of management

Plans of management are a statutory requirement under the Local Government Act 1993. Lake Macquarie City Council currently has a Plan of Management for Community Land that was adopted by Council in 2011. This PoM is amending this 2011 PoM to update changes over the past 10 years and to meet the legislative requirements of the new Crown Land Management Act 2016 that came into effect 1 July 2018. These changes include the requirement for Crown land that Council has been appointed as Crown Land Manager (CLM) to be included in the PoM and for this PoM to be authorised by the Department of Planning and Environment and the Minister where required. In addition, this new legislation requires the PoM to be assessed by a Native Title Manager to ensure compliance with the Native Title Act 1993.

1.3

Aims of the plan

The Plan aims to assist Council in meeting its broader strategic goals and vision as set out in Council's Community Strategic Plan, Our Future in Focus.

Specifically, the Plan aims to:

- Identify and protect the intrinsic values of community land (including Crown land)
- Develop clear and achievable management strategies and actions that reflect Council and community expectations within available resource constraints
- Meet legislative requirements for managing community land
- Clarify permissible and prohibited uses of community land.

This plan aims to document the key values for community land and guide the ongoing management, future use and development of these types of community land. This plan will address current recreational uses, environmental management, demands and trends, anticipated future uses of the area, commercial activities and major events, and respond to demographic changes.

Land covered by this plan

This plan of management applies to community land owned by Council, and Crown land that Council has been appointed as Crown Land Manager (CLM). For the purpose of this PoM community land will refer to both community land and CLM Crown land. This plan of management includes community land that has been categorised as four of the five available categories of land in the *Local Government Act 1993*. They are natural area, sportsground, park and general community use. The remaining category of area of cultural significance must be placed in a separate plan of management and is therefore not governed by this generic plan of management.

The maps in Appendix 13 identify the four categories of land (and five natural area sub categories) that apply to the community land governed by this PoM. In addition, the maps identify community land that is governed by specific plans of management and Crown land that devolves to Council to manage under Section 48 of the *Local Government Act 1993*. While these parcels of land are not governed by this PoM, they provide a visual representation of all public land held for community benefit that Council manages. The following is a full list of the specific PoMs that are identified in the mapping but are not governed by this PoM:

- Belmont Lagoon PoM
- Billy's Lookout PoM (to be finalised)
- Fencott Drive Wetland Reserve Plan of Management 2013
- Green Point Foreshore Reserve PoM
- Mawson's Lookout PoM
- Morisset Showground PoM
- North Wallarah Peninsula Reserve and Habitat Corridor PoM
- Rathmines Park PoM
- Ryhope Environmental Conservation Area PoM 2016
- Speers Point Park and Surrounds PoM
- Swansea Heads PoM (to be finalised), previously Coastline PoM IV
- Trinity Point PoM
- Warners Bay Foreshore PoM
- Wyee Point PoM

Plans of management to be repealed on adoption of this Plan of Management for Community Land, due to either being incorporated within this plan or including Crown land that devolves to Council include:

• Coastline Plans of Management I-III, V-VII and IX.

2.0 LEGISLATION, POLICIES AND PROCEDURES

When Councils use and manage public land, they are required to comply with a number of legislative, policy, and procedural requirements.

2.1

Local Government Act 1993

The Local Government Act 1993 is the primary legislation governing the management of community land. Community land is defined by the Act as land set aside for community benefit. The Act requires all community land to be included in a plan of management. Sections 35-47 of the Act provide guidance on the use and management of community land and the preparation of a plan of management. The Act along with the guidelines in the Local Government (General) Regulation 2005 sets out what is to be included in a plan of management.

The Act states a plan of management must identify:

- The category of land
- The objectives and the performance target of the plan with respect to the land
- The means by which these strategies will be achieved
- The methods that will be used to assess whether the strategies are being achieved.

This PoM will address all of the above requirements. PoMs are public documents and can be reviewed and amended, however they usually remain valid for a minimum of five years from the date of adoption.

Categorisation of land

The Act requires that all community land be categorised in one of five nominated categories of natural area, sportsground, park, general community use or area of cultural significance. The category of natural area must be further categorised into sub-categories including bushland, escarpment, foreshore, watercourse and wetlands. The Act then sets out core objectives for each of these categories and subcategories, as a broad guide to management. This plan of management includes the categories of natural area, sportsground, park and general community use. The core objectives and regulations that govern these categories can be found in Sections B, C, D and E.

An individual land parcel may comprise two or more categories, e.g., natural area and sportsground, and these need to be clearly delineated via a map. Appendix 13 includes maps of all community land and the categories assigned to each parcel of land.

2.2

Crown Land Management Act 2016

Crown land is public land owned by the state government and set aside for the benefit of the community. Each Crown land parcel is gazetted to be dedicated or reserved with at least one purpose. There are a large number of reserve purposes, with the most common purposes in Lake Macquarie City being Public Recreation; Public Park; Preservation of Native Flora and Fauna; Access; Community Purposes; and Showground. Crown land can be managed by the state directly or gazetted to appoint another organisation or body, including Councils, to manage the land. Where Crown land is not managed by either of these methods, it becomes devolved to Council to manage under Section 48 of the Local Government Act 1993.

2.2.1 Requirements under the *Crown Land Management Act 2016*

The objects of the Crown Land Management Act 2016 (CLM Act) are:

- To provide for the ownership, use and management of the Crown land of New South Wales
- To provide clarity concerning the law applicable to Crown land
- To require environmental, social, cultural heritage and economic considerations to be taken into account in decisionmaking about Crown land
- To provide for the consistent, efficient, fair and transparent management of Crown land for the benefit of the people of New South Wales
- To facilitate the use of Crown land by the Aboriginal people of New South Wales because of the spiritual, social, cultural, and economic importance of land to Aboriginal people and, where appropriate, to enable the co-management of dedicated or reserved Crown land
- To provide for the management of Crown land having regard to the principles of Crown land management.

The CLM Act sets out the following principles for the management of Crown land:

- that environmental protection principles be observed in relation to the management and administration of Crown land
- that the natural resources of Crown land (including water, soil, flora, fauna and scenic quality) be conserved wherever possible
- that public use and enjoyment of appropriate Crown land be encouraged
- that, where appropriate, multiple use of Crown land be encouraged
- that, where appropriate, Crown land should be used and managed in such a way that both the land and its resources are sustained in perpetuity
- that Crown land be occupied, used, sold, leased, licensed or otherwise dealt with in the best interests of the State consistent with the above principles.

In developing this plan of management for the inclusion of CLM Crown land, the principles of Crown land management and the reserve purpose have been carefully considered and reflected in the aims, objectives and management actions that are identified for each category of land.

2.2.2 Authorised uses of Crown Reserves

Under Division 2.4 of the CLM Act, dedicated or reserved Crown land may only be used for the following purposes:

- \cdot the purposes for which it is dedicated or reserved,
- any purpose incidental or ancillary to a purpose for which it is to be dedicated or reserved,
- any other purposes authorised by or under this Act or another Act.

In relation to leases, licences and other permits Section 45-47 of the *Local Government Act 1993* will apply with the exception of Division 2.5 of the CLM Act which provides special powers to the Minister over dedicated or reserved Crown land.

2.3

Native Title Act 1993

The Native Title Act 1993 is a Commonwealth act passed by Parliament in 1993. Native title is the recognition that Aboriginal and Torres Strait Islanders have rights and interests to land and waters according to their traditional laws and customs. In NSW these rights and interests include Crown land and reserves that are owned by the NSW State government. Lake Macquarie Council

manages and maintains a number of Crown land reserves across the local government area on behalf of the state government. Where Council has been appointed as Crown Land Manager of these Crown reserves, they are required to be included in a plan of management. All Crown land that Council manages, whether appointed as CLM or devolving to Council is required to adhere to both CLM Act and the Native Title Act 1993 for any future use, development and dealings on the reserve.

On Crown land native title must be considered unless:

- Native title has been extinguished, or
- Native title has been surrendered, or
- Determined by a court to no longer exist.

When proposing any 'acts' that may affect native title on Crown land or reserves, the act must be authorised through Part 2 Division 3 of the Native Title Act. Some examples of acts include:

- The construction of new buildings or facilities such as toilets, pathways, shelters, barbeques, tennis courts, grandstands
- The construction of extensions to existing buildings
- The construction of new roads or tracks
- Installation of infrastructure such as powerlines, sewerage pipes
- The issue of leases and licences

12

• The undertaking of major earthworks

- Revegetation and environmental improvement works, including landcare works and the removal of weeds
- The provision of a plan of management.

As this plan of management includes a significant number of CLM Crown land reserves, native title advice must be sought before this PoM can be adopted. Native title has not been extinguished, surrendered or determined by a court to no longer exist on any of the included Crown reserves in this PoM and therefore any acts on the reserve must be authorised by the Native Title Act 1993.

No future acts will be undertaken on Crown reserves 1002913; 1012249; 1013948; 1014048; 1037808; and Crown reserve 1125972 (for the purposes of access and urban services only); as these have been gazetted after 23 December 1996, unless:

- the lands become excluded land for the purposes of the Crown Land Management Act 2016. or
- The act is a tenure which satisfies the requirements of Section 24HA (Management of Water and Airspace) if the Native Title Act 1993, or
- the act is, or permits, a public work which satisfies the requirements of Section 24KA of the Native Title Act 1993, or
- the act is a low impact act and satisfies the requirements of Section 24LA of the Native Title Act 1993.

2.4

Legislation and statutory controls

This PoM does not over-rule existing legislation that also applies to the management of community land. Other legislation and policies to be considered in the management process include, but are not limited to, the:

- Environmental Planning & Assessment Act 1979, as amended
- Coastal Management Act 2015
- Environmental Protection and **Biodiversity Conservation Act 1999**
- Contaminated Land Management Act 1997
- Public Works Act 1912, as amended
- Biodiversity Conservation Act 2018
- Native Vegetation Act 2003
- Water Management Act 2000
- Protection of the Environment **Operations Act 1997**
- Companion Animals Act 1998
- Rural Fires Act 1997
- Rural Fires and Environmental Assessment Legislation Amendment Act 2002
- Biosecurity Act 2015
- Pesticides Act 1999
- National Parks and Wildlife Act 1974
- Heritage Act 1977

- State Environmental Planning Policies, and
- Lake Macquarie Local Environmental Plan 2014, as amended
- Lake Macquarie development control plans, as amended
- Guidelines supporting development control plans
- Council plans, strategies, policies and procedures, generally, as amended.

Biodiversity Conservation Act 2018

Council has legislative responsibility under this Act to appropriately manage Threatened Species Populations and Vulnerable or Endangered Ecological Communities and their habitats where ever they occur despite the categorisation of land.

Where identified as responsible for the implementation of measures in a Recovery Plan or Threat Abatement Plan, Council is bound by the *Threatened Species Conservation Act 1995* to take any appropriate action available to implement those measures and must not make decisions that are inconsistent with the provisions of a Threat Abatement Plan or Recovery Plan.

National Parks and Wildlife Act 1974

Council has legislative responsibility under this Act to appropriately conserve and manage all Aboriginal sites located on land owned or managed by Council, regardless of the categorisation of land.

2.4.1 Local Environmental Plan 2014

The Lake Macquarie Local Environmental Plan 2014, as amended, (LM LEP) aims to encourage the proper management, development and conservation of natural and man-made resources, to promote the social and economic welfare of the community and to provide a better environment.

Activities that are considered permissible under the LM LEP, as amended, may be permissible on community land depending upon the categorisation of the land. Land categorised as natural area has more restrictive objectives for management than land categorised as park, sportsground or general community use. The LM LEP is amended on a regular basis. Any amendment to the LM LEP shall take precedence over the provisions of this PoM.

2.4.2 Council plans, strategies, policies and procedures

This PoM is to be used in alignment with Council's strategic direction and the appropriate Council plans, policies and procedures that govern the use and management of community land and any facilities located on such land.

The Lake Macquarie Community Strategic Plan 2017-2027 and Lake Macquarie Local Strategic Planning Statement 2020 describe how we intend to achieve our City's vision and values by guiding the growth of the City over the next 20 years.

To achieve this, the LSPS identifies:

- The community's vision for future land use in the City
- Seven planning priorities that articulate the special characteristics of the City
- Strategies that summarise how we will deliver on the planning priorities
- Key change and growth areas

Documents that may need to be considered in the planning and management process include, but are not limited to the following. Additional Council plans, strategies and policies adopted after the date of this plan, that have relevance to the planning, use and management of community land, will apply as though they were in force at the date of adoption of this PoM.

Strategy

- Parks and Play Strategy 2021
- Sports Strategy 2021
- Lake Activation Strategy 2021
- Active Recreation Strategy 2024 (currently under development)
- Aquatic Facilities Strategy 2023
- Urban Greening Strategy
- Event and Festival Strategy and Action Plan 2019-2024
- Lake Macquarie Community Facilities Strategy
- Replace with Walking, Cycling and Better Streets Strategy
- Lake Macquarie Crime Prevention Strategy 2015-2018
- Lake Macquarie Youth Strategy 2014-2019
- Aboriginal Cultural Management Strategy
- Environmental Sustainability Strategy and Action Plan 2020-2027
- Public Amenities Strategy 2021

14

• Dogs in Open Space Strategy 2023

Plans

- Ageing Population Plan 2018-2022
- Lake Macquarie Development Control Plan
- Lake Macquarie Development Contribution Plans (various)
- Lake Macquarie Coastal Management Program 2023
- Lake Macquarie Disability Inclusion Action Plan 2017-2021
- Aboriginal Community Plan 2017-2027
- Arts, Heritage and Cultural Plan

Policies

- Biodiversity Planning Policy and Guidelines for LEP Rezoning Proposals
- Community Gardens Policy
- $\cdot\,$ Community Leasing and Licensing Policy
- Dinghy Management Policy
- Dogs in Public Open Space Policy
- Donation of Park Furniture Policy
- Encroachment on Council-owned Land Policy
- Improvements and Maintenance of Watercourses and Drainage Channels Policy

- Lake Macquarie Sea Level Rise Preparedness and Adaption Policy
- Managing Contaminated or Potentially Contaminated Land in Lake Macquarie Policy
- Management of Trees on Public Roads and Reserves Policy
- Policy for Assessing Public Requests to Reclassify Community Land to Operational Land
- Protection of Watercourses and Drainage Channels Policy
- Public Lighting Policy
- Sports Facility Advertising Policy
- Vertebrate Pest Policy
- Asset Management Policy
- Urban and Public Art Policy
- Arts, Heritage and Cultural Policy
- Sustainability Policy
- Noise Control Policy

Aboriginal cultural heritage

All Aboriginal sites in NSW are protected under the *National Parks and Wildlife Act 1974*, and it is an offence to damage or destroy them (this includes collecting artefacts) without prior permission of the NSW Government. Some, but not all, Aboriginal sites are recorded in the Aboriginal Heritage Information Management System (AHIMS) managed by Heritage NSW. Activities which have the potential to damage or destroy both recorded and unrecorded sites include:

- The construction of new buildings or facilities such as toilets, pathways, shelters, barbeques, tennis courts, grandstands
- The construction of extensions to existing buildings
- The construction of new roads or tracks
- Installation of infrastructure such as powerlines, sewerage pipes
- The undertaking of major earthworks
- Revegetation and environmental improvement works, including landcare works and the removal of weeds
- Maintenance works which involve vegetation removal or soil disturbance.

A search of AHIMS should be undertaken to identify any recorded Aboriginal sites and an assessment made of the potential for impact on unrecorded Aboriginal sites before these activities are undertaken.

A review of sites within the Aboriginal Cultural Management Strategy that are located on community or Crown land will be undertaken as an action of this PoM to identify where specific PoMs may be required.

2.6

Non-indigenous cultural heritage

The *Heritage Act* 1977 protects relics which are defined as:

"any deposit, artefact, object or material evidence that relates to the settlement of the area that comprises NSW, not being Aboriginal settlement; and is of State or local heritage significance".

Relics are archaeological items of local or state significance which may relate to past domestic, industrial or agricultural activities in NSW, and can include bottles, remnants of clothing, pottery, building materials and general refuse. If a relic is likely to be disturbed, a heritage approval is usually required from the NSW Heritage Council. Also, when a person discovers a relic they must notify the NSW Heritage Council of its location.

Some historic heritage items are not considered to be 'relics'; but are instead referred to as works, buildings, structures or movable objects. Examples of these items that Council staff may encounter include culverts, historic road formations, historic pavements, buried roads, retaining walls, tramlines, cisterns, fences, sheds, buildings and conduits. Although an approval under the *Heritage Act 1977* (NSW) may not be required to disturb these items, that assessment needs to be undertaken by a Council officer or consultant qualified in cultural heritage management.

Heritage items that are of particular importance to the people of NSW are listed on the State Heritage Register. A number of parcels of community land and crown reserves are listed or part listed as State heritage items.

Heritage items that are important for the community in a local government area are listed on the council's local environmental plan. Schedule 5 of the LM LEP lists sites in the City containing items of non-indigenous heritage. Whilst most of the entries relate to privately owned items, a number of parcels of community land, and Crown reserves are listed as local heritage items. A review of state and locally listed heritage items on community or Crown land will be undertaken as an action of this PoM to identify where specific PoMs may be required.

Proposed works in any state or locally listed heritage sites will require development consent and may require a heritage management document to be prepared that assesses the extent to which carrying out of the proposed development would affect the heritage significance of the heritage item or heritage conservation area concerned. In some cases, after considering the heritage significance of a heritage item and the extent of change proposed to it, the submission of a heritage conservation management plan before granting consent may be required (see LEP 5.10 Heritage Conservation (2), (3), (4), (5), (6) and (7).

Appendix 9 lists all state and locally listed heritage items; reserves within heritage conservation areas; and archaeological sites.

2.7

Further acquisition of Community Land parcels

Council will continue to add land to its community land stock. Those parcels may come as developers dedicating land; or purchased in accordance with the LM LEP; or by a specific Council resolution to acquire the land. Before Council acquires land, or within three months after it acquires land, a Council may resolve that the land be classified as community land or operational land. At the end of the three-month period, if the land is not classified then it is taken to be classified as community land.

Council is required to categorise community land parcels, and to conduct a public hearing to inform the public of the land categories. This PoM proposes that a public hearing be held at least twice during each term of Council to consider the proposed categorisation of community land parcels acquired by Council during each 4-year term of Council and to review the PoM accordingly.

Until new land is categorised, the use of the land must not be used for any purpose other than that for which it was being used immediately before it was acquired. Permitted works to protect the asset and maintain the land would include: weed removal, maintenance of an APZ, or works to protect assets or ensure public safety. Once such parcels have been categorised, they will be subject to the provisions of this plan.

2.8

Reclassification

From a review of existing public land resources, certain parcels of community land (not including Crown land) may be identified as surplus to the City's existing and future needs. Those parcels of land may be suitable for reclassification and subsequent disposal.

The Local Government Act 1993 allows for the reclassification of land that has been dedicated under Section 94 (now 7.11) of the Environmental Planning and Assessment Act 1979, where the Council is satisfied that the land is unsuitable for the provision, extension or augmentation of public amenities and public services by reason of its size, shape, topography, location or difficulty in providing public access. A Council resolution must specify the grounds on which the land is unsuitable.

Land that cannot be reclassified in this way, but is still considered surplus to the City's needs, can be reclassified through the making of an LEP to reclassify the land.

Council would need to:

- Justify that the land is surplus to need, and
- Reclassify the land to operational land (which involves a public hearing), and
- Rezone the land commensurate with its future identified use, and
- Dispose of the land through a transparent process, and
- Account for the income derived from its disposal.

Any proposal to reclassify community land to operational land shall be initiated by resolution of Council, and include a public notice including the terms of the proposed resolution, and must specify a period of 28 days during which submissions may be made to Council. Council can reclassify operational land to community land, by a resolution of Council.

2.9

Review of this plan

This plan provides the overarching guidelines for use and management of the community land in the City of Lake Macquarie. While these guidelines may be suitable at present, the plan should be reviewed within five years of the adoption by Council. It is anticipated that a number of amendments will be required during this period as Council acquires new parcels of community land and the requirement for these to be included in a PoM and categorised.

3.0 **BASIS FOR MANAGEMENT**

This plan of management must comply with the provisions of the *Local Government Act 1993* and the *Crown Land Management Act 2016*, as well as other legislation and policy described in Sections 2.3 and 2.4.

3.1

Community consultation

The draft of this PoM will be advertised and publicly exhibited for the statutory periods required under the *Local Government Act* 1993.

During the public exhibition period, a public hearing will be held where categorisation is proposed to be changed or being undertaken for the first time, e.g., newly acquired parcels of land.

Submissions will be accepted until the advertised date. Appropriate amendments arising from the submissions will be incorporated into the proposed final plan. The submissions and proposed final plan will be appended to a report to Council for consideration and adoption.

3.2

Leases and licences

In accordance with the *Local Government Act* 1993 Sections 46 and 47, a plan of management must expressly authorise the granting of a lease, licence or other 'estate' over community land. Such agreements must be consistent with the values identified by the PoM, the core objectives of the category identified for the land in question and for Crown land the purpose of the reservation or dedication.

All leases, licences and 'other estates' on Crown land will be required to seek native title advice to ensure their validity in relation to the *Native Title Act 1993*.

The *Local Government Act 1993* provides for a number of terms for leases and licences and the approval process for each, they are:

- Short term licences (under 12 months)
- Leases and Licence one year up to five years
- Leases and Licences five years up to 21 years
- Leases and Licences 21 years up to 30 years.

Further details on these can be found in Sections 46 and 47 of the Act. Council provides leases and licences in accordance with the Community Leasing and Licensing Policy, the LG Act and the CLM Act.

Leases and licences for natural areas

For leases and licences on natural areas, there are specific requirements for the granting of these in relation to the erection or use of a building or structure, as prescribed in Section 47B of the *Local Government Act 1993*. These are limited to:

- Walkways
- Pathways
- Bridges
- Causeways
- Observation platforms
- Signs
- Information kiosks
- Refreshment kiosks (but not restaurants)
- Work sheds or storage sheds in connection with the maintenance of the land
- Toilets and rest rooms.

The only exceptions to these are for filming purposes where all buildings and structures are to be of a temporary nature, removed at the conclusion of the agreement and the land reinstated to its previous condition.

The status of existing leases and licences can be found in Appendix 3.

Authorisation of future leases and licences

The approval of leases and licences will be subject to a transparent process. Before approving leases or licences Council will give consideration of, and regard to:

- The provisions of the Lake Macquarie Local Environmental Plan and other legislative requirements
- The core objectives of the subject part(s) of the specific parcel of land, in accordance with the relevant community land category
- The reservation/dedication purpose of CLM Crown land community land parcels;
- The activities and developments identified as permissible within each of the community land categories – as listed in Appendix 6 and 7
- $\cdot\,$ Council's policies for leasing and licensing
- Any likely impacts on the access, uses and experiences of other users with a

preference for leases/licences permitting a broad range of activities, and encouraging the multi-use of community assets

- Any possible impacts on surrounding neighbours
- The reversibility of the proposed uses or developments
- Resource demands to administer and monitor the lease/licence
- Any commercial implications for Council
- The future use of the land.

In authorising lease and licences, this PoM expressly authorises existing leases and licences for the purposes of use at the commencement date of this PoM (see Appendix 3), and the granting of future leases, licence or other estate for the activities listed in Appendix 4. Activities not listed will be considered on their individual merit, with consideration to the above points.

In addition to Council's ability to lease or licence CLM Crown land, as per Division 2.5 of the CLM Act, the Minister has special powers to approving leases and licences on all Crown land. In respect of devolved to Council land, Council is not authorised to grant a lease or licence. The NSW Department of Planning and Environment will consider applications for lease or licence proposals on devolved to council Crown land directly.

3.3

Development

Council's ongoing commitment to the development of these areas will depend upon its financial resources. The implementation of actions identified in this PoM will proceed as determined through Council's 10 Year Community Strategic Plan, Four Year Delivery Program, and Annual Operational Plan and Budget.

Council funds new works on community land from a number of sources, including rate revenue, loans, federal and state government grants, and for some locations, from developer contributions. Commercial sponsorship has also contributed to the funding of some projects. Council will continue to seek opportunities to obtain funds from all sources to progress the development of new facilities and to upgrade existing facilities where appropriate.

The development of community land can include the improvement of the land; drainage, irrigation and plantings; or the improvement of existing facilities or provision of new facilities located on the land. These improvements can be undertaken by Council or on occasion by an external group, e.g. a sporting body for a sportsground. Dependant on the scope of works, the project will require approval through either a development consent or a State Environmental Planning Policy (SEPP). All projects will be required to meet Council's Work, Health and Safety Policy requirements. Any proposed works will need to be submitted in writing and authorised through the appropriate Council section depending on the category of land applied. Proposed projects must be in line with the relevant Council strategic plan.

All proposed works should identify whether the land is identified in the LEP as a state or local heritage listed item or is identified as a having Aboriginal cultural significance. Please refer to Appendix 9 for State and Local Listed items within the LEP and Appendix 10 for the Aboriginal Heritage Assessment Process checklist.

Facilities that may be approved on community land according to their categorisation can be found in Appendix 6.

3.4

Maintenance

The extent and frequency of the maintenance of open space across the LGA is governed by Council's funding constraints. Service levels are reviewed each year in the light of the annual budget allocation. Year to year variations in weather patterns can give the impression that changes in the service levels have occurred. For example, a hot moist summer will result in more rapid grass growth between scheduled maintenance events. Additional sites brought into service during a funding year may also have an impact of diluting service delivery levels.

Maintenance programs based on principles of environmental sustainability, aim to enhance and improve:

- waterway and lake quality
- the condition of native vegetation
- native species habitat
- adaptation to sea level rise.

Riparian zones along watercourses and the lake foreshore are important, as a natural stormwater filtration medium and foreshore protection. In coastal areas, dunes will be rehabilitated to establish resilient native coastal ecosystems. Such areas will be considered for replanting with appropriate species of native vegetation derived from a Lake Macquarie community that:

- exists on the site, or
- was likely to be present prior to European settlement, or
- is suited to the physical conditions that exist at the site and will persist into the future.

Ongoing maintenance of native vegetation where it occurs in community land will include but not be limited to, access management, fire management, pest control, weed removal and mulching as appropriate.

Maintenance schedules are also developed for the built assets, which include inspection, regular and periodic programs, reviewed each year in the light of the annual budget allocation.

All maintenance works should identify whether the land is identified in the LEP as a state or local heritage listed item or is identified as a having Aboriginal cultural significance prior to being undertaken. Please refer to Appendix 9 for State and Local listed items within the LEP and Appendix 10 for the Aboriginal heritage assessment process checklist.

3.5

Permitted and prohibited activities

This PoM identifies activities that are permitted without approval, activities that may be permitted with approval and activities that are prohibited on all of the categories of community land.

Individuals and organisations wishing to undertake activities that require approval must obtain written Council approval before commencing that activity. Some approvals/refusals will be straightforward. Other large-scale activities such as exhibitions, concerts, circuses, markets, car boot sales, and so on may require submission of an extensive event management plan. The appropriate approval pathway will be determined once a written application has been received and the assessment process has commenced.

Permitted and prohibited activities on community land according to their categorisation can be found in Appendix 7. This table is not an exhaustive list and written requests for facilities or activities not covered in these tables will be assessed on a case by case basis with the appropriate approval pathway identified at that time.

3.6

Council committees

Council operating committees that manage a number of community land parcels operate under Section 355 and 377 of the *Local Government Act 1993*. They assist in the care, control and management of some of Council sportsgrounds and community facilities on community land, in accordance with the Lake Mac Facility Manager Operating Manual.

3.7

Fees and charges

Council sets all fees and charges for the seasonal and casual use and hire of Council facilities on community land. These fees and charges are reviewed annually and incorporated and exhibited in Council's Fees and Charges Schedule.

Fees and charges are set to ensure fairness and equity in allocation, maximise opportunities for use and contribute to cost recovery. The fees and charges are applied by Council to all users of the facilities, including Council facilities that are managed by operating committees.

In the instance of a group or organisation being approved for an exclusive lease of a Council facility, then these fees will be set in accordance with Council's Community Leasing and Licensing Policy.

3.8

Grants

Clubs, associations, or other groups wishing to apply for a grant from an external source for the improvement of community land or existing or new infrastructure; or for funding a special event, will be required to obtain written approval from Council (letter of in-principle support) prior to lodging an application. Council will assess these applications and determine if support and approval will be provided, as owner of the land, to the applying organisation and the grant provider.

3.9

Volunteers

Council has many voluntary groups that take on the care of particular parks or reserves, sportsgrounds, and community buildings in their local neighbourhoods. These include communityoperating committees, progress associations, Sustainable Neighbourhood Groups, service clubs, sporting clubs, community garden groups, Landcare and Dunecare groups.

Council provides advice through Council's facility management officers to community operating committees working on approved projects on community land, and the Lake Macquarie Landcare and Sustainable Living Centre assists those groups working on approved projects on specific natural area sites.

Many community groups have an interest in community land, set aside for use by the entire community. Where possible, Council encourages multiple use of community land as opposed to single use facilities. Groups working on community land are encouraged to work collaboratively in the management of any community asset.

3.10

Events and group activities

Public or private events may be approved on community land if they are a permitted activity of the category of land and obtain the required licence approvals from Council as the authorising body. Council will consider all applications on a case by case basis, dependent upon the type of event, compliance with licence conditions, level of impact, proposed location, and impact on public safety and amenity.

Some events may require a development application and/or will require approval from other public stakeholders such as NSW Police, NSW Fire Brigade and NSW Health.

Where there is an operating committee in place to manage Council land, events including carnivals, music concerts, trade shows and markets fall outside the scope and responsibility of these committees and therefore can only be approved by Council.

3.11

Alcohol prohibited areas and sale of alcohol

Council has a number of areas that are alcohol free zones (AFZ) and alcohol prohibited areas (APA). AFZ can be declared on public roads, car parks, and adjoining footpaths and nature strips, while APA can be declared on parks and reserves. AFZ can be declared for a period of up to four years, while APA can be time limited.

Both AFZ and APA can only be established in locations where anti-social behaviour or crime can be linked to the consumption of alcohol. The majority of APA are time restricted from 8pm – 8am, however there are a number of locations that are prohibited 24 hours a day. Council's website provides a comprehensive list of all locations where AFZ and APA have been declared.

There are instances where an AFZ and APA can be temporarily lifted, such as a special event, but these require either Council approval (AFZ), or Council delegated authority approval (APA) and public notification.

The sale and consumption of alcohol on any community land requires for the licenced organisation to apply for either a temporary (three functions or less a year), or a permanent functions licence through Liquor and Gaming NSW. This application is required to be lodged at a Licencing Registry Court at least 28 days (temporary) or six weeks (permanent) prior to the first function. A copy must then be provided to the Commander of the nearest police station within three days of lodgement. Requirements of training in the responsible service of alcohol (RSA) must also be completed, and an RSA certificate held for all members that will be involved in the sale, supply and service of alcohol during the approved functions.

3.12

Dogs

Council has an adopted Dogs in Open Space Strategy and Dogs in Open Space Policy that provides a framework and guidance for the managing of and providing for dogs on community land. Dogs are permitted to be walked on leash unless they are within one of Council's designated off leash areas. Locations of Council's off leash areas can be found on Council's website. This plan of management permits new off leash areas to be permitted on park and general community use categories of community land only. Council acknowledges the importance of dogs as companion animals and therefore ensures compliance with the *Companion Animals Act* 1998. The Act also requires that any dogs off leash must be able to be controlled by a responsible carer. This is for the safety of the dog, other dogs, and surrounding people. In addition, the Act requires any dogs either on leash or off leash are prohibited from the following areas:

- A public place that is within 10m of any playing apparatus that is used by children
- A public place within 10m or an apparatus used for food preparation or consumption by humans (unless in a thoroughfare, e.g., pathway, footpath or road)
- A public place for public recreation or playing organised games, that has been ordered that dogs are prohibited and notices are placed on site advising of this.

Dogs are permitted to be walked on leash in all Council open spaces that have not been designated as a prohibited area, and aren't being used for an organised activity that is not complementary to dogs, e.g. playing organised games. It is the responsibility of the carer to ensure all excrements from their dog/s is removed from the area. Any responsible owner found not complying with Council requirements for dogs, can be fined by Council rangers. Organised activities for dogs such as obedience/ training classes and agility competitions must seek Council approval through the appropriate application form. A licence will be provided for approved events that must be available on request during the event.

3.13

Parking

The requirements for parking near or on community land can vary dependant on the level of use, the connections surrounding the site (shared pathways, footpaths, public transport), and the location (inner suburb or a more isolated site). Parking can include on street parking and off-street parking in designated car parks.

Historically, the development of many sites hasn't incorporated designated car parks, and only when the surrounding suburb evolves does the need for additional parking arise. Peak usage periods that can occur at specific times of the day can require the need for additional parking requirements. Community land is a valuable asset, and the use of this for designated parking should be carefully assessed.

Alternatively, the use of community land for temporary parking will be considered if the

requirement arises from an event that is complementary to the category of community land. For example, if there is a community event on a park or other public land that requires part of the park or nearby park for temporary parking then this may be approved. However, if a request for temporary parking on community land due to a commercial use on private land then this will not be approved.

3.14

Temporary storage

Sporting groups or community organisations may obtain Council approval to locate a temporary structure on community land they actively use for a short-term period. The period will be determined in the consent, and the purpose for storage of sporting or maintenance equipment will only be permitted on the assumption that an approved permanent structure will be forthcoming and once completed the temporary storage will be removed. The temporary storage structure must be painted in a colour to blend in either with the reserve, or an adjacent amenity building.

Camping

Camping on community land is not generally encouraged. The only exception to this is if it is associated with an approved event on Council owned or managed public land and a strong case can be made on the need for camping. All requests for camping will be assessed on individual merit and include an impact assessment.

3.16

Smoking

In accordance with the NSW Smoke-Free Environment Act 2000 and Smoke-Free Environment Regulation 2016 smoking is banned in all enclosed public places and certain outdoor public areas. In relation to community land included in this PoM, smoking is banned in the flowing outdoor public places:

- Within 10m of children's play equipment in outdoor public places
- Public swimming pools
- Spectator areas at sportsgrounds or other recreational areas used for organised sporting events.

3.17

Signage

Signage in this section only applies to signage erected on community land included within this PoM. Permissible signage includes those erected by Council to provide information, e.g., naming and directional signage and regulatory signage. These signs are erected according to Section 632 of the LG Act. All other signage requires Council approval.

The erection of outdoor advertising signage is regulated by Council's Development Control Plan (DCP). Approval of outdoor signage for both permanent and temporary signage on community land will only be granted if the controls in this DCP are met.

3.18

Temporary access over community land

In specific circumstances Council will permit access over community land to allow residents or contractors to gain temporary entry to a residential or commercial property where access cannot be gained through other entry points, eg from front street access. The purpose of this access can include the installation of swimming pools, construction of extensions, sheds, retaining walls, fences or other developments.

This access is strictly for a limited period of time dependent upon the works being undertaken. An application form and applicable insurances are to be submitted for assessment. If permissible, relevant fees/charges and bonds are required before final approval will be given. Depending upon the circumstances, such access may be subject to strict conditions.

Permanent access over community land for private benefit, i.e., rear or side vehicle access to private property will not be permitted.

Access for utility works, including Ausgrid and Hunter Water, will also require an application to be completed for information purposes and insurances provided.

3.19

Wet weather

During periods of wet weather, the use of community land may be restricted for the safety of users and the/or the protection of the land from damage. Rain proceeding the days before the event and/or on the day of the event can all potentially restrict or close the use of community land. For community land that is directly managed by Council such as parks and natural areas, Council will determine if the proposed event can proceed in periods of wet weather. It is the user's responsibility to seek clarification from Council if the land will still be available for use during inclement weather. Councils decision in relation to wet weather will be final.

In some instances, authorisation to determine wet weather closures on community land is undertaken by Council committees or lessees. In these instances, these authorised groups are able to make decisions concerning wet weather closures and are responsible for informing the relevant users of this decision. Where this authorisation has not been provided to a committee or lessee group, Council will determine all wet weather closures.

3.20

Naming of community land after people

Requests are received on occasion by the community to name or rename a parcel of community land after a person. In line with the Geographical Names Board's 'Placename' and 'Commemorative Naming' requirements, the naming of features or places such as sportsgrounds, parks or bushland reserves will normally only be considered posthumously. The person put forward will have contributed outstanding benefit to the local community over their lifetime. Normally only the surname of the person will be considered for naming.

Where a name already exists for an area, then Council will not normally consider renaming. Where the name is of Aboriginal origin, or of historical importance, then Council would not consider renaming.

Naming a park, sportsground or bushland reserve after a living person will not be considered by Council. Naming a facility within an area, such as a building, may be considered only in exceptional circumstances where there is significant support from the surrounding community and a direct relationship and history between the person and the facility can be demonstrated.

The naming of any sportsground, park or bushland reserve as described above will require a report to Council for consideration and a public exhibition period. Submissions will then need to be assessed prior to a report going back to Council for consideration.

4.0 MANAGEMENT FRAMEWORK FOR COMMUNITY LAND

The management framework presents a range of management considerations and related actions/means of assessment, that will be pursued over the next five-10 years.

A management action table is included for each category of land and includes the following items:

Topic – the broad area or aspect of community land management around which broad strategies and actions have been grouped

Performance targets (strategies) – the means by which Council proposes to achieve the Plans key management objectives.

Means of achievement – actions intended to achieve the performance target or strategies. The management actions described can include both specific on-ground or tangible actions as well as directions more of a policy, guideline or procedural nature.

Means of assessment – outlines the means by which Council will evaluate or gauge the effectiveness of the actions in achieving their performance targets.

Priority – Provides an indication of both the relative importance and preferred timing of each action as follows:

High – Essential to the achievement of the plan's management objectives, warranting funding consideration until achieved. Ideally this action will be achieved in one to three years of the plan's adoption.

Medium – Desirable to enhance the achievement of the plan's management objectives and should be undertaken within three to five years (and ideally implemented within the life of this plan)

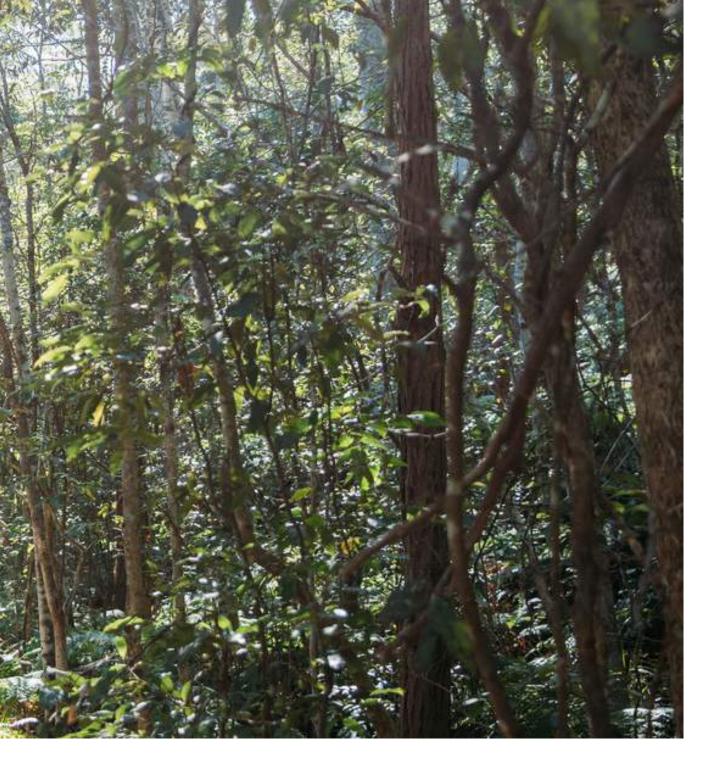

Low – These actions are useful for the overall management of the plan and should commence within five to 10 years although completion may take longer than this timeframe.

Ongoing – The action in question will be carried out on a regular basis, or as required, for the life of this plan.

5.0 MANAGEMENT FRAMEWORK – PLAN ADMINISTRATION AND MANAGEMENT

ΤΟΡΙϹ	OBJECTIVES / PERFORMANCE TARGETS		S OF ACHIEVEMENT	MANNER OF ASSESSMENT	PRIORITY
PLAN ADMINISTRATION AND REVIEW	Review PoM to ensure it is current	AM.1	This plan is reviewed every 5 years to ensure that it continues to satisfy legislative, administrative, environmental, and community needs.	PoM reviewed, exhibited, public hearing held, PoM revised as necessary, and adopted by Council.	Ongoing
	Satisfy Local Government Act regarding areas of Cultural Significance.	AM.2	Progressively identify community land parcels that will need a significant area PoMs to be prepared.	Community land identified, new PoMs prepared as required, exhibited and adopted by Council.	Medium
	Ensure that all leases and licences over land covered by this PoM are current and agreements in place	AM.3	Continue to review licences and leases on community land and CLM Crown land	All licences and leases are current	Ongoing
	Ensure fees and charges relating to community land are reviewed annually	AM.4	Undertake annual review of fees and charges	Fees and charges are reviewed annually and adopted by Council	Ongoing
COMMUNITY LAND CATEGORISATION ZONING AND NATIVE TITLE	New community land and CLM Crown land is correctly categorised within a timely period.	AM.5	PoM is to be amended to incorporate new parcels of land.	PoM is amended and publicly exhibited, public hearings completed, reported to Council for adoption	Ongoing
	Ensure appropriate land zoning is applied to community land	AM.6	Review land zoning and ensure correct zoning is applied according to categorisation of land	Appropriate land zoning applied to community land	Medium
	To provide specific plans of management for areas of cultural significance as appropriate	AM.7	Review the LEP State and local listed Heritage Sites and the Aboriginal Heritage Management Strategy to determine if separate PoMs are required.	Specific PoMs are developed and adopted as determined necessary and repealed from the Community Land PoM.	High
FUNDING OPPORTUNITIES	Ensure compliance with the Native Title Act 1993 for use and development of community land (Crown land only)	AM.8	Council appointed/engaged Native Title Manager is engaged to assess all use and development on Crown land	Native Title Advice is received before agreements or development is undertaken on Crown land	Ongoing

1.0 INTRODUCTION

This section has been prepared in accordance with the *Local Government Act 1993*. This section must be read in conjunction with one or more of Sections B1 - B5. The parcels of land covered by this section comprise parcels of community land, categorised as a 'natural area'. These parcels are then further categorised as one or more of the following:

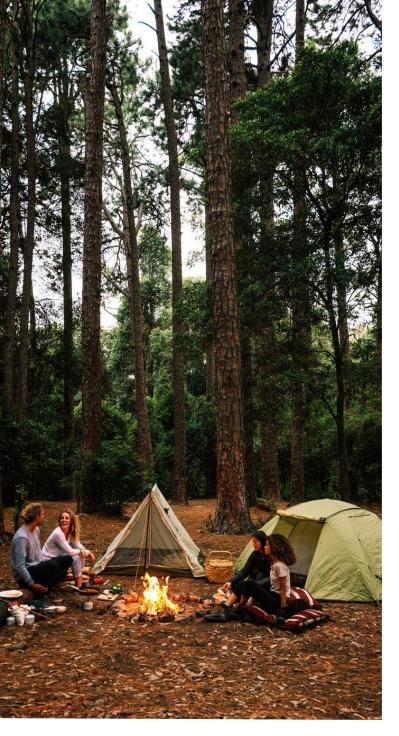

- Bushland
- Wetland
- Escarpment
- Watercourse
- Foreshore

Refer to Appendix 2 (Land Schedule) and 13 (Categorisation Maps) for the categorisation of land parcels.

1.1

Categorisation of the Land

This section applies to community land categorised as a natural area under S.36E of the *Local Government Act 1993*, and to Crown land where Council has been appointed as crown land manager.

Core objectives

The core objectives for management of community land, categorised as a natural area are:

- (a) To conserve biodiversity and maintain ecosystem function in respect of the land, or the feature or habitat in respect of which the land is categorised as a natural area
- (b) To maintain the land, or that feature or habitat, in its natural state and setting
- (c) To provide for the restoration and regeneration of the land
- (d) To provide for community use of and access to the land in such a manner as will minimise and mitigate any disturbance caused by human intrusion
- (e) To assist in and facilitate the implementation of any provisions restricting the use and management of the land that are set out in a recovery plan or threat abatement plan prepared under the *Biodiversity Conservation Act 2018* or the *Fisheries Management Act 1994*.

1.3

Regulations

The Local Government (General) Regulation 2005 provides guideline 102 for the management of the natural area category:

 Land should be categorised as a natural area under section 36(4) of the Act if the land, whether or not in an undisturbed state, possesses a significant geological feature, geomorphological feature, landform, representative system or other natural feature or attribute that would be sufficient to further categorise the land as bushland, wetland, escarpment, watercourse or foreshore under section 36(5) of the Act.

1.4

Statutory planning

There are various statutes and State Environmental Planning Policies that apply to land categorised aa a natural area. These are available on the NSW government website.

Purpose of natural areas

The primary functions of natural areas:

- (a) Maintain and enhance biodiversity and ecological systems
- (b) Maintain and enhance native vegetation and corridors
- (c) Maintain and enhance air and water quality
- (d) Maintain and enhance scenic amenity
- (e) Mitigate climate change impacts
- (f) Preserve environmental heritage
- (g) Conserve areas and items of archaeological, geological and/or scientific interest or significance
- (h) Provide passive recreation areas for the people
- (i) Provide health and social benefits including recreation, tourism, education and social interaction, social capacity
- (j) Assist in improving the psychological, emotional and spiritual health and wellbeing of the community
- (k) Provide free opportunities for regular exercise, which increases self-esteem and improves quality of life

- (l) Provide a cooling effect and a contrast to the built environment
- (m) provide the opportunity for many people to establish and continue their connections with nature

1.6

Significance of natural areas

The significance of an area can depend on the size of that ecosystem, or how common that ecosystem is in the Lake Macquarie area as well as its quality and condition. For example, an ecosystem or species at the geographical edge of its normal distribution can be quite significant.

Natural areas may be significant because of their strategic location rather than the ecosystem. A small parcel of natural area may be a critical link between larger natural areas, or on a ridgeline, or enhance the visual significance of the area by maintaining a dominant presence in a suburban setting, especially in an area dominated by such a large natural feature, such as the lake.

The specific species composition and habitat also influences significance. If habitat for rare (or threatened) species and/or ecological communities is present the area assumes greater significance. Smaller, less viable reserves sometimes merely require more active management. They serve to sustain flora biodiversity and more mobile species such as birds and bats, and in some instances smaller arboreal mammals such as gliders. The linking of reserves by natural corridors can improve viability by facilitating movement of wildlife and plant pollinations/ seed dispersal between reserves.

An assessment of ecological value or significance on an LGA wide strategic basis has been made in the Background Technical Report for Lake Mac 2050 – Biodiversity 2018 and this is reflected in Councils Local Strategic Planning Statement Shaping the Future (2020). This work was used as a basis to prioritise community and Council managed land with high environmental values to assist in the allocation of Council resources in (2020). This prioritisation may require updating over time.

The Local Government Act 1993 permits Councils to resolve that an area be identified as 'containing significant natural features'. including "a known natural, geological, geomorphological, scenic or other feature that is considered by the council to warrant protection or special management considerations, or a wildlife corridor". Council has not resolved to identify any land covered by this PoM as containing significant natural features, although some are Crown reserves.

2.0 **PHYSICAL ENVIRONMENT**

2.1

Topography

Most of the land surrounding Lake Macquarie comprises undulating lowlands with gentle slopes generally less than 10 percent, steepening locally to 25 percent at the heads of valleys (Story et al, 1963). Sea Cliffs occur on headlands at Dudley/ Redhead, Swansea and around Catherine Hill Bay. A steep escarpment to the west and southwest separates the lowlands from the Watagan Mountains and Sugarloaf Range (Winning, 1990).

2.1

Hydrology

The dominant hydrological feature of the area is Lake Macquarie. A number of creeks drain into the lake. The major streams are Cockle Creek, Dora Creek and Wyee Creek, all flow into the lake from the escarpment of the Watagan Mountains in the east and the Link Road Ridge in the north. A number of catchments flow directly to the coast including Jewells, Flaggy Creek and Middle Camp. Some smaller creeks in the north drain into Ironbark Creek and ultimately Hexham Swamp.

2.3

Geology

Geologically, the City lies on the northern edge of the Sydney Basin, with Permian coal measures (Newcastle and Tomago Measures) outcropping in the north. These coal measures are variously dominated by conglomerates, sandstones, shales, tuff, mudstones and coal (Winning, 1990).

In the southern half of the City, the surface geology comprises Triassic rocks of the Clifton Sub-Group of the Narrabeen Group. The dominant rocks are conglomerates and sandstones, with some siltstones and claystones (Winning, 1990). Deep fluvially deposited alluvial soils occur in valleys associated with the major creeks, especially Dora Creek and Cockle Creek, and a sand barrier between Redhead and Swansea on the east of the lake comprises windblown (aeolian) quartz sand (Winning, 1990).

2.4

Vegetation

Native vegetation extant, corridors and the communities (map units) that occur in the Lake Macquarie Local Government Area have been mapped and can be found on Councils website <u>https://www.lakemac.com.au/</u> <u>Development/Planning-controls/Local-Planning-Controls#section-5</u> There are also detailed descriptions (profiles) of the vegetation community map units at the same location.

Community land supports approximately 2,175 hectares of native vegetation and a further 433 ha of native vegetation that has been partially cleared. This amounts to approximately 6 percent of the native vegetation (or bushland) within the City.

Much of the foreshore of Lake Macquarie is Community Land or managed by Council. The vegetation communities on this land include: Mangrove – Estuarine Complex, Saltmarsh, Swamp Oak – Bushland Forest, Foreshore Redgum-Ironbark Forest, Foreshore Redgum Rough-barked Apple Forest and Swamp Mahogany Paperbark Forest. All these apart from Mangroves are State listed threatened ecological communities.

Along the coast Community and Council managed land consists of Coastal Headland

Paperbark Scrub, Coastal Headland Low Forest, Coastal Sand Banksia Scrub. All these apart from the Banksia Scrub contain a State listed threatened ecological community.

Other Councils reserves on the ridges and side slopes contain a range of vegetation communities including Coastal Sheltered Apple – Peppermint Forest, Hunter Valley Moist Forest, Coastal Foothills Spotted Gum - Ironbark Forest, Lake Macquarie Spotted Gum - Ironbark Forest, Sugarloaf Uplands Spotted Gum - Ironbark Forest, Coastal Plains Smooth-barked Apple Woodland, Coastal Plains Stringybark – Apple Forest, Buttonderry Foot slopes Forest, Sugarloaf Lowlands Bloodwood – Apple Forest, Coastal Plains Scrubby Gum Woodland, Snappy Gum Ridgetop Heathy Forest, Lake Macquarie Snappy Gum Forest and Cooranbong Blackbutt Tall Forest.

Along creek and drainage lines, riparian areas and gullies Littoral Rainforest, Lake Macquarie Dry Rainforest, Alluvial Tall Moist Forest, Swamp Mahogany Paperbark Forest, Red Mahogany – Apple – Paperbark Forest and Estuarine Paperbark Scrub Forest occur. These are all threatened ecological communities.

In coastal swamp areas common communities are Coastal Sand Swamp Forest, and Swamp Mahogany – Livistona Swamp Forest occur. Both are threatened ecological communities.

2.5

Flora

A number of rare and threatened flora species occur on community and Council managed land. These include Black-eyed Susan (Tetratheca juncea), Charmhaven Apple (Angophora inopina) and Small Flower Grevillea (Grevillea parviflora subspecies parviflora). Coastal Headland Pea (Pultenaea maritima) occurs in the coastal reserves. There are a number of rare orchid species that occur as well. Some of these threatened species only occur in the Wyong – Lake Macquarie area.

2.6

Fauna

A wide variety of fauna species occur on community and Council managed land, with a corresponding wide variety of habitats. These vegetation communities have been grouped into a number of habitats for fauna. Fauna habitats are available on Councils web site. <u>https://</u> <u>www.lakemac.com.au/Development/Planningcontrols/Local-Planning-Controls#section-5</u>

Community and Council managed land provides a significant resource for native

fauna. Whilst the parcels may be small or fragmented they often connect larger parcels of bushland habitat to function as part of a network. Management of these lands is in many cases crucial for the ongoing survival of populations of these species in the LGA.

Some of the threatened species that are recorded within Council reserves include the Large Forest Owls (Barking, Powerful, Masked, and Sooty Owls) with Powerful and Masked Owl known to breed in large tree hollows on Council land. The Koala has been recorded around Sugarloaf reserve. The Swift Parrot and Regent Honeyeater frequent Council reserves in the Wyee and Morisset area. The Pied and Sooty Oystercatchers, Little Tern and Eastern Curlew frequent the beaches and foreshores. The Eastern Osprey and White-bellied Sea Eagle favour foreshore reserves and sites with good views of the Lake. There are many more threatened species recorded on Community and Council managed land including Squirrel Glider, Grey-headed Flying Fox, Black Bittern Wallum Froglet, Green and Golden Bell Frog.

The fragmentation of numerous Council natural areas and the small size of the remnants have meant the abundance and spatial distribution of many species has declined. The impacts of clearing native vegetation has accounted for the complete loss of some species from parts of the City. Feral and domestic animals have also had a detrimental effect upon native species in natural areas. Despite this, many reserves still contain valuable examples of some of the original faunal species. These that can be maintained for the future with appropriate management.

Whilst the conservation of faunal populations is intimately linked with the conservation of vegetation, the reserving of an area of native vegetation will not necessarily guarantee the survival of the original fauna. The survival of fauna depends on conserving the resources essential for that species. For example, hollow dependant fauna require conservation of foraging resources as well as old mature trees for roosting and breeding. Bushrock and fallen logs provide shelter for a number of small mammals, reptiles and some amphibian species. Full lists of threatened fauna and of threatening processes are available on Council's website.

2.7

Bush fire

Many vegetation communities in Lake Macquarie have mostly evolved in the presence of fire and grow readily in fire prone environments. However, particular communities such as moist and rainforest vegetation are fire sensitive. Too frequent, or too hot fires will result in a shift to more fire tolerant species. Too frequent fire regimes result in soil erosion, (through the burning of leaf litter), and a reduction plant diversity with species such as hop bush, bladey grass and bracken fern becoming dominant. This in turn will lead to a change in the fauna species and numbers that can inhabit the area.

The majority of the land in Lake Macquarie City is mapped as bush fire prone land. Bush fire mitigation measures (including fire regimes) need to be a balance between the protection of life and property and retaining the value of the natural bushland environment. The NSW Rural Fire Service Bushfire Environmental Assessment Code is used by Council to assess bush fire hazard reduction works. Council has a Bushfire Risk Management Plan that takes a strategic approach to management of bushfire within the LGA. This plan prioritises the implementation of bush fire mitigation treatments in targeted areas.

Bush fire legislation provides for the creation and maintenance of asset protection zones (APZs) or other bush fire management treatment measures to protect life and property. Implementation of APZs and other treatments in bushland adjoining urban or developed areas must be undertaken in accordance with the requirements of the Planning for Bushfire Protection A guide for councils, planners, fire authorities and developers 2019. APZs are required to be fully located within the development site. Adjacent to some very old subdivisions (constructed prior to these guidelines in 2002), APZs may have to be located within Community lands categorised as Natural Area.

2.8

Heritage

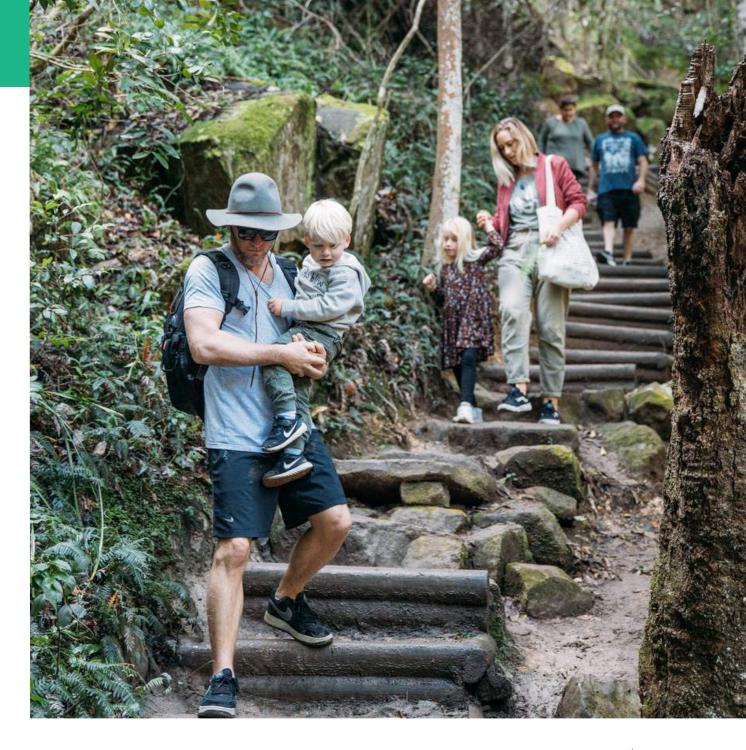

Many natural areas have archaeological sites present including both European and Aboriginal heritage. Site specific surveys are likely to be required to verify where these occur and their significance.

Environmental heritage is identified in LM LEP Schedule 5 of the LM LEP identifies "Heritage items", "Heritage Conservation Areas", "Archaeological sites" and "Landscape items". There are a number of parcels of community land that are identified as; being within a Heritage Conservation Area or as containing heritage items or archaeological sites. See Appendix 9.

A review of state and locally listed heritage items, and Aboriginal significant sites on community or Crown land will be undertaken as an action of this PoM to identify where specific PoMs may be required.

3.0 VALUES OF NATURAL AREAS

There are many values attributed to the provision of natural areas in the Lake Macquarie region. These include landscape amenity; natural resources; environmental/scientific education; cultural/historical resources; economic lifestyle and recreation. To provide a holistic overview and for ease of reference, all values across the five sub-categories of natural areas have been captured in this section.

Landscape amenity

Bushland

Bushland in Lake Macquarie enhances the ridgelines, beaches and headlands of the coast and lake foreshores. It forms the backdrop of the City and provides its unique identity. Bushland provides green corridors, separating areas of development, giving a sense of place to each village or locality, adding to the aesthetic value and the quality lifestyle of the City.

Wetlands

Wetlands comprise a unique vegetative composition and structure, forming a transition zone linking terrestrial and aquatic environments, with variations occurring between fresh and salt water systems. These areas often serve as a breeding, foraging and refuge area for a number of fauna species.

Escarpments

Escarpments create formal and informal lookout areas to observe the natural beauty of the coast, ocean, lake and mountain range.

Watercourses

Many watercourses provide green corridors within urban environments providing visual relief. They add to the aesthetic appeal of a locality. For some time, new subdivisions have been required to protect watercourses and their associated riparian zones.

Foreshore

An extensive lake with a predominantly natural foreshore forms a picturesque landscape of high aesthetic appeal for both residents and visitors.

3.2

Natural resources

Bushland

Bushland within Lake Macquarie provides habitat for native flora and fauna and maintains biodiversity. Bushland areas form native vegetation corridors, allowing native species to move between patches of native vegetation ensuring continued genetic exchange between populations. Bushland is important for plant pollinator movement, the annual migration of birds and other more mobile species.

The ecosystem services provided by bushland include the stabilisation of soil, nutrient recycling,

reduction of urban temperatures, improving the quality of air and water amongst others.

Wetlands

Wetlands contain a significant proportion of the biodiversity of the Lake Macquarie area due to the variation in wetland composition. Wetlands sustain a set of species and ecological processes that do not occur in other land units. Wetlands within Lake Macquarie's LGA may consist of the following vegetation communities (SWC, 1998):

- Brackish and freshwater swamps
- Mangrove swamp forest/scrubland
- Saltmarsh
- Sedgeland
- Swamp forests
- \cdot Wet heath
- Wet meadows

The role of wetland in maintaining water quality in the Lake and watercourses has been documented in the Lake Macquarie Estuary Management Plan (1997) and Premier's Taskforce Report.

Escarpments

On the steep slopes escarpments often contain pockets of native vegetation where it can survive on the rocks, the flatter tops of escarpments are often part of the native vegetation corridor that runs along the coast. Some escarpments are fully vegetated where they occur on steep sand dunes. Vegetation on escarpments can be quite unique and is important for stability of the surface.

Watercourses

The maintenance of riparian corridors assists in the preservation of habitat for local flora and fauna. Riparian areas provide shelter and enable fauna to access water. Watercourse areas provide native vegetation corridors between larger bushland reserves. A network of waterways often interweaves residential areas, offering residents vegetated habitat within close proximity to their neighbourhood.

Vegetated riparian areas provide significant ecosystem service by filtering runoff.

Foreshores

Foreshores consist of undeveloped, modified or highly developed areas. Even thin strips of native vegetation along the foreshore even in highly modified areas have a significant role in stabilising foreshores, slowing runoff, and filtering surface water entering the Lake or ocean, providing waterbird roosting locations and cooling lake water temperatures.

Habitats associated with foreshores include seagrass, saltmarsh, mangroves, sandy beaches, sand and mud flats, wetlands, rocky shores and cliff faces. However, use of these habitats by water and shore birds is influenced by recreational use and particularly dogs off leads.

Along the coast, coastal vegetation assists to maintain the resilience of sandy beaches and dunes to increased storm activity and sea level rise.

3.3

Environmental/scientific education

Bushland

Some patches of bushland are representative of the landscape that occurred before European settlement of the region. It indicates the geological and climatic history of the region through rock outcrops, weathering patterns, caves, fossils, and soils. It is our natural heritage and supports ecosystems and species of interest that can be studied.

Bushland provides an educational resource in the form of an 'outdoor laboratory' for

surrounding schools, colleges or universities (DoP, 1991). There is significant community interest in undertaking citizen science projects and surveys within bushland.

Wetlands

Wetlands offer the opportunity to view the natural interaction between terrestrial and aquatic systems, and contribute significantly to the City's biodiversity. They are a dynamic ecosystem with limited distribution and provide valuable ecosystem services such as:

- Flood storage,
- Groundwater recharge, and
- Surface water filtering

They serve as a foraging resource for shore and water birds as well as raptors, a wide variety of vertebrate and invertebrate aquatic species. Some of these species occur exclusively within wetland habitats and others use wetland in conjunction with terrestrial habitat. Many of the ecological aspects of our wetlands, and species that occur within them, are poorly studied and understood.

Escarpments

Escarpments indicate a link to the geological processes that shaped the landscape of the region. Geological outcrops are often of scientific interest and widely studied. Escarpments will often be associated with vegetative variation due to the sharp change in elevation, and subsequent effects upon the surroundings in a particular area.

Watercourses

Watercourses serve as environmental indicators, which depict the quality of water entering or exiting a system. Lake Macquarie has a large number of tributaries, each indicating varying levels of pollution or human impacts.

Foreshore

The foreshore became the first natural feature that was directly impacted upon by settlement. Since then the foreshore has had a major influence upon settlement in the region as a transitional zone between the aquatic and terrestrial environments. boriginal shell middens occur on many of the foreshores around Lake Macquarie.

The foreshore area around the lake and coast offer an area of scientific research through the range of habitats and impacts upon foreshore areas. Geomorphic, palaeontological, tidal, intertidal, riparian and littoral areas combine to provide special habitat for many waterbirds and migratory species. Migratory species and shorebirds are monitored by the community.

3.4

Cultural/historical resources

Bushland

Bushland may contain sites of cultural heritage significance, both European and Aboriginal sites, of local and regional significance. These include coastal and estuarine shell middens, open campsites, axe-grinding grooves, and scarred trees. Once Council becomes aware that land contains sites of cultural heritage significance, no works to disturb those sites are to take place until an appropriate management framework has been established which may include the provision of a new specific PoM.

Wetlands

The wetlands around Lake Macquarie served as a source of fresh water and plentiful food supply for Aboriginal people. During dry periods with a reduced water level, wetland areas may have also been used as campsites. Some wetlands have special significance.

Escarpment

The escarpment areas serve as a resource, in the form of caves and rocky overhangs. Some may have significance for Aboriginal people.

Watercourses

Early settlers had to rely on Lake Macquarie's tributaries as a source of fresh water. As the coal industry developed in the area, major watercourses were used as a source of water for the coal extraction processes. Evidence of Aboriginal habitation also occurs along watercourses. Axe grinding grooves may occur on rocky outcrops.

Foreshore

The foreshore became the first natural feature that was directly impacted upon by settlement. Since then the foreshore has had a major influence upon settlement in the region as a transitional zone between the aquatic and terrestrial environments. Aboriginal shell middens occur on many of the foreshores around Lake Macquarie.

3.5

Economic lifestyle

Bushland

Much of the attractiveness of Lake Macquarie City is due to the natural environment, particularly the coast, lake and waterways. Bushland forms a natural backdrop and buffer between the developed and undeveloped environments of the City. Without a high quality, natural environment the attractiveness of the City would decline with investment and property values following.

Wetlands

Much of the attractiveness of Lake Macquarie City is due to the natural environment, particularly the Lake and waterways. Without good water quality, the attractiveness of the City would decline and so would economic investment and property values.

Escarpments

Much of the attractiveness of Lake Macquarie City is due to the natural environment, particularly the Coast, Lake and waterways. Escarpments provide natural viewing areas to observe this spectacular landscape. Without a highquality natural environment, the attractiveness of the City would decline and so would economic investment, and property values.

Watercourses

The condition of watercourses directly affects the water quality and foreshore of the lake. The City is attractive for business and recreational opportunities, provided by the diverse lake environment. Poor water quality would significantly affect economic prosperity and land values in the LGA.

Foreshore

The lifestyle of Lake Macquarie and its status as an attractive City can be directly related to the Lake, coast and foreshore. The City extracts a financial and non-financial benefit through business and recreational opportunities, provided by the highly desirable and expansive foreshore area. The high cost of land values of waterfront properties or those properties with views of the lake are prime locations in Lake Macquarie.

3.6

Recreation

Bushland

Urban bushland provides easily accessible recreation opportunities for the local community. The trend of increasing urban densities means that demand for use of community land will increase.

Wetlands

Wetlands provide settings for recreation of a more contemplative nature, such as, bird watching, frog spotting, photography, and environmental education. In the main, these activities require little in the way of facilities.

Escarpments

Escarpments and associated landscapes can also be the basis for various recreation activities from bushwalking, hiking, abseiling, or hang-gliding.

Watercourses

Any recreation activities in watercourse areas should be environmentally sustainable. Suitable activities in these areas would include exploration, bird watching, frog spotting, photography, rowing and canoeing. These activities are unlikely to require supporting infrastructure.

Foreshore

Foreshore areas provide many opportunities for recreational activities, and users may access these areas by land or water. Activities may range from fishing, canoeing exercise, relaxing, picnicking, meditation, photography, wave boarding, surfing, swimming, jogging, walking, roller blading or cycling. Natural areas categorised as foreshore are suitable for water-based recreation activities. Other activities such as boating, water-skiing, sailing, jet skiing, canoeing, kite boarding and sail boarding where the lake foreshore is used as a launching base are better suited for lake foreshore areas categorised as park, and appropriate facilities are provided at these locations.

Major issues have been drawn from background documents that have utilised community surveys and field observations. These natural area issues have been grouped in broad topics, then further detailed in specific items. All issues for each of the natural area sub-categories are identified in this section. If a key issue is relevant to that sub-category a tick is included on the row. The sub categories have been abbreviated as follow bushland (Bu), wetlands (We), escarpment (Es), watercourse (Wa) and foreshore (Fo).

4.1

Threats to natural areas

The major threats to natural areas are summarised as 'primary' impacts and 'secondary' impacts. Under the *Biodiversity Conservation Act* 2016 key threatening processes are listed, of which many are relevant to natural areas.

The primary impacts are considered to be:

- Mechanical impacts (clearing, tracks, filling, draining, dumping etc.)
- Altered pH, fire, hydrological and nutrient regime
- Fragmentation of natural areas (i.e. loss of connectivity)
- Decrease in patch size
- Weed invasion
- Predation by feral and domestic animals
- Coastal and foreshore recession
- Climate change.

The secondary impacts are considered to be:

- Erosion and sedimentation
- Altered faunal assemblages.

4.2

Factors affecting Natural Areas

Natural areas are increasingly being relied upon to compensate for, absorb and mitigate the impacts of urban development including higher density development.

Many natural areas in Lake Macquarie that have been gradually deteriorating due to weed invasion, clearing, inappropriate fire regime, urban run-off, unmanaged access, erosion, dumping of rubbish and building debris, as well as infrastructure construction. For many areas, management has been inadequate. This is a result of insufficient allocation of resources by Council.

Many of the disturbance factors have their highest impact along the edges where natural areas abut urban land uses. Patches of bushland of relatively small size, or with greater edge to area ration are particularly vulnerable to these.

5.0 **DEVELOPMENT AND USE**

Facilities and activities permitted in land categorised as a natural area are limited to ensure that the overarching core objectives for that category are not compromised.

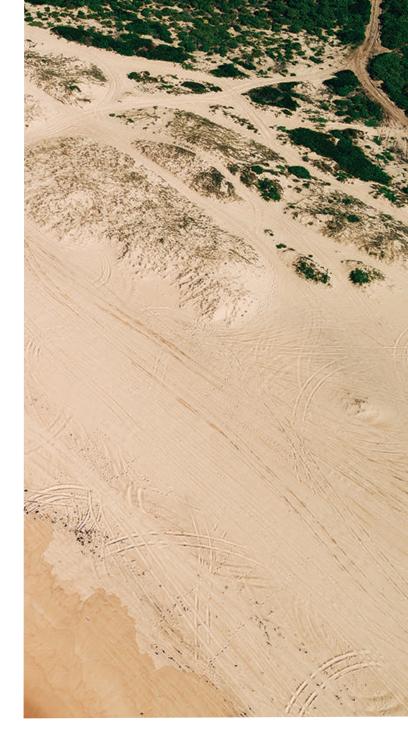

Refer to Appendix 6 and 7 of this plan for details of the permissible facilities and activities for natural areas.

6.0 **MANAGEMENT FRAMEWORK**

At present, the faunal, floristic, cultural, and archaeological significance of many parcels of community land categorised as natural area do not have detailed site surveys or analysis, the exceptions being those natural areas where flora and fauna surveys have been undertaken or Landcare groups are operating. Council has a record of active Landcare sites.

Under the provisions of the LM LEP, the land in this plan is zoned as open space, conservation, environmental, and residential zones. Those parcels containing residential or other urban zones were land that has been dedicated to Council.

Activities prohibited under the relevant LM LEP land use zone are excluded under this PoM. However, some activities that are considered permissible under the land use zone may not be permissible under this PoM.

B1. BUSHLAND

1.0 INTRODUCTION

This section has been prepared in accordance with the *Local Government Act 1993*. The land covered by this section includes those parcels of community land and crown reserved land categorised as 'natural area – bushland'. Refer to Appendix 2 – Land schedule for the categorisation details of individual land parcels.

This section must read in conjunction with Section B - Natural areas.

1.1

Categorisation of the land

This Section applies to community land categorised as natural area - bushland under S. 36 (5) of the *Local Government Act 1993*, and to Crown land where Council has been appointed as Crown Land Manager. As prescribed by the *Local Government Act 1993*, a natural area can also be further categorised as an escarpment, foreshore, wetland, watercourse, or contain a significant natural feature. Refer to the relevant section of this PoM for each of these sub-categories.

1.2

Core objectives

The core objectives for management of community land categorised as bushland are:

- (a) To ensure the ongoing ecological viability of the land by protecting the ecological biodiversity and habitat values of the land, the flora and fauna (including invertebrates, fungi and micro-organisms) of the land and other ecological values of the land
- (b) To protect the aesthetic, heritage, recreational, educational and scientific values of the land

- (c) To promote the management of the land in a manner that protects and enhances the values and quality of the land and facilitates public enjoyment of the land, and to implement measures directed to minimising or mitigating any disturbance caused by human intrusion
- (d) To restore degraded bushland
- (e) To protect existing landforms such as natural drainage lines, watercourses and foreshores
- (f) To retain bushland in parcels of a size and configuration that will enable the existing plant and animal communities to survive in the long term
- (g) To protect bushland as a natural stabiliser of the soil surface.

1.3

Regulations

The Local Government (General) Regulation 2005 provides guideline 107 for the management of the bushland category:

 Land that is categorised as a natural area should be further categorised as bushland under section 36(5) of the Act if the land contains primarily native vegetation and that vegetation—

- (a) is the natural vegetation or a remainder of the natural vegetation of the land
- (b) although not the natural vegetation of the land, is still representative of the structure or floristics, or structure and floristics, of the natural vegetation in the locality.
- Such land includes—

(a) bushland that is mostly undisturbed with a good mix of tree ages, and natural regeneration, where the understorey is comprised of native grasses and herbs or native shrubs, and that contains a range of habitats for native fauna (such as logs, shrubs, tree hollows and leaf litter), or

(b) moderately disturbed bushland with some regeneration of trees and shrubs, where there may be a regrowth area with trees of even age, where native shrubs and grasses are present in the understorey even though there may be some weed invasion, or

(c) highly disturbed bushland where the native understorey has been removed, where there may be significant weed invasion and where dead and dying trees are present, where there is no natural regeneration of trees or shrubs, but where the land is still capable of being rehabilitated.

1.4

Purpose of bushland

Bushland forms an integral part of the aesthetic appeal of the City and quality lifestyle of Lake Macquarie residents. Bushland supports a variety of habitats for fauna, assists in maintaining biodiversity, provides ecosystem services such as improving water, and air quality, provides aesthetic relief from urban areas, and passive recreation opportunities for the community. It important for community health and well-being, as well as adding value to other land in the City.

1.5

Status of bushland in Lake Macquarie

The area of bushland that is located on Council owned land and Crown Land is reported annually in Councils State of the Environment Report. For 2019-2020. Of the 3164 hectares of Council-owned land, 1742 hectares supports bushland and 373 hectares is partially cleared land. This amounts to 4.6 and 7.89 percent of all the bushland and partially cleared land in the LGA. However, not all Council owned land is community or classified as Natural Area. Partially cleared land is land that has been disturbed, either with a high level of weed infestation or substantial modification or removal of native canopy, understorey or ground cover. These areas would range from moderate to poor condition.

Council managed bushland and in some cases partially cleared land makes a significant contribution to the network of native vegetation throughout the LGA. As a general rule the larger the bushland patch size the more resilient it is to degrading threats and the higher the diversity of fauna found within them. However, even the smaller parcels may support threatened species or ecological communities or provide a critical connection between larger patches of native vegetation or bushland.

Key issues have been identified in Section B of this plan. To manage Lake Macquarie's bushland areas a number of issues must be addressed within this section. The management framework detailed in section 4.0 will address:

- Biodiversity conservation
- Protection of bushland values
- Management of bushland
- Restoration and rehabilitation
- Access and use
- Erosion and protection

3.0 DEVELOPMENT AND USE

3.1

Infrastructure and facilities

Subject to budgetary constraints, Council may construct or approve construction by others of a variety of facilities on this land. Any facilities provided shall be located primarily within the areas of low or medium conservation significance thus conserving areas of high conservation significance. Approved facilities are listed in Appendix 6 – Facilities that may be approved on community land. 3.2

Permitted and prohibited activities

For this land category, this PoM identifies activities that are permitted without approval, activities that may be permitted with approval, and activities that are prohibited on this land.

Individuals and community organisations wishing to undertake activities on Community Land must obtain specific Council approval before commencing that activity. Some approvals/ refusals will be straightforward. However, other activities, such as special events, may require Council approval of an event management plan and traffic management plan.

Activities and facilities must be consistent with the objectives of the sub category and the management framework and should Council to achieve these.

Activities that may be considered are listed in Appendix 7 – Permitted and prohibited activities on community land.

4.0 MANAGEMENT FRAMEWORK FOR NATURAL AREAS CATEGORISED AS BUSHLAND

The management framework presents a range of management considerations and related actions/means of assessment, that will be pursued over the next five-10 years.

A management action table is included for each category of land and includes the following items:

Topic – the broad area or aspect of community land management around which broad strategies and actions have been grouped

Performance targets (strategies) – the means by which Council proposes to achieve the Plans key management objectives.

Means of achievement – actions intended to achieve the performance target or strategies. The management actions described can include both specific on-ground or tangible actions as well as directions more of a policy, guideline or procedural nature.

Means of assessment – outlines the means by which Council will evaluate or gauge the effectiveness of the actions in achieving their performance targets.

Priority – Provides an indication of both the relative importance and preferred timing of each action as follows:

High – Essential to the achievement of the plan's management objectives, warranting funding consideration until achieved. Ideally this action will be achieved in one to three years of the plan's adoption.

Medium – Desirable to enhance the achievement of the plan's management objectives and should be undertaken within three to five years (and ideally implemented within the life of this plan)

Low – These actions are useful for the overall management of the plan and should commence within five to 10 years although completion may take longer than this timeframe.

Ongoing – The action in question will be carried out on a regular basis, or as required, for the life of this plan.

ΤΟΡΙΟ	OBJECTIVES / PERFORMANCE TARGETS	MEANS	S OF ACHIEVEMENT	MANNER OF ASSESSMENT	PRIORITY
BIODIVERSITY CONSERVATION	Ensure the ongoing ecological viability of the	BL.1	Manage the Council's natural areas to improve resilience and condition.	Area of natural areas where works have been conducted	High
	land by protecting the ecological biodiversity and habitat values of the land, the flora and fauna (including invertebrates, fungi	BL.2	Lands containing significant species, ecological communities or habitats are preserved and enhanced.	All parcels identified as High Ecological Value or Significance are to be preserved and enhanced1.	Ongoing
	and micro-organisms) of the land and other ecological values.	BL.3	Investigate the impact of introduced species on natural areas and identify appropriate eradication programs.	Introduced species are identified and a plan is established for stressed bushland ecosystems.	Ongoing
	Retain ecological fire regime	BL.4	Control in accordance with the relevant Fire Risk Management Plan and Bushfire Environmental Assessment Code, but maintain ecologically preferable bush fire regimes in a core area.	Ecological composition and processes be maintained and enhanced in core areas through bush fire management.	High
	Maintain coastal processes and including coastal geomorphology and natural ecological succession and wind profiles along the coast	BL.5	Manage coastal areas in accordance with the Lake Macquarie Coastal Management Program 2023	Implementation and consideration of the Coastal Management Program 2023	Ongoing
PROTECTION OF BUSHLAND VALUES	Protect and enhance the aesthetic, heritage, recreational, educational, and scientific values of the land.	BL.6	Protect significant habitats, features and linkages/ corridors through appropriate zoning in the LEP and/ or controls in a DCP and facilities and activities authorised by this plan.	Appropriate land use zones and development controls are applied to protect and enhance the values of significant bushland areas.	Ongoing
		BL.7	Enhance areas with such values through appropriate management and rehabilitation	Activities or facilities authorised by this plan protect and enhance bushland values.	Ongoing
	Minimise and reduce encroachments and edge effects of neighbouring urban and rural development and open space management	BL.8	Issues associated with incompatible uses, access, rubbish dumping, garden refuse dumping and unauthorised structures, earthmoving drainage work clearing or mowing by adjacent residents (or others) are addressed through the establishment of education programs, investigation and targeting incompatible and unauthorised activity.	Education programs are conducted and communication is undertaken with relevant businesses, communities and landowners adjoining bushland reserves. Investigation and appropriate action for unauthorised activity.	Ongoing
MANAGEMENT OF BUSHLAND	Management of access to bushland in a manner that protects and enhances the values, condition and quality of the land, maintains public safety, facilitates public enjoyment of the land, and compliments measures directed to minimising or mitigating any disturbance caused by human intrusion.	BL.9	Consider access and bush fire requirements, and where possible combine these to reduce the number of tracks and rehabilitate unnecessary tracks. Upgrade selected walking tracks to manage erosion susceptibility and enhance walkability.	Walking trails are reassessed, upgraded or rehabilitated within bushland. Where possible walking trails and fire trails are combined. A reduction in informal tracks or access that are impacting native vegetation.	High/ Ongoing
	Improved management of sites categorised as bushland	BL.10	Integration of bush regeneration principles and natural systems regeneration in management to ensure ecosystem condition and function and replacement of mature trees.	Bush regeneration principles and natural systems regeneration methods are integrated within management.	Ongoing

ΤΟΡΙΟ	OBJECTIVES / PERFORMANCE TARGETS	MEANS	S OF ACHIEVEMENT	MANNER OF ASSESSMENT	PRIORITY
		BL.11	Clear physical demarcation on site and on more detailed plans of areas to be managed as mown parkland and areas to be managed as natural area	Change in management to reduced mown area and increase in planted or naturally regenerating mulched areas.	Ongoing
	Improved management of pockets of bushland that are located within and adjacent to other categories (Sportsground, Park and General Community Use	BL.12	Identify suitable areas where natural revegetation should occur rather than mowing	Change in management to reduced mown area and increase in planted or naturally regenerating mulched areas	Medium
	General Community Use	BL.13	Facilitate natural seed germination in suitable areas (e.g. isolated trees or patches of native vegetation) to assist in mature tree replacement	Seed germination takes place and saplings emerge	Medium
RESTORATION AND REHABILITATION		BL.14	Council to continue to support community groups, such as Bushcare & Landcare groups to seek funding for regeneration projects in appropriate bushland areas.	Support Landcare groups and encourage groups to work in areas of bushland identified as high conservation significance and requiring rehabilitation.	Ongoing
	Restore degraded bushland	BL.15	Prioritise bushland areas using environmental values and direct Council works to areas with highest environmental values.	Areas of highest environmental value2 are identified and Council works conducted in these areas as budget allows	High
		BL.16	Educate and assist Bushcare & Landcare groups to prepare site assessment and develop an agreed action plan weed control plans, monitor and document areas worked.	Bushcare & Landcare groups are educated and weed control plans and areas weeded are documented in accordance with the plans.	Ongoing
ACCESS AND USE Encourage activities compatible with conservation and appreciation of natural	Encourage activities compatible with conservation and appreciation of natural	BL.17	Improve accessibility for activities that do not have an adverse impact on native vegetation and fauna habitat such as passive recreation	Increased use awareness and appreciation of bushland areas	Ongoing
	areas	BL.18	Facilitate research and monitoring including community monitoring and citizen science.	Increased research and monitoring takes place	Medium
EROSION AND PROTECTION	Protect existing landforms such as coastal dunes and headlands, natural drainage lines, wetlands, watercourses and foreshores.	BL.20	Wetland and riparian vegetation alongside creek lines and the Lake, is assessed and increased where buffer is inadequate to assist the riparian filtering, buffering capacity and protection from foreshore erosion.	Wetland and riparian vegetation is maintained, and access points to watercourses, wetlands and the Lake managed.	Ongoing
		BL.21	Native vegetation is retained on coastal dunes and headlands	Access on Coastal dunes is managed Vehicular access to coastal areas is restricted to nominated areas	Ongoing
_	·	BL.22	Promote further use of vegetated drainage channels and water quality control structures in suitable areas using soft engineering in preference to hard engineering and concrete lined channels.	Water Sensitive Urban Design approach implemented	Ongoing
		BL.23	Upgrade tracks and maintain designated tracks to manage erosion	Rationalisation and maintenance of tracks	Ongoing
	Tracks and trails	BL.24	Utilise existing track guidelines for track and other facility construction e.g. NPWS guidelines.	Guidelines are considered when constructing new tracks	Ongoing
	Protect bushland as a natural stabiliser of the soil surface.	BL.25	Ensure development activities within bushland conform to established erosion mitigation techniques and appropriate species are used in soil stabilisation.	Soil loss in which vegetation is disturbed is minimised. Re-establish bushland by regeneration techniques or where not successful by replanting locally endemic species.	High

B2. WETLAND

1.0 INTRODUCTION

This section has been prepared in accordance with the Local Government Act. The land covered by this plan comprises parcels of community land categorised as 'natural area – wetland'. Refer to Appendix 2 – Land schedule for the categorisation details of individual land parcels.

This section must be read in conjunction with Section B - Natural areas.

1.1

Categorisation of the land

This section applies to community land categorised as 'Natural area – wetland' under S.36 (5) of the *Local Government Act 1993*, and to Crown land where Council has been appointed as Crown Land Manager.

As prescribed by the *Local Government Act* 1993, a Natural Area can also be further categorised as an escarpment, foreshore, wetland, watercourse, or contain a significant natural feature. Refer to the relevant section of this PoM for each of these sub-categories.

1.2

Core objectives

The core objectives for management of Community land categorised as wetlands are:

(a) To protect the biodiversity and ecological values of wetlands, with particular reference to their hydrological environment (including

water quality and water flow), and to the flora, fauna and habitat values of the wetlands

- (b) To restore and regenerate degraded wetlands
- (c) To facilitate community education in relation to wetlands, and the community use of wetlands, without compromising the ecological values of wetlands.

1.3

Regulations

The Local Government (General) Regulation 2005 provides guideline 108 for the management of the wetland category:

 Land that is categorised as a natural area should be further categorised as wetland under section 36(5) of the Act if the land includes marshes, mangroves, backwaters, billabongs, swamps, sedgelands, wet meadows or wet heathlands that form a waterbody that is inundated cyclically, intermittently or permanently with fresh, brackish or salt water, whether slow moving or stationary

1.4

Purpose of wetland

Wetland forms an integral part of water quality control for the Lake and catchments leading to the ocean. Wetlands are habitat for a diverse range of terrestrial and aquatic species and are important breeding and nursery areas (SWC, 1998) for fish, birds and amphibians. A number of endangered ecological communities and threatened species occur and depend on wetlands. Wetlands mitigate flood impacts, are important for recharging ground water and maintain water quality of both surface and ground water. Wetlands also have social and cultural values and provide opportunities for scientific research, education and recreation (SWC, 1998). (SWC, 1998) and may be over 40% of the original area. The major changes to the wetlands of Lake Macquarie can largely be attributed to physical loss of wetland area due to infilling, and/ or modification due to hydrological changes. Most large-scale physical changes to the wetlands have been to accommodate road and rail corridors, rural, and industrial and urban development (SWC, 1998). Whilst works have been undertaken to rehabilitate a number of wetlands, deterioration continues especially around the wetland edges and sea level rise is causing changes in species composition.

Many but not all wetlands have been mapped as state significant wetlands in the Coastal Management State Environmental Planning Policy.

1.5

Status of wetlands in Lake Macquarie

No accurate assessment of the loss of wetland is available, though substantial loss is apparent

Key issues have been identified in Section B of this plan. To manage Lake Macquarie's wetland areas a number of issues must be addressed within this section. The management framework detailed in section 4.0 will address:

- Biodiversity conservation
- Management of wetland
- Restoration and rehabilitation
- Community education

3.0 DEVELOPMENT AND USE

3.1

Infrastructure and facilities

In general, development, activities and facilities should be avoided in wetland areas. The development of any structures within a wetland will require specific approvals, including the consideration of environmental impacts. Activities and facilities that may be considered are listed in Appendix 6 – Facilities that may be approved on community land as long as they are consistent with and help achieve the conservation of wetland areas and the objectives in the management framework. 3.2

Permitted and prohibited activities

For wetlands, this PoM identifies activities that are permitted without approval, activities that may be permitted with approval, and activities that are prohibited on this land.

Individuals and community organisations wishing to undertake activities on community land must obtain specific Council approval before commencing that activity. Some approvals/ refusals will be straightforward. However, other activities, such as special events, may require Council approval of an event management plan and traffic management plan.

Activities and facilities must be consistent with the objectives of the sub category and the management framework and should Council to achieve these. Activities that may be considered are listed in Appendix 7 – Permitted and prohibited activities on community land.

4.0 MANAGEMENT FRAMEWORK FOR NATURAL AREAS CATEGORISED AS WETLAND

The management framework presents a range of management considerations and related actions/means of assessment, that will be pursued over the next five-10 years.

A management action table is included for each category of land and includes the following items:

Topic – the broad area or aspect of community land management around which broad strategies and actions have been grouped

Performance targets (strategies) – the means by which Council proposes to achieve the Plans key management objectives.

Means of achievement – actions intended to achieve the performance target or strategies. The management actions described can include both specific on-ground or tangible actions as well as directions more of a policy, guideline or procedural nature.

Means of assessment – outlines the means by which Council will evaluate or gauge the effectiveness of the actions in achieving their performance targets.

Priority – Provides an indication of both the relative importance and preferred timing of each action as follows:

High – Essential to the achievement of the plan's management objectives, warranting funding consideration until achieved. Ideally this action will be achieved in one to three years of the plan's adoption.

Medium – Desirable to enhance the achievement of the plan's management objectives and should be undertaken within three to five years (and ideally implemented within the life of this plan)

Low – These actions are useful for the overall management of the plan and should commence within five to 10 years although completion may take longer than this timeframe.

Ongoing – The action in question will be carried out on a regular basis, or as required, for the life of this plan.

ΤΟΡΙϹ	OBJECTIVES / PERFORMANCE TARGETS	MEANS	OF ACHIEVEMENT	MANNER OF ASSESSMENT	PRIORITY

Investigation and appropriate action for unauthorised activity.	Ongoing
	Provide for wetlands to migrate landwards in response to climate change	WE.8	Provide adequate native vegetation buffers between wetlands and other uses (particularly along drainage lines and in low lying areas.)	Buffers provided and rehabilitated with native vegetation between wetlands and areas modified for active recreational use	Ongoing
RESTORATION AND REHABILITATION	Restore and regenerate degraded	WE.9	Re-establish native aquatic and fringing native vegetation.	Removal of environmental and high threat and priority weed species is carried out and a rehabilitation plan is developed and implemented	Ongoing
		WE.10	Restore or control the water regime.	Where appropriate, the water regime is manipulated to enhance the restoration and/or maintenance of wetland ecosystem.	Medium/ Ongoing
	wetlands.	WE.11	Prepare a weed control plan for significant wetland areas with weed infestation	Prioritisation for remediation of weed infested areas incorporated into management of wetlands.	Medium/ Ongoing
		WE.12	Where possible exclude all domestic grazing animals from the riparian zones and maintain buffers of riparian vegetation, by fencing between areas to be grazed, and the wetland.	Riparian zones are fenced to exclude domestic grazing animals.	Medium
COMMUNITY EDUCATION	Facilitate community education in relation	WE.13	Encourage the development of Landcare and other community groups to develop 'community ownership' of wetland areas.	Wetlands are more highly valued within the community.	Ongoing
	to wetlands, and the community use of wetlands, without compromising the	WE.14	Provide low impact access to wetland areas, such as, viewing platforms and boardwalks	_ Public access managed and interpretation	
	ecological values of wetlands.	WE.15	Interpretive educational material maybe provided in a manner that is consistent with the protection of the integrity of the wetland ecosystem.	opportunities provided with minimal impact on	Ongoing

B3. ESCARPMENT

1.0 INTRODUCTION

This section has been prepared in accordance with the *Local Government Act 1993*. The land covered by this plan consists of parcels or part parcels of community land categorised as 'natural area – escarpment'. Refer to Appendix 2 – Land schedule of categorisation details for individual land parcels.

This section must be read in conjunction with section B - natural areas.

Escarpments included in this plan occur as coastal headlands and sea cliffs. These are very steep cliff like structures with slopes exceeding 250 but are often flatter on top of the steep slopes. Other escarpments occur as part of the Mount Sugarloaf range flanking the western boundary of the City. The majority of the western escarpments occur in National Park and Forestry Estate. 1.1

Categorisation of the land

This PoM applies to community land categorised as 'natural area – escarpment' under S.36 (5) of the *Local Government Act 1993*, and to Crown Land where Council has been appointed as Crown Land Manager. As prescribed by the *Local Government Act 1993*, a natural area can also be further categorised as a bushland, wetland, watercourse, foreshore, or contain a significant natural feature. Refer to the relevant section of this PoM for each of these sub-categories.

1.2

Core objectives

The core objectives for management of community land categorised as an escarpment are:

- To protect any important geological, geomorphological or scenic features of the escarpment
- To facilitate safe community use and enjoyment of the escarpment.

1.3

Regulations

The Local Government (General) Regulation 2005 provides guideline 109 for the management of the escarpment category:

- Land that is categorised as a natural area should be further categorised as an escarpment under section 36(5) of the Act if:
- (a) the land includes such features as a long cliff-like ridge or rock
- (b) the land includes significant or unusual geological, geomorphological or scenic qualities.

1.4

Purpose of escarpment

Escarpments enhance the aesthetic value of the City. They offer elevated viewpoints for scenic appreciation opportunities and for recreation including abseiling, rock climbing and hang-gliding. 1.5

Status of escarpments in Lake Macquarie

The coastal areas of escarpment are mostly rocky cliff faces and/ or vegetated and indicative of the general characteristics of the surrounding bushland. Vegetation is coastal heath. Some escarpment areas are prone to erosion particularly when access on the top of the escarpment is unmanaged. Vehicular tracks and informal pathways often impact upon the existing vegetation and increase soil erosion.

Key issues have been identified in Section B of this plan. To manage Lake Macquarie's escarpment areas a number of issues must be addressed within this section. The management framework detailed in section 4.0 will address:

- Biodiversity conservation
- Protection of escarpment values
- Restoration and rehabilitation
- Community access and education

3.0 DEVELOPMENT AND USE

3.1

Infrastructure and facilities

In general, development, activities and facilities should be avoided on escarpment areas. The development of any structures within an escarpment area will require specific approvals, including the consideration of environmental impacts and the Lake Macquarie Coastal Management Program 2023. Activities and facilities that may be considered are listed in Appendix 6 – Facilities that may be approved on community land as long as they are consistent with and help achieve the conservation of escarpment areas and the objectives in the management framework. 3.2

Permitted and prohibited activities

For escarpment, this PoM identifies activities that are permitted without approval, activities that may be permitted with approval, and activities that are prohibited on this land.

Individuals and community organisations wishing to undertake activities on Community Land must obtain specific Council approval before commencing that activity. Some approvals/ refusals will be straightforward. However, other activities, such as special events, may require Council approval of an event management plan and traffic management plan.

Activities and facilities must be consistent with the objectives of the sub category and the management framework and should Council to achieve these. Activities that may be considered are listed in Appendix 7 – Permitted and prohibited activities on community land.

4.0 MANAGEMENT FRAMEWORK FOR NATURAL AREAS CATEGORISED AS ESCARPMENT

The management framework presents a range of management considerations and related actions/means of assessment, that will be pursued over the next five-10 years.

A management action table is included for each category of land and includes the following items:

Topic – the broad area or aspect of community land management around which broad strategies and actions have been grouped

Performance targets (strategies) – the means by which Council proposes to achieve the Plans key management objectives.

Means of achievement – actions intended to achieve the performance target or strategies. The management actions described can include both specific on-ground or tangible actions as well as directions more of a policy, guideline or procedural nature.

Means of assessment – outlines the means by which Council will evaluate or gauge the effectiveness of the actions in achieving their performance targets.

Priority – Provides an indication of both the relative importance and preferred timing of each action as follows:

High – Essential to the achievement of the plan's management objectives, warranting funding consideration until achieved. Ideally this action will be achieved in one to three years of the plan's adoption.

Medium – Desirable to enhance the achievement of the plan's management objectives and should be undertaken within three to five years (and ideally implemented within the life of this plan)

Low – These actions are useful for the overall management of the plan and should commence within five to 10 years although completion may take longer than this timeframe.

Ongoing – The action in question will be carried out on a regular basis, or as required, for the life of this plan.

OBJECTIVES / PERFORMANCE TARGETS	MEANS	S OF ACHIEVEMENT	MANNER OF ASSESSMENT	PRIORITY
Protect the biodiversity and ecological values associated with escarpments.	EC.1	Consider the establishment of a buffer zone around significant escarpments to reduce the impact upon these unique ecosystems and landscapes.	A buffer zone consisting of endemic native terrestrial and wetland species is established.	Ongoing
Protect any important geological, geomorphological or scenic features of the escarpment.	EC.2	Activities that would adversely impact on escarpments are avoided or managed to avoid impacts	Escarpments are not impacted	High
Maintain the natural processes responsible for the formation of the escarpment	EC.3	Developments upon adjoining land are to consider the conservation/protection measures associated with escarpments.	Conservation/protection of escarpments are considered in the development process for adjoining areas.	High/ Ongoing
Maintain coastal processes and including coastal geomorphology and natural ecological succession and wind profiles along the coast	EC.4	Manage coastal areas in accordance with the Lake Macquarie Coastal Management Program 2023	Implementation and consideration of the Coastal Management Program 2023	Ongoing
Restore and regenerate degraded escarpment areas.	EC.5	Rehabilitate and manage access to areas that have been damaged by informal access or paths or the removal of natural vegetation.	Restoration of degraded areas	High/ Ongoing
Facilitate safe community use and enjoyment of the escarpment.	EC.6	Provision of controlled and safe walking trails and viewing platforms in appropriate locations to access escarpment areas.	Formal access is established and utilised by the public. Consider the installation of handrails and signage, where appropriate.	High/ Ongoing
	EC.7	Utilise existing track guidelines for track and other facility construction e.g. NPWS guidelines.	Guidelines are considered when constructing new tracks	Ongoing
	Protect the biodiversity and ecological values associated with escarpments. Protect any important geological, geomorphological or scenic features of the escarpment. Maintain the natural processes responsible for the formation of the escarpment Maintain coastal processes and including coastal geomorphology and natural ecological succession and wind profiles along the coast Restore and regenerate degraded escarpment areas. B4. WATERCOURSE

1.0 INTRODUCTION

This PoM has been prepared in accordance with the *Local Government Act 1993*. The land covered by this plan consists of parcels of Community Land and crown reserves categorised as 'natural area – watercourse'. Refer to Appendix 2 – Land schedule for categorisation details of individual land parcels.

This section must be read in conjunction with Section B - Natural areas.

1.1

Categorisation of the land

This PoM applies to Community Land categorised as Natural Area - watercourse under S. 36 (5) of the *Local Government Act 1993*, and to Crown land where Council has been appointed as Crown Land Manager. As prescribed by the *Local Government Act 1993*, a natural area can also be further categorised as a bushland, wetland, escarpment, foreshore, or contain a significant natural feature. Refer to the relevant section of this PoM for each of these sub-categories.

1.2

Core objectives

The core objectives for management of community land categorised as a watercourse are:

(a) To manage watercourses so as to protect the biodiversity and ecological values of the instream environment, particularly in relation to water quality and water flows

- (b) To manage watercourses so as to protect the riparian environment, particularly in relation to riparian vegetation and habitats and bank stability
- (c) To restore degraded watercourses
- (d) To promote community education, and community access to and use of the watercourse, without compromising the other core objectives of the category.

1.3

Regulations

The Local Government (General) Regulation 2005 provides guideline 110 for the management of the watercourse category:

- Land that is categorised as a natural area should be further categorised as a watercourse under section 36(5) of the Act if the land includes:
- (a) any stream of water, whether perennial or intermittent, flowing in a natural channel, or

in a natural channel that has been artificially improved, or in an artificial channel that has changed the course of the stream of water, and any other stream of water into or from which the stream of water flow

 (b) associated riparian land or vegetation, including land that is protected land for the purposes of the *Rivers and Foreshores Improvement Act 1948* or State protected land identified in an order under section 7 of the *Native Vegetation Conservation Act 1997*.

1.4

Purpose of watercourse

The primary role of a watercourse category within the Lake Macquarie LGA is to enhance the quantity and quality of water entering the lake. A watercourse category also offers a habitat refuge for flora and fauna, covers the carriage and treatment of urban stormwater, provides for recreational opportunities, and adds to the aesthetic qualities of the lake.

1.5

Status of watercourses in Lake Macquarie

Lake Macquarie has a surface area of approximately 110 square kilometres, with a catchment of approximately 650 square kilometres. There are seven catchments draining to the ocean and lagoon catchments. Many sub-catchments are highly urbanised, and others are rapidly developing or have been cleared for agriculture. Others remain in a relatively natural condition.

Water quality in the Lake reflects the land use, community activities, and the physical condition of these sub-catchments. The quality and quantity of water that enters Lake Macquarie from the catchment heavily influences the water quality, including point source discharge activities occurring on the Lake and tidal exchanges.

Community land and other Council managed lands contain creek lines, drainage lines and riparian areas that contribute to the maintenance of water quality in receiving waters such as the Lake, wetland areas and the ocean.

Key issues have been identified in Section B of this plan. To manage Lake Macquarie's watercourse areas a number of issues must be addressed within this section. The management framework detailed in section 4.0 will address:

- Biodiversity conservation
- Erosion
- Restoration and rehabilitation
- Community education and access

3.0 **DEVELOPMENT AND USE**

3.1

Infrastructure and facilities

Council may undertake drainage and environmental restoration or stabilisation works in watercourse areas. Many watercourse areas are crossed by public infrastructure. Some contain dams or weirs that require maintenance or repair. The development of any structures within a watercourse area will require specific approvals, including the consideration of environmental impacts and the Lake Macquarie Coastal Management Program 2023. Facilities that may be considered are listed in Appendix 6 – Facilities that may be approved on community land. and as long as they are consistent with and help achieve the conservation of watercourse and their riparian areas and the objectives in the management framework.

3.2

Permitted and prohibited activities

For watercourse, this PoM identifies activities that are permitted without approval, activities that may be permitted with approval, and activities that are prohibited on this land.

Individuals and community organisations wishing to undertake activities on community land must obtain specific Council approval before commencing that activity. Some approvals/ refusals will be straightforward. However, other activities, such as special events, may require Council approval of an event management plan and traffic management plan.

Activities and facilities must be consistent with the objectives of the sub category and the management framework and should Council to achieve these. Activities that may be considered are listed in Appendix 7 – Permitted and prohibited activities on community land.

4.0 MANAGEMENT FRAMEWORK FOR NATURAL AREAS CATEGORISED AS WATERCOURSE

The management framework presents a range of management considerations and related actions/means of assessment, that will be pursued over the next five-10 years.

A management action table is included for each category of land and includes the following items:

Topic – the broad area or aspect of community land management around which broad strategies and actions have been grouped

Performance targets (strategies) – the means by which Council proposes to achieve the Plans key management objectives.

Means of achievement – actions intended to achieve the performance target or strategies. The management actions described can include both specific on-ground or tangible actions as well as directions more of a policy, guideline or procedural nature.

Means of assessment – outlines the means by which Council will evaluate or gauge the effectiveness of the actions in achieving their performance targets.

Priority – Provides an indication of both the relative importance and preferred timing of each action as follows:

High – Essential to the achievement of the plan's management objectives, warranting funding consideration until achieved. Ideally this action will be achieved in one to three years of the plan's adoption.

Medium – Desirable to enhance the achievement of the plan's management objectives and should be undertaken within three to five years (and ideally implemented within the life of this plan)

Low – These actions are useful for the overall management of the plan and should commence within five to 10 years although completion may take longer than this timeframe.

Ongoing – The action in question will be carried out on a regular basis, or as required, for the life of this plan.

TOPIC	OBJECTIVES / PERFORMANCE TARGETS	MEAN	S OF ACHIEVEMENT	MANNER OF ASSESSMENT	PRIORITY
BIODIVERSITY CONSERVATION	Manage watercourses so as to protect	WA.1	Install sediment traps and stormwater quality control devices where appropriate and in accordance with priorities		Ongoing
	the biodiversity and ecological values of the aquatic and instream environment, particularly in relation to water quality and water flows.	WA.2	Implement Adopt a Water Sensitive Urban approach in accordance with Council policy and guidelines including the Water cycle management guideline	Vegetated drainage channels and constructed water quality control devices meet Council guidelines	Ongoing
		WA.3	Ensure fish passage is provided for in all structures	Works do not obstruct fish passage	Ongoing
	Maintenance of hydrological regime and provide for adjustments in response to climate change.	WA.4	Riparian buffers consisting of native vegetation are maintained or enhanced	Increased width and health of riparian areas	Ongoing
EROSION		WA.5	Enhancement of open space linkages and riparian buffers in areas along watercourses where they are inadequate	Where possible riparian zones are incorporated into open space linkages, enhancing the riparian zone and extending existing native vegetation corridors.	High/ Ongoing
	Manage watercourses so as to protect the riparian environment, particularly in relation to riparian vegetation and habitats and bank stability.	WA.6	Identify areas of soil erosion, scarring, and streambank degradation within the riparian zone for works or re-establishment of native vegetation. Prioritise these areas and consider funding opportunities.	Where funding is secured, stabilisation works are undertaken riparian zone is restored with appropriate endemic native species to address areas of high streambank erosion.	High/ Ongoing
		WA.7	Undertake restoration/stabilisation works with a preference for soft engineering approaches to address bed lowering and bank erosion	Restoration/stabilisation projects conducted	Ongoing
RESTORATION AND REHABILITATION		WA.8	Expand the riparian vegetation alongside the major tributaries where buffers are inadequate to increase the riparian filtering and buffering capacity.	Buffers are increased	Ongoing
	Restore degraded watercourses	WA.9	Remove exotic weed species and allow regeneration to occur, ensure any revegetation includes native understorey species to provide a complete habitat representative of the original Council vegetation community map unit.	Native tree canopy, understorey and groundcover species are established through restoration projects	Ongoing

ΤΟΡΙΟ	OBJECTIVES / PERFORMANCE TARGETS	MEANS	OF ACHIEVEMENT	MANNER OF ASSESSMENT	PRIORITY
RESTORATION AND REHABILITATION (CONTINUED)		WA.10	Where possible exclude all domestic grazing animals from the riparian zones and maintain buffers of riparian vegetation, by fencing between areas to be grazed, and the watercourse.	Riparian zones are fenced to control access to domestic grazing animals.	Medium
()	Restore degraded watercourses (continued)	WA.11	Undertake restoration/stabilisation works using soft engineering approaches to address bed lowering and bank erosion	Restoration/stabilisation projects conducted	Ongoing
		WA.12	Prioritise areas for rehabilitation and restoration using established methods including the Lake Macquarie Coastal Management Program 2023	Areas prioritised for restoration and rehabilitation using a documented method	High
COMMUNITY EDUCATION AND ACCESS		WA.13	Encourage the formation of community groups to care for, and maintain the riparian vegetation and restore degraded sites.	Landcare and Rivercare initiatives stimulate community interest resulting in the formation of new groups.	Ongoing
	watercourse, without compromising the other core objectives of the category.	WA.14	Bridges and pathways are constructed to control access in a manner that does not compromise the integrity of the riparian ecosystem and does not cause erosion.	New bridges and pathways constructed in appropriate locations.	Medium
		WA.15	Continue to support and encourage streamwatch research and other community initiatives that are mutually beneficial to the environment and the community	Community projects, monitoring and research are supported	Ongoing

B5. Foreshore

1.0 INTRODUCTION

This section has been prepared in accordance with the *Local Government Act 1993*. The land covered by this section is comprised of those parcels or part parcels of land categorised as 'Natural Area – foreshore'. Refer to Appendix 2 – Land Schedule for categorisation details of individual land parcels.

This section must be read in conjunction with Section B - Natural Areas.

1.1

Categorisation of the land

This PoM applies to community land categorised as natural area – foreshore under S. 36 (5) of the *Local Government Act 1993*, and certain crown reserves that contain similar qualities. As prescribed by the *Local Government Act 1993*, a natural area can also be further categorised as bushland, wetland, escarpment, watercourse, or contain a significant natural feature. Refer to the relevant section of this PoM for each of these sub-categories.

1.2

Core objectives

The core objectives for management of community land categorised as foreshore are:

 (a) To maintain the foreshore as a transition area between the aquatic and the terrestrial environment, and to protect and enhance all functions associated with the foreshore's role as a transition area (b) To facilitate the ecologically sustainable use of the foreshore, and to mitigate impact on the foreshore by community use.

1.3

Regulations

The Local Government (General) Regulation 2005 provides guideline 111 for the management of the foreshore category:

• Land that is categorised as a natural area should be further categorised as foreshore under section 36(5) of the Act if the land is situated on the water's edge and forms a transition zone between the aquatic and terrestrial environment.

1.4

Should be purpose of foreshore

Foreshores serve as a transition zone between the aquatic environment of the lake and ocean, and the adjacent foreshore areas. Foreshores can occur

naturally, in a modified state but allowing access to the waters edge, or in a highly modified state as a recreational resource. Developed foreshore areas such as these are categorised as park.

By definition foreshore areas are thin strips of transition. Such strips are difficult to accurately map so, in this plan, this category is inclusive of adjacent terrestrial areas.

Where areas adjacent to the ocean and lake are predominantly in their natural state, and/or covered in native vegetation with the predominant use is conservation, the foreshore category has not been applied.

1.5

Status of foreshore in Lake Macquarie

The Lake Macquarie region has a high recreational significance and is utilised for water-based recreation including boating, sailing, swimming and fishing. There are numerous public jetties, wharves and boat-launching ramps around Lake Macquarie with associated facilities. Lake Macquarie's foreshore or perimeter extends for 170 km. A large proportion of the Lake Macquarie shoreline is highly developed for residential use, with approximately 40% (70 km) comprising absolute waterfront residential development. Foreshore modification associated with urban development includes construction of sea walls, mowing, removal of trees, construction of jetties and ramps, creation of sandy or pebbly beaches (over seagrass beds) and construction of stormwater outlets. In combination, these measures change the capacity of nearshore habits to process nutrients and organic matter and also constrain the ability of the nearshore and foreshore habitats to respond to predicted longer term changes such as sea level rise. (Council & Umwelt 2015).

Key issues have been identified in Section B of this plan. To manage Lake Macquarie's watercourse areas a number of issues must be addressed within this section. The management framework detailed in section 4.0 will address:

- Protection of foreshore values
- Biodiversity conservation
- Restoration and rehabilitation
- Community education and access

3.0 **DEVELOPMENT AND USE**

3.1

Infrastructure and facilities

Council may construct or approve construction by others of a variety of facilities on this land. The purpose of any facilities provided shall be to support activities and uses that are consistent with the core objectives for this land category. Approved facilities are listed in Appendix 6 – Facilities that may be approved on community land. 3.2

Permitted and prohibited activities

For foreshore, this PoM identifies activities that are permitted without approval, activities that may be permitted with approval, and activities that are prohibited on this land.

Individuals and community organisations wishing to undertake activities on community land must obtain specific Council approval before commencing that activity. Some approvals/ refusals will be straightforward. However, other activities, such as special events, may require Council approval of an event management plan and traffic management plan.

Activities and facilities must be consistent with the objectives of the sub category and the management framework and should Council to achieve these. Activities that may be considered are listed in Appendix 7 – Permitted and prohibited activities on community land.

4.0 MANAGEMENT FRAMEWORK FOR NATURAL AREAS CATEGORISED AS FORESHORE

The management framework presents a range of management considerations and related actions/means of assessment, that will be pursued over the next five-10 years.

A management action table is included for each category of land and includes the following items:

Topic – the broad area or aspect of community land management around which broad strategies and actions have been grouped

Performance targets (strategies) – the means by which Council proposes to achieve the Plans key management objectives.

Means of achievement – actions intended to achieve the performance target or strategies. The management actions described can include both specific on-ground or tangible actions as well as directions more of a policy, guideline or procedural nature.

Means of assessment – outlines the means by which Council will evaluate or gauge the effectiveness of the actions in achieving their performance targets.

Priority – Provides an indication of both the relative importance and preferred timing of each action as follows:

High – Essential to the achievement of the plan's management objectives, warranting funding consideration until achieved. Ideally this action will be achieved in one to three years of the plan's adoption.

Medium – Desirable to enhance the achievement of the plan's management objectives and should be undertaken within three to five years (and ideally implemented within the life of this plan)

Low – These actions are useful for the overall management of the plan and should commence within five to 10 years although completion may take longer than this timeframe.

Ongoing – The action in question will be carried out on a regular basis, or as required, for the life of this plan.

ΤΟΡΙϹ	OBJECTIVES / PERFORMANCE TARGETS	MEAN	S OF ACHIEVEMENT	MANNER OF ASSESSMENT	PRIORITY
PROTECTION OF FORESHORE VALUES	Maintain the foreshore as a transition	FS.1	Consider extending the coverage of native foreshore vegetation in selected areas to increase filtering and buffering capacity.	Foreshore vegetation is enhanced and water quality improved.	Ongoing
	area between the aquatic and the terrestrial environment, and to protect and enhance all functions	FS.2	Ensure weed removal is undertaken in accordance with established regeneration techniques.	Weeds are managed in foreshore areas with minimal impact upon soil and native vegetation structure.	Ongoing
	associated with the foreshore's role as a transitional area.	FS.3	Continue to promote the benefits of natural profiles in educational material. Restore the natural profile of foreshore in environmentally friendly stabilisation works	Natural foreshore profiles maintained or restored	Ongoing
	Ensure the natural profile of foreshore is maintained where possible	FS.4	Provide adequate native vegetation buffers between foreshores and other uses (particularly along drainage lines and in low lying areas.)	Buffers provided and rehabilitated with native vegetation between foreshores and areas modified for active recreational use	Ongoing
	Provide for foreshore areas to migrate landwards in response to climate change	FS.5	Identify areas of serious erosion and re-establish native aquatic and fringing vegetation using regeneration techniques, mulch areas for tree regeneration.	Removal of weed species is carried out and a rehabilitation plan providing some mulched areas to allow tree regeneration to occur.	Ongoing
	Protect and conserve coastal rock shelves Maintain or improve natural coastal and Lake foreshore processes	FS.6	Impacts on these areas are avoided and access managed as required	Coastal rock shelves not impacted	High/ Ongoing
		FS.7	Ensure all maintenance practices, facilities and development maintain or avoid impact on foreshore processes as well as being	Future facilities and development do not impact or avoid impacting foreshore processes.	High/ Ongoing
		FS.8	Ensure facilities and development are not impacted by foreshore processes in accordance with Councils policy and guidelines	New structures and facilities are located or design facilities so that foreshore and coastal processes do not impact on them	High/ Ongoing
		FS.9	Sea wrack removal will, in general, not be undertaken as wrack decomposition and movement is part of the natural foreshore process.	Sea wrack is maintained in situ for the majority of the Lake foreshore	Ongoing

ΤΟΡΙϹ	OBJECTIVES / PERFORMANCE TARGETS		5 OF ACHIEVEMENT	MANNER OF ASSESSMENT	PRIORITY	
PROTECTION OF FORESHORE VALUES (CONTINUED)	Plan for future sea level rise and coastal recession	FS.10	Ensure all facilities and development adequately consider coastal hazards and sea level rise and incorporate measures to address these in accordance with adopted guidelines and policies	Future facilities and development incorporate appropriate measures	High/ Ongoing	
RESTORATION AND REHABILITATION	Restore and regenerate degraded foreshore areas	FS.11	Prioritise areas for restoration and revegetation Identify areas of serious erosion and re-establish native aquatic and fringing vegetation using regeneration techniques	Enhancement and stabilisation of foreshore and foredune areas and vegetation. Increase in native vegetation cover in foreshore areas. Removal of weed species in foreshore areas.	Ongoing	
		FS.12	Facilitate and support community involvement in the rehabilitation and weed removal of selected sites.	Community groups, such as Landcare, are involved in the rehabilitation and management of selected foreshore areas.	Ongoing	
COMMUNITY EDUCATION AND ACCESS	Facilitate the ecologically sustainable use of the foreshore, and to mitigate impact on the foreshore by community use.	FS.13	Provision of educational material which raises the level of awareness of foreshore issues.	Knowledge of foreshore issues and processes are raised in the general community.	Ongoing	
		impact on the foreshore by community		Bridges, dune access and pathways are used to control access in a manner that does not compromise the integrity of the sandy beach, dunal or foreshore ecosystem and does not cause erosion.	Access to certain foreshore areas managed.	High/ Ongoing

SPORTS GROUND

1.0 INTRODUCTION

This Section has been prepared in accordance with the *Local Government Act 1993*. The land covered by this section includes land either owned by Council and classified as Community Land, or is crown reserved land with Council appointed as Crown Land Manager. Refer to Appendix 2 for categorisation details of individual land parcels.

1.1

Categorisation of the land

This Section applies to community land and CLM Crown land categorised as sportsground under S. 36 (4) of the *Local Government Act 1993*, and to Crown Land where Council has been appointed as Crown Land Manager. There are some sportsgrounds that Council manages, which are located on land not owned by Council. As these are not community land or CLM Crown land they have not been included in this PoM.

Core objectives

The core objectives for management of community land and crown reserves categorised as a sportsground are:

- (a) To encourage, promote and facilitate recreational pursuits in the community involving organised and informal sporting activities and games
- (b) To ensure that such activities are managed having regard to any adverse impact on nearby residences.

1.3

Regulations

The Local Government (General) Regulation 2005 provides guideline 103 for the management of the sportsground category:

• Land should be categorised as a sportsground under section 36(4) of the Act if the land is used or proposed to be used primarily for active recreation involving organised sports or the playing of outdoor games.

1.4

Purpose of sportsgrounds

Sportsgrounds are an integral part of Council's open space network. They facilitate formal and informal sporting activities and can have a secondary role as recreational open space when not being used as a sportsground. They provide opportunities for people to maintain a healthy and active lifestyle, in a social environment.

1.5

Value of sportsgrounds

Council has adopted a values-based approach to preparing and reviewing PoMs for community land. Values are what makes a place important and they are identified so that they can be protected and enhanced. A number of values have been identified for sportsgrounds.

Sport and organised recreation

Diversity in sporting and recreation options with the ability to provide for multiple sports in one location and for people of varying ability. Opportunity for social interaction, promoting inclusivity and community connectedness. Helps maintain a healthy lifestyle and provides opportunities for school use.

Unstructured recreation

Large open space areas for informal and unstructured leisure and recreation. Promotes informal groups to have impromptu games, e.g. children playing team games.

Landscape and access

Surrounding trees and built structures provide shade for spectators. Sportsgrounds can be connected to other leisure opportunities within the same open space area. Provide opportunities for all abilities. Access to services including toilets, changerooms, floodlights, canteens and water.

Special events

Sportsgrounds provide opportunities for special events that provide for a wider cross-section of the community to enjoy. Special events can include sports related events and recreationbased events, both providing economic benefits for the local community. Special events provide for a greater diversity in use. 1.6

Status of sportsgrounds

Council currently provide 95 sporting venues equating to 550 hectares of land. This includes 116 playing fields, 70 tennis courts, 106 netball courts and a number of smaller sports covering lawn bowl greens, croquet greens, BMX and equestrian/pony clubs. Sporting facilities support grass roots/local through to premier level participation and opportunities for sport tourism.

While the primary purpose of sportsgrounds is to provide for organised sporting activities including training and competition, they are also used for fitness training, exercise, relaxation, community and commercial events. The sporting codes that make up the bulk of organised sport are AFL, cricket, football, netball, oztag, rugby league, rugby union, tennis and touch.

Council is seeking to develop a strategic framework for the provision, management, maintenance and promotion of sporting facilities throughout the LGA, which will be known as The Lake Macquarie City Council Sports Strategy 2020-2030. The strategy will address both current and future demand, inform the ongoing provision, maintenance and upgrade of sporting infrastructure with consideration to current and future needs of the community, other adopted strategies and identify opportunities to improve sports participation, management and promotion of sporting facilities within the LGA. Council's financial capacity, and the ongoing sustainability of facility development and maintenance will be considered and is of paramount importance to ensure Councils ability to deliver on the actions identified within the strategy.

2.0 **KEY ISSUES**

Key issues have been identified through the PoM preparation process and through community and staff feedback received over recent years. They have been grouped under the following broad themes:

Role and use

- Equitable allocation for use for games and training.
- Recognition of clubs involvement in development of sportsgrounds, while still maintaining equitable access to other user groups.
- Encouraging shared and multiple use of facilities.
- Dogs exercised off leash on sportsgrounds and impacts on sports users.
- Maintaining primary use as a sporting venue.
- Unauthorised use by clubs and other groups.

Facilities and development

- Poor condition and functionality of many amenities facilities including changerooms and canteens.
- Lack of storage areas.
- Condition of playing surface.
- Over use of playing fields causing excessive wear and tear.
- Lack of drainage and irrigation at many venues.
- Growing disparity between sporting association requirements of facilities and Council's actual facilities.
- Large variation of 'local' facilities.
- Inability to use many sportsgrounds as offleash areas.
- Sporting associations develop facility guidelines that have implications for development, improvement and cost of sportsgrounds.
- Variable quality of floodlighting.

Landscape and access

- Minimal shade for spectators.
- Lack of off-street parking can impact surrounding neighbours at some venues.
- $\cdot\,$ Toilets are often locked and not open for casual use.
- Untidy appearance to temporary storage containers at some venues.

Operation and administration

- Management of noise and other impacts on neighbours.
- Clubs organising work to be undertaken at venue without discussion or approval from Council.
- No defined sportsground hierarchy to help determine appropriate service levels, and infrastructure provision.
- Volunteers adhering to Council WHS requirements and volunteer compliance.
- Some operating committees being dominated by one sporting club, as opposed to broader representation
- Staff time spent on resolving conflicts between user groups.
- Responding to climate change related impacts including increased heat waves, storm intensity, drought and inundation.

3.0 **DEVELOPMENT AND USE**

3.1

Infrastructure and facilities

Council may construct or approve construction by others a variety of facilities on this land. The purpose of any facilities provided shall be to support activities and uses that are consistent with the core objectives for this land category. Approved facilities are listed in Appendix 6 – Facilities that may be approved on community land.

Works and projects proposed by clubs and other bodies must apply to Council in writing. Approval for works on community land will be in writing by Council on every occasion. See Section A for further details. 3.2

Permitted and prohibited activities

This PoM identifies activities that are permitted without approval, activities that may be permitted with approval, and activities that are prohibited on this land.

Individuals and organisations wishing to undertake activities that require approval must obtain written Council approval before commencing that activity. Some approvals/ refusals will be straightforward. Other largescale activities, such as exhibitions, concerts, circuses, markets, car boot sales, may require submission of extensive event management plans.

These activities are listed in Appendix 7 – Permitted and prohibited activities on community land.

4.0 **MANAGEMENT**

4.1

Operating committees/ incorporated bodies

Operating committees operate under S. 355 and S. 377 of the *Local Government Act 1993*. They assist in the care, control and management of council facilities, as defined under the Lake Macquarie City Council's Operating Manual for Community and Recreation Facilities. All sportsgrounds are managed through delegation to either an operating committee or incorporated sporting club.

Tennis courts can be managed by a club or operating committee of through a lease arrangement.

4.2

Allocation of playing fields or courts

The allocation of sportsgrounds to sporting codes and then to clubs can be a vexed issue. Many sporting organisations are seeking Council commitments to provide additional fields and upgrade existing facilities.

The current allocations are largely historic in nature, having evolved from local clubs largely developing the facilities with voluntary labour and fund raising, supplemented to varying degrees with Council and grant funds. More recently, facilities in larger new urban release areas have been developed or upgraded by Council, and contributed or provided by developer contributions funds.

4.3

Management of playing fields and courts

There are a number of options available to Council for the management of sportsgrounds. The management model to be deployed will depend upon the type of the sport/s played, the nature of improvements on the facility, the number of different user organisations, and their abilities. The management model may change over time due to changing circumstances at the ground. Models include:

a) Delegation to a community operating committee

The delegation to an operating committee is appropriate where there are a number of user groups at a sportsground (e.g. football plus cricket club).

b) Delegation to an incorporated club or association

The delegation to an incorporated club or association is most appropriate where there is a single or dominant user/club (e.g. Northern NSW Football fields at Speers Point Park football fields at Speers Point Park).

c) Lease

A lease is appropriate at some sites with a single specialist user group/club, or where there is no functioning club (e.g. Pony Club ground, BMX club track, or a small tennis centre). A lease implies the lessee organisation has exclusive use of the site.

d) Direct management

Council would usually only use direct management where no other option is possible.

5.0 MANAGEMENT FRAMEWORK FOR LAND CATEGORISED AS A SPORTSGROUND

The management framework presents a range of management considerations and related actions/means of assessment, that will be pursued over the next five-10 years.

A management action table is included for each category of land and includes the following items:

Topic – the broad area or aspect of community land management around which broad strategies and actions have been grouped

Performance targets (strategies) – the means by which Council proposes to achieve the Plans key management objectives.

Means of achievement – actions intended to achieve the performance target or strategies. The management actions described can include both specific on-ground or tangible actions as well as directions more of a policy, guideline or procedural nature.

Means of assessment – outlines the means by which Council will evaluate or gauge the effectiveness of the actions in achieving their performance targets.

Priority – Provides an indication of both the relative importance and preferred timing of each action as follows:

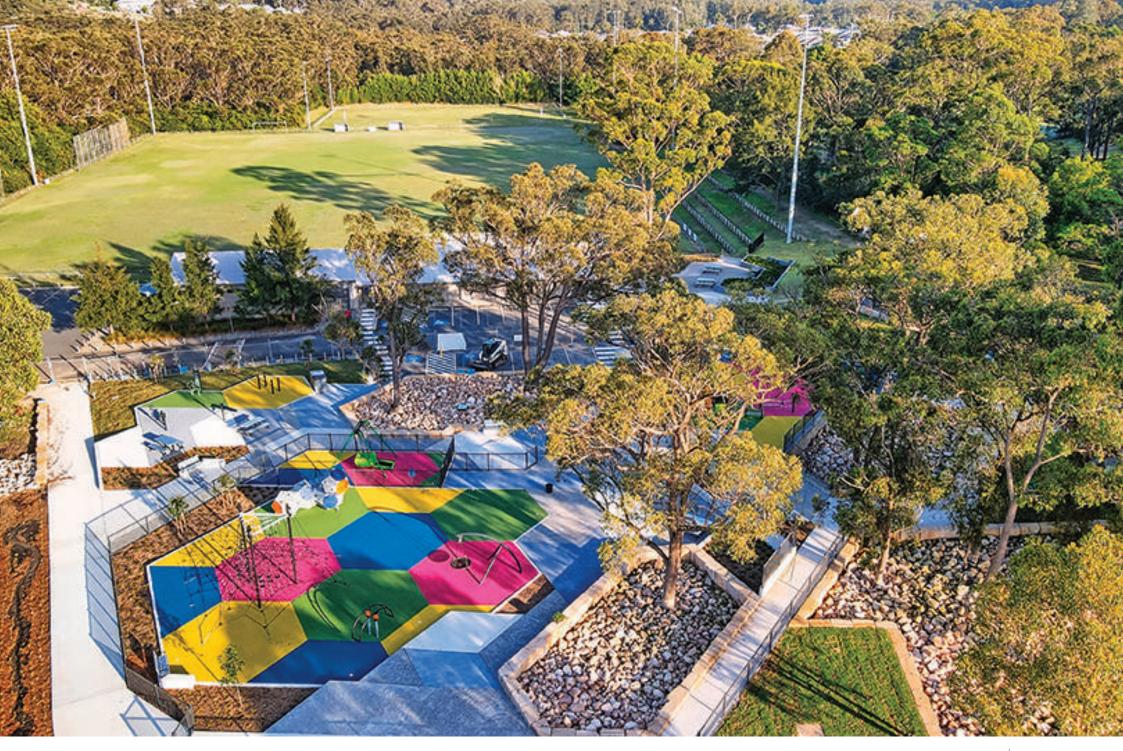

High – Essential to the achievement of the plan's management objectives, warranting funding consideration until achieved. Ideally this action will be achieved in one to three years of the plan's adoption.

Medium – Desirable to enhance the achievement of the plan's management objectives and should be undertaken within three to five years (and ideally implemented within the life of this plan)

Low – These actions are useful for the overall management of the plan and should commence within five to 10 years although completion may take longer than this timeframe.

Ongoing – The action in question will be carried out on a regular basis, or as required, for the life of this plan.

ТОРІС	OBJECTIVES / PERFORMANCE TARGETS	MEAN	S OF ACHIEVEMENT	MANNER OF ASSESSMENT	PRIORITY
RECREATIONAL USE OF SPORTSGROUNDS		S.1	Council will encourage close liaison with sporting groups wishing to undertake improvements and development work to ensure work undertaken is in accordance with Council's overall plan for the area.	A close relationship is developed between community groups and council	Ongoing
	Encourage, promote and facilitate recreational pursuits in the community involving organised and informal sporting activities and games	S.2	Volunteer Operating Committees/Clubs will consider all requests for use of sporting areas under their control.	Council receives minimal complaints from the community regarding Operating Committees decisions over use of areas under their control.	Ongoing
		S.3	Council to act as mediator to resolve user group conflicts	Resolution of conflict relating to the successful shared use of the sporting facility	Ongoing
	Implement the recommendations of the Council Sports Strategy 2020-2030 once adopted	S.4	Funding allocated in Council's 4-Year Delivery Program	Individual projects completed in a timely manner.	High
MANAGEMENT OF SPORTSGROUNDS	Ensure activities are managed having regard to any adverse impact on nearby residences	S.5	Development and upgrading of sporting facilities must consider the impacts, i.e. visual, noise, lighting and the impact of additional usage, on the neighbouring properties.	Impacts on neighbouring residents are considered in any development proposals.	Ongoing
	Ensure developments on sportsgrounds meet necessary approvals and WHS requirements	S.6	Council approval is required for any development of sporting facilities or improvements to existing facilities. The community is consulted through the appropriate approval process.	The development approval process regulates future development of facilities.	Ongoing
CONNECTIVITY AND ACCESS	Provide facilities to encourage alternative modes of transport to sportsgrounds to ease the reliance on cars	S.7	Provide end of trip facilities where appropriate including bicycle racks, water stations	Installation of end of trip facilities on various sites	Low
	Improve access to and within sportsgrounds for all abilities	S.8	Ensure all new and modified facilities incorporate access for people with disabilities.	Accessibility incorporated into site design, plans and construction drawings.	High
LANDSCAPE	Provide shade for spectators where appropriate	S.9	Identify through the sportsground hierarchy standards for the provision for shade and implement in upgraded and new sportsground site	Shade provision increased. Reduced requests for shade	Medium
	Consistent approach to signage for sportsgrounds	S.10	Use Council's Signage manual to replace signage as funding becomes available	Signage replaced in accordance with signage manual	Medium

1.0 INTRODUCTION

This section has been prepared in accordance with the *Local Government Act 1993*, to regulate the use and management of land categorised as Park. The land covered by this section is either owned by Council and classified as community land, or is Crown land Council has been appointed as Crown Land Manager. Refer to Appendix 2 for categorisation details for individual land parcels.

1.1

Categorisation of the land

This Section applies to community land categorised as park under S. 36 (4) of the *Local Government Act 1993*, and to Crown land where Council has been appointed as Crown Land Manager.

Core objectives

The core objectives for management of community land categorised as park are:

- a) to encourage, promote and facilitate recreational, cultural, social and educational pastimes and activities
- b) to provide for passive recreational activities or pastimes and for the casual playing of games
- c) to improve the land in such a way as to promote and facilitate its use to achieve the other core objectives for its management.

1.3

Regulations

The Local Government (General) Regulation 2005 provides guideline 104 for the management of the park category:

• Land should be categorised as a park under section 36(4) of the Act if the land is, or is proposed to be, improved by landscaping,

gardens or the provision of non-sporting equipment and facilities, for use mainly for passive or active recreational, social, educational and cultural pursuits that do not unduly intrude on the peaceful enjoyment of the land by others.

1.4

Purpose of parks

Parks are an integral part of Council's open space network. They provide opportunities for families, friends, larger groups and the general community to come together for recreation, relaxation and the celebration of special events. They help build social capital and a sense of place and assist in improving the health and wellbeing of the community.

1.5

Value of parks

Council has adopted a values-based approach to preparing and reviewing PoMs for community land. Values are what makes a place important and they are identified so that they can be

84

protected and enhanced. A number of values have been identified for parks, they are:

Scenic

- Parks provide green spaces/green relief in an urban environment
- Trees and landscape gardens provide shade and visual amenity and assist in reducing urban heat
- Many parks have visual amenity to the lake foreshore

Recreation

- Provision of open space and grassed areas for social interaction, picnics, playground visits, relaxation and exercise
- Pathways within parks provide opportunities to walk, cycle, jog and access to surrounding areas
- Many parks provide direct access to the lake foreshore providing increased aquatic recreation opportunities

Accessibility

- Parks provide connections within and to surrounding areas
- Can provide all ability access with accessible facilities
- $\cdot\,$ Access to services including toilets and water

Community use and special events

- Provide access to a local green space
- Opportunity for occasional markets and smaller scale community events
- Some parks provide for larger community events including Carols by Candlelight

1.6

Status of parks

Lake Macquarie City is home to approximately 158 parks equating to 274 hectares of land. This includes large open spaces like Speers Point Park to small pocket parks like St Johns Memorial Park at Tingira Heights.

Council is seeking to develop a strategic framework for the provision, management, maintenance and promotion of parks, playgrounds and public amenities throughout the LGA, which will be known as The Lake Macquarie City Council Parks and Play Strategy 2020-2030. The strategy will address both current and future demand, inform the ongoing provision, maintenance and upgrade of parks, playgrounds and public amenities with consideration to current and future needs of the community, other adopted strategies and identify opportunities to improve access, management and promotion of these facilities within the LGA. Council's financial capacity, and the ongoing sustainability of facility development and maintenance will be considered and is of paramount importance to ensure Councils ability to deliver on the actions identified within the strategy.

2.0 **KEY ISSUES**

Key issues have been identified through the PoM preparation process and through community and staff feedback received over recent years. They have been grouped under the following broad themes:

Role and use

- Park distribution ensuring the community have access to a local park at a minimum
- Lack of fenced off-leash areas
- Not enough BBQ facilities in parks

Facilities and development

- Large variation of 'local' facilities.
- Shade provision, particularly for playground areas
- Lack of fencing around playgrounds
- Lack of consistency in playground size and opportunities
- Access to water bubbler and bottle filling stations
- Park furniture lacking in some locations

Landscape and access

- Lack of trees for natural shade in high use areas, like playgrounds
- Lack of off-street parking can impact surrounding neighbours at some venues.
- No consistency in all ability access throughout a specific location, e.g. pathways do not link to facilities or playground areas only consistent of mulch softfall
- Toilet cleanliness and availability
- Linkages to surrounding areas like sportsgrounds and natural areas

Operation and administration

- Management of noise and other impacts on neighbours
- No ability to book parks online or check availability
- Use of parks for placemaking activities
- Regulation of unauthorised users of parks
- Responding to climate change related impacts including increased heat waves, storm intensity, drought and inundation.

3.0 DEVELOPMENT AND USE

3.1

Infrastructure and facilities

Council may construct or approve construction by others a variety of facilities on this land. The purpose of any facilities provided shall be to support activities and uses that are consistent with the core objectives for this land category. Approved facilities are listed in Appendix 6 – Facilities that may be approved on community land.

Works and projects proposed by clubs and other bodies must apply to Council in writing. Approval for works on community land will be in writing by Council on every occasion. See Section A for further details.

3.2

Permitted and prohibited activities

This PoM identifies activities that are permitted without approval, activities that may be permitted with approval, and activities that are prohibited on this land.

Individuals and organisations wishing to undertake activities that require approval must obtain written Council approval before commencing that activity. Some approvals/ refusals will be straightforward. Other largescale activities, such as exhibitions, concerts, circuses, markets, car boot sales, may require submission of extensive event management plans.

These activities are listed in Appendix 7 – Permitted and prohibited activities on community land.

4.0 **MANAGEMENT**

4.1

Operating committees/ incorporated bodies

Operating Committees or an incorporated community group may be appointed to manage some Council Parks. These entities will be authorized to manage park areas in accordance with S. 355 and S. 377 of the *Local Government Act 1993*.

4.2

Fees and charges/conditions of hire

Any park area maybe booked by organisations or community groups for their annual picnic days or Christmas parties, wedding ceremonies, social family functions, festivals, events, or commercial activities. Council officers will assess the suitability of the area for the suggested activity. Hiring fees and bonds are set out in Council Fees & Charges Schedule, which is updated annually.

5.0 MANAGEMENT FRAMEWORK FOR LAND CATEGORISED AS PARK

The management framework presents a range of management considerations and related actions/means of assessment, that will be pursued over the next five-10 years.

A management action table is included for each category of land and includes the following items:

Topic – the broad area or aspect of community land management around which broad strategies and actions have been grouped

Performance targets (strategies) – the means by which Council proposes to achieve the Plans key management objectives.

Means of achievement – actions intended to achieve the performance target or strategies. The management actions described can include both specific on-ground or tangible actions as well as directions more of a policy, guideline or procedural nature.

Means of assessment – outlines the means by which Council will evaluate or gauge the effectiveness of the actions in achieving their performance targets.

Priority – Provides an indication of both the relative importance and preferred timing of each action as follows:

High – Essential to the achievement of the plan's management objectives, warranting funding consideration until achieved. Ideally this action will be achieved in one to three years of the plan's adoption.

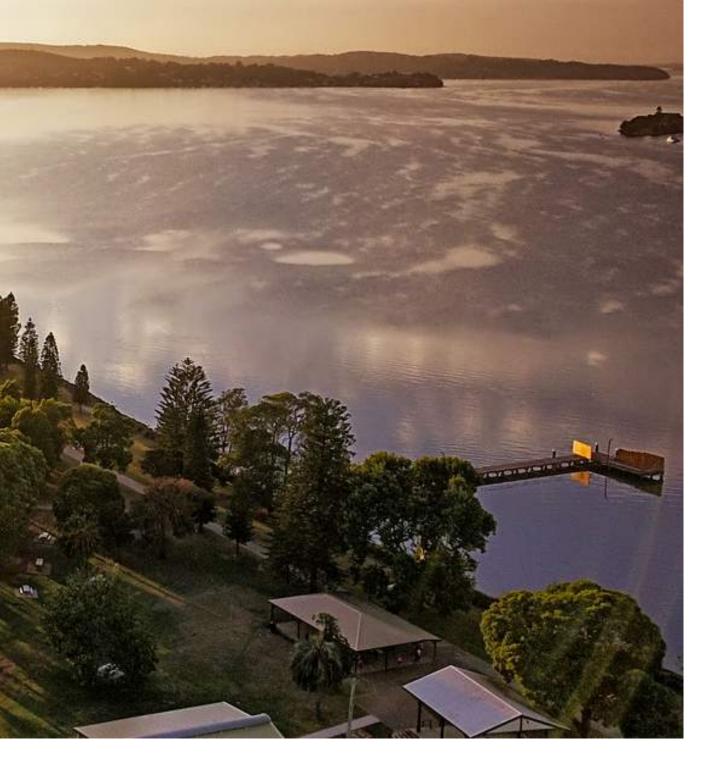

Medium – Desirable to enhance the achievement of the plan's management objectives and should be undertaken within three to five years (and ideally implemented within the life of this plan)

Low – These actions are useful for the overall management of the plan and should commence within five to 10 years although completion may take longer than this timeframe.

Ongoing – The action in question will be carried out on a regular basis, or as required, for the life of this plan.

ТОРІС	OBJECTIVES / PERFORMANCE TARGETS	MEAN	S OF ACHIEVEMENT	MANNER OF ASSESSMENT	PRIORITY
RECREATIONAL USE OF PARKS	Review park hierarchy to provide guidance on provision/upgrade of infrastructure and level of use	P.1	Revise the park hierarchy through the development of the Parks and Play Strategy and identify all parks within that hierarchy	Park hierarchy finalised and guiding future development	High
	Provide playgrounds to meet the changing needs of the community	P.2	Complete the Parks and Playground Strategy to guide the provision and embellishment of playgrounds	Program established and funding identified	Medium
	Implement the recommendations of the Council Parks and Play Strategy 2020-2030 once adopted	P.3	Funding allocated in Council's 4-Year Delivery Program	Individual projects completed in a timely manner.	High
	Provide off leash areas for dogs	P.4	Review of the provision of dog off leash areas in the LGA	Review complete and actions being implemented	High
CONNECTIVITY AND ACCESS	Identify parks to improve with greater recreational opportunities	P.5	Investigate opportunities through the development of the Parks and Play Strategy and the Active Recreation Strategy	Increase level of use and user satisfaction with redeveloped area and new facilities.	Medium
	Improve the inclusivity of parks and playgrounds	P.6	Use the Everyone Can Play Guidelines when upgrading and developing new parks and playgrounds	Higher levels of use by the community including those with disabilities Council receives unsolicited positive feedback from the community.	Ongoing
	Provide facilities to encourage alternative modes of transport to parks to ease the reliance on cars	P.7	Provide end of trip facilities where appropriate including bicycle racks, water stations	Installation of end of trip facilities on various sites	Low
	Improve access to and within parks for all abilities	P.8	Ensure all new and modified facilities incorporate access for people with disabilities.	Accessibility incorporated into site design, plans and construction drawings.	High
LANDSCAPE	Provide shade for park users where appropriate	P.9	Identify through the hierarchy the provision for shade and implement in upgraded and new park sites	Shade provision increased. Reduced requests for shade	Ongoing
	Increase the tree canopy in parks to reduce urban heat where this does not impact the use and future development of the park	P.10	Guidance from current work being undertaken by Council on the reduction of urban heat	Trees planted achieving reduction in urban heat without affecting the functionality of the park	Medium
	Consistent approach to signage for parks	P.11	Use Council's Signage manual to replace signage as funding becomes available	Signage replaced in accordance with signage manual	Medium
MANAGEMENT	Manage the number of major events in parks to ensure general community access is a priority	P.12	Review parks that will be available for major events and identify levels of use	List of parks identified and criteria for use	Medium

BERN REA

1.0 INTRODUCTION

This section has been prepared in accordance with the *Local Government Act 1993*, to regulate the use and management of land categorised for general community use (GCU). The land covered by this PoM is either owned by Council and classified as community land, or is crown reserves over which Council is trust manager and the public are permitted entry. Refer to Appendix 2 for categorisation details for individual land parcels.

Council's current PoM for leased/licensed areas of community land also applies to certain parcels or part parcels of land categorised as a GCU area. This PoM will replace that PoM.

1.1

Categorisation of the land

This section applies to community land categorised as a GCU area under S. 36 (4) of the *Local Government Act 1993*, and to Crown land where Council has been appointed as Crown Land Manager.

Core objectives

The core objectives for land categorised for GCU are set out in S. 36I of the LG Act, as follows:

The core objectives for management of community land categorised as GCU are to promote, encourage and provide for the use of the land, and to provide facilities on the land, to meet the current and future needs of the local community and of the wider public:

- (a) In relation to public recreation and the physical, cultural, social and intellectual welfare or development of individual members of the public
- (b) In relation to purposes for which a lease, licence or other estate may be granted in respect of the land (other than the provision of public utilities and works associated with or ancillary to public utilities).

1.3

Regulations

The Local Government (General) Regulation 2005 provides guideline 106 for the management of the general community use category:

• Land should be categorised as general community use under section 36(4) of the Act if the land:

(a) may be made available for use for any purpose for which community land may be used, whether by the public at large or by specific sections of the public

(b) is not required to be categorised as a natural area under section 36A, 36B or 36C of the Act and does not satisfy the guidelines under clauses 102–105 for categorisation as a natural area, a sportsground, a park or an area of cultural significance.

Purpose of general community use areas

GCU areas provide opportunities for people to access recreation, sporting and various community facilities and services within their neighbourhood, on land parcels or part parcels that for various reasons are not suitable for categorisation as another category.

1.5

Status of general community use areas

Areas categorised as GCU contain community and recreation facilities that may or may not be managed by a lease or licence. Typical facilities could include:

- Senior citizens centre
- Child care centre, kindergarten, preschool
- Caravan park
- Community hall
- \cdot Youth centre
- Community centre, neighbourhood centre
- Bowling club
- Swimming centres

- Girl Guides hall or Scout hall
- Sailing, canoe or rowing club house
- Equestrian club ground
- Kiosk
- Recreation or sporting complex
- Drainage reserves
- Detention basins
- Transmission line easements
- Telecommunication towers

1.6

Value of general community use areas

Council has adopted a values-based approach to preparing and reviewing PoMs for community land. Values are what makes a place important and they are identified so that they can be protected and enhanced. A number of values have been identified for GCU areas, they are:

Recreation

- Facilities for community use and enjoyment
- A place that people can enjoy activities together and share experiences
- Multi-purpose facilities that appeal to a variety of community members

Accessibility

- Connections within and to surrounding areas
- Can provide all ability access with accessible facilities
- Access to services including toilets

Community use

- Local community access
- Provision of community services
- Volunteers that contribute time and skills in the management of community facilities
- A place to belong

Functional purposes

- Areas that perform drainage functions for the surrounding built environment
- Used for provision of services including electrical and telecommunications

2.0 **KEY ISSUES**

Key issues have been identified through the PoM preparation process and through community and staff feedback received over recent years. They have been grouped under the following broad themes:

Role and use

- Types of events in halls and monitoring these
- Ensuring equitable access to facilities

Facilities and development

- Responsibility for repair and improvement works
- Age of some facilities, e.g. swimming centres, and the cost to repair and improve these
- Low level of development at some green space sites

Operation and administration

- Management of noise and other impacts on neighbours
- Contract management of leased facilities
- Reduction in volunteers to manage community facilities
- Responding to climate change related impacts including increased heat waves, storm intensity, drought and inundation.

3.0 **DEVELOPMENT AND USE**

3.1

Infrastructure and facilities

Council may construct or approve construction by others a variety of facilities on this land. The purpose of any facilities provided shall be to support activities and uses that are consistent with the core objectives for this land category. Approved facilities are listed in Appendix 6 – Facilities that may be approved on community land.

Works and projects proposed by clubs and other bodies must apply to Council in writing. Approval for works on community land will be in writing by Council on every occasion. See Section A for further details.

Permitted and prohibited activities

This PoM identifies activities that are permitted without approval, activities that may be permitted with approval, and activities that are prohibited on this land.

Individuals and organisations wishing to undertake activities that require approval must obtain written Council approval before commencing that activity. Some approvals/ refusals will be straightforward. Other largescale activities, such as exhibitions, concerts, circuses, markets, car boot sales, may require submission of extensive event management plans.

These activities are listed in Appendix 7 – Permitted and prohibited activities on community land.

4.0 MANAGEMENT

4.1

Volunteer management

Operating committees or an incorporated body may be appointed to manage facilities on GCU land. These entities will be authorised to manage GCU areas in accordance with S. 355 and S. 377 of the *Local Government Act 1993*.

4.2

Fees and charges/conditions of hire

Many Council buildings may be booked for activities, identified in this section as permissible. Applications must be made through Council's booking system or an operating committee. Most bookings incur a hiring fee, and in some cases, a bond. Hiring fees are set out in Council's Fees & Charges Schedule, which is updated annually.

5.0 MANAGEMENT FRAMEWORK FOR LAND CATEGORISED AS GENERAL COMMUNITY USE

The management framework presents a range of management considerations and related actions/means of assessment, that will be pursued over the next five-10 years.

A management action table is included for each category of land and includes the following items:

Topic – the broad area or aspect of community land management around which broad strategies and actions have been grouped

Performance targets (strategies) – the means by which Council proposes to achieve the Plans key management objectives.

Means of achievement – actions intended to achieve the performance target or strategies. The management actions described can include both specific on-ground or tangible actions as well as directions more of a policy, guideline or procedural nature.

Means of assessment – outlines the means by which Council will evaluate or gauge the effectiveness of the actions in achieving their performance targets.

Priority – Provides an indication of both the relative importance and preferred timing of each action as follows:

High – Essential to the achievement of the plan's management objectives, warranting funding consideration until achieved. Ideally this action will be achieved in one to three years of the plan's adoption.

Medium – Desirable to enhance the achievement of the plan's management objectives and should be undertaken within three to five years (and ideally implemented within the life of this plan)

Low – These actions are useful for the overall management of the plan and should commence within five to 10 years although completion may take longer than this timeframe.

Ongoing – The action in question will be carried out on a regular basis, or as required, for the life of this plan.

ΤΟΡΙϹ	OBJECTIVES / PERFORMANCE TARGETS	MEANS	OF ACHIEVEMENT	MANNER OF ASSESSMENT	PRIORITY
PROVIDE FACILITIES TO MEET	Provision of community facilities to meet the changing needs of the community	GCU.1	Refer to relevant strategies to guide the provision and embellishment of community facilities	Community needs being met, recommendations implemented	Medium
COMMUNITY	Improve swimming centres to meet the changing needs of the community	GCU.2	Aquatic Facilities Strategy reviewed and updated	Strategy complete and recommendations being implemented	High
	Investigate opportunities for dog off leash area	GCU.3	Review of the provision of dog off leash areas in the LGA	Review complete and actions being implemented	High
CONNECTIVITY AND ACCESS	Provide facilities to encourage alternative modes of transport to community facilities and swimming centres to ease the reliance on cars	GCU.4	Provide end of trip facilities where appropriate including bicycle racks, water stations	Installation of end of trip facilities on various sites	Low
	Improve access to and within GCU areas for all abilities	GCU.5	Ensure all new and modified facilities incorporate access for people with disabilities.	Accessibility incorporated into site design, plans and construction drawings.	High
MANAGEMENT	Provide clear delineation of responsibilities and improvement works in leased facilities	GCU.6	Review leases to ensure consistency and transparency in responsibility for maintenance, repairs and improvement	Reduced requests for Council maintenance on items that are the lessee responsibility	Medium
	Create a clear assessment process for applications for telecommunication towers	GCU.7	Undertake a review of assessment of telecommunication towers and land suitable for this use	Improved efficiencies in assessment of applications	Medium
	In relation to purposes for which a lease, licence or other estate may be granted in respect of the land (other than the provision of public utilities and works associated with or ancillary to public utilities).	GCU.8	New leases/licences to be entered into for purposes authorised by this PoM and subject to appropriate Council approval.	Lease/licence agreements receive appropriate Council approval.	Ongoing

APPENDIX 1 SPECIFIC PLANS OF MANAGEMENT

The following provides a list of specific PoMs that Council has previously developed. The community land and Crown land parcels included in these specific PoMs are not covered by this plan. The maps at Appendix 13 identify the locations of specific PoMs to provide a holistic view of all the community land CLM Crown Land and devolved Crown land that Council manages

- Green Point Foreshore Reserve Plan of Management (1997)
- Belmont Lagoon Plan of Management (2001)
- Rathmines Park Plan of Management and Masterplan (2020)
- Coastline Plan of Management (Swansea Heads only)
- North Wallarah Peninsula Reserve & Habitat Corridor PoM (2006)
- Mawson's Lookout PoM (2008)
- Speers Point Park & Surrounds Plan of Management (2008)
- Trinity Point Plan of Management (2016)
- Warners Bay Foreshore PoM and Masterplan (2008)
- Wyee Point Plan of Management (2010)
- Fencott Drive Wetland Reserve PoM 2013
- Ryhope Environmental Conservation Area PoM 2016

APPENDIX 2 LAND SCHEDULE

All land parcels to which this Plan applies are listed by suburb location in the table in Appendix 2. The following codes and abbreviations apply to Land Schedule:

COLUMN HEADING	DESCRIPTION
Reserve/park name	Park or reserve name (common, adopted or gazetted)
No.	Number in street
Street	Name of street
Suburb	Name of suburb
Lot	Lot
Sec	Section
DP	Deposited plan
Land owner	
Council	Lake Macquarie City Council
Crown	Crown reserve – Council appointed Crown Land Manager
Crown reserve no.	The reserve number as gazetted
Crown gazette date	Date of the Crown reserve gazettal
Crown reserve purpose	The purpose for which the land was reserved
Comm. Land category	Community land category
Р	Park
Ν	Natural area
S	Sportsground
G	General community use
Natural area category	Natural area sub-category
b	Bushland
е	Escarpment
we	Wetland
wa	Watercourse
f	Foreshore

ACTIVITIES - PERMITTED WITH COUNCIL APPROVAL	NB	NWE	NE	NWA	NF	S	Р	G
Motorhomes and caravans - overnight stays in authorised areas (self-contained units only)					\oslash	\oslash	\oslash	\oslash
Nature based commercial/organised activities (eg adventure races, cross country runs, etc)	\oslash	\oslash		\oslash	\oslash	\oslash	\oslash	\oslash
Water based commercial/organised activities (eg, canoeing, kayaking, stand up paddle boarding)	\oslash	\oslash		\oslash	\oslash	\oslash	\oslash	\oslash
Orienteering and rogaining events	\oslash			\bigcirc	\oslash	\oslash	\oslash	\oslash
Private group activities on a booked site (e.g. family reunion, parties)					\oslash	\oslash	\oslash	\oslash
Professional fireworks displays (subject to D.L.I. & Dangerous Goods permits)					\oslash	\oslash	\oslash	\oslash
Registered vehicles, under supervision of officials in association with sporting or special events	\oslash				\oslash	\oslash	\oslash	\oslash
Research/study/education,	\oslash	\oslash	\oslash	\oslash	\oslash	\oslash	\oslash	\oslash
Skate/rollerblade competitions						\oslash	\oslash	\oslash
Special events (e.g. concerts, galas, rodeos, club musters, markets)					\oslash	\oslash	\oslash	\oslash
Telecommunication towers (excludes Crown land)						\oslash	\oslash	\oslash

Enquiries regarding activities on community land should be directed initially to Council's Customer Service Centre – ph 4921 0333

NOTE:- COUNCIL DOES NOT FAVOUR REMOVAL OF NATIVE VEGETATION OR FAUNA HABITAT WITHIN ANY LAND CATEGORISED AS 'NATURAL AREA' IN ORDER TO CONDUCT ANY OF THE ACTIVITIES ABOVE.

APPENDIX 7 **PERMITTED AND PROHIBITED ACTIVITIES ON COMMUNITY LAND** (continued...)

TABLE 3 – ACTIVITIES THAT ARE PROHIBITED

Codes:

Nb (bushland), Nwe (wetland), Ne (escarpment), Nwa (watercourse), Nf (foreshore), S (sportsground), P (park), G (general community use)

ACTIVITIES - PROHIBITED	NB	NWE	NE	NWA	NF	S	Р	G
Amateur fireworks displays	\oslash							
Any activity that may be considered by an authorised Council officer to be dangerous to other users, or that would compromise the core objectives for the land category.	\oslash							
Any activity undertaken contrary to a notice on the land	\oslash							
Asset protection zone and fire trail creation for any proposed development on adjoining non-Council owned land	\oslash							
Fires, unless specifically approved by Council	\oslash							
Golf and practice golf (outside of an authorised golf course or approved practice driving range)	\oslash	\odot						
Helicopter landings not authorised in Table 2	\oslash	\oslash	\oslash	\oslash	\odot	\oslash	\oslash	\odot
Placing fill on the land, unless specifically approved by Council (usually will require development consent)	\oslash							
Removing bush rocks, fallen timber or native plant or animal species from the land (unless with written consent)	\oslash							
Sale of motor vehicles	\oslash							
Trail, trike or quad bike, or unregistered vehicle use on the land	\oslash	\oslash	\oslash	\oslash	\odot	\oslash	\oslash	\odot
Unauthorised creation of tracks and trails (eg for bike riding, walking)	\oslash							
Unauthorised drainage, earthworks or other work	\odot	\oslash						
Unauthorised encroachments (eg private fences, vehicles, storage, play equipment, gardens etc)	\odot	\oslash	\oslash	\oslash	\odot	\oslash	\oslash	\odot

Enquiries regarding activities on community land should be directed initially to Council's Customer Service Centre – ph 4921 0333.

APPENDIX 8 DOG EXERCISE AREAS IN LAKE MACQUARIE LGA – 2023

Council has allocated a number of parks and reserves in the LM LGA that can be used to exercise dogs off the leash.

Signs at each site identify the section of each park or reserve that can be used, and whether time restrictions apply. At the time of preparation of this PoM, the current leash-free sites are:

SUBURB	LOCATION	AVAILABLE TIMES
Barnsley	Taylor Park (part)	All times except during organised sport and training
Belmont North	Lenaghan Oval (part)	All times except during organised sport and training
Blackalls Park	Blackalls Park reserve	All times
Blacksmiths	Dobinson Reserve	All times
Blacksmiths	Nine Mile Beach (part)	All times
Bolton Point	Reserve off Bay & Quigley Roads	All times
Bonnells Bay	Pendlebury Park	All times
Booragul	Foreshore Reserve (part)	All times
Buttaba	Foreshore Reserve (part)	All times
Cardiff	No 3 Oval	All times except during organised sport and training
Caves Beach	Hams Beach (part)	All times
Charlestown	Reserve off Dudley Road & Bula Street	All times except when netball in progress
Coal Point	Gurranba Reserve	All times
Croudace Bay	T.H. Halton Park (part)	Sunrise to 10am daily & 4:30 pm to sunset Mon to Fri excluding public holidays
Croudace Bay	Croudace Bay Dog Park	All times
Dora Creek	Douglass Street, small oval	All times except during organised sport and training
Gateshead	Goundry St Oval	All times except during organised sport and training

SUBURB	LOCATION	AVAILABLE TIMES
Marks Point	Docker Street Reserve	All times
Morisset	Gibson Oval	All times except during events
Rathmines	Rathmines Park (part)	All times except when in use for events
Redhead	Redhead Beach (part)	All times
Redhead	Molly O'Connor Park	All times
Speers Point	Speers Point Dog Park	All times
Swansea	Thomas Humphries Park	All times except during events
Toronto	Lions Park	All times except when in use for events
Toronto	Hampton Street Reserve	All times except during events
Valentine	Ruston Avenue Reserve	All times
West Wallsend	Gregory Park	All times except during organised sport and training
Windale	Bahloo Reserve	All times except during organised sport and training
Wyee	Wyee Oval	All times except during organised sport and training

Council will review the Dogs in Open Space Strategy and Dogs in Open Space Policy Policy from time to time, which may lead to deletions from, or additions to this list, or to the allowable times. Refer to the Council's website for the most current list of dog exercise areas in Lake Macquarie City. The current Dogs in Open Space Strategy and Dogs in Open Space Policy are available on Council's website, lakemac.com.au.

These tables are correct at the time of adoption, however, this list will be updated during the life of this plan. For the most current list of local and state listed Heritage Items please refer to Heritage NSW website.

STATE LISTED HERITAGE ITEMS

SUBURB	ITEM NAME	ADDRESS	PROPERTY DESCRIPTION	SIGNIFICANCE	ITEM NO	COMMENTS
Catherine Hill Bay	Catherine Hill Bay Cultural Precinct	6 Northwood Rd 8 Northwood Rd 85 Flowers Drive	Lot 2 DP 382429 Lot 7079 DP 1029250 Lot 1117 DP 1219395	State	SHR 01828	Master Plan being prepared

APPENDIX 10 ABORIGINAL CULTURAL HERITAGE ASSESSMENT PROCESS CHECKLIST

This checklist provides a summary of key elements of the Aboriginal Cultural Heritage assessment process. Any person using this document must do so on the basis that, not every scenario and issue can be addressed, and discussion with Council should be undertaken. This document is subject to change without notice.

		YES		NO
1.	Does the proposal include ground disturbance, excavation and/or native vegetation removal?	Go to 2		End here
2.	Is the subject site within 200m of an AHIMS site?	Go to 2a		
a.	Will the known AHIMS site/item be impacted1?	Go to 2b		
b.	Has the application been nominated as Integrated Development? [IDA with Heritage NSW under the National Parks Act?]	ACHA Report required to refer to Heritage NSW. Go to 2c		
c.	Has an ACHA Report been provided	If IDA: Referral to Heritage NSW for GTAs*	If NOT IDA: End here – Condition(s) to be applied	ACHA report to be provided
	*Once Ge TAs are received – conditions apply accordingly			
3.	Is the subject site is affected by the Sensitive Aboriginal Cultural Landscape (SACL) mapping layer under LM LEP 2014?	Go to 4		End here
4.	Is th e subject site within 50m from the DP High Water mark?	Go to 6		Go to 5
5.	Is DCP Excluded Development Criteria table applicable?	End here – Condition(s) to be applied		Due Diligence Report required. Go to 7
6.	Has the site been previously significantly disturbed ² within the proposed footprint?	End here – Condition(s) to be applied		Due Diligence Report required. Go to 7
7.	Has a Due Diligence Report been provided?	Go to 7a		Due Diligence report to be provided
a.	Is a Cultural Significance Statement included in the report?	Go to 7b		Due Diligence report to be updated to include Cultural significance (consultation required)
b.	Have local Groups been consulted with (and evidence provided)?	End here – Condition(s) to	be applied	Referral to Groups for 28 days for comment
c.	Have comments been received from the local groups?	Go to 7d		End here – Condition(s) to be applied
		End here – Condition(s) to be applied		Comments to be addressed
d.	Can comments/concerns be addressed by additional conditions?			Once addressed – Condition(s) to be applied

APPENDIX 10 **ABORIGINAL CULTURAL HERITAGE ASSESSMENT PROCESS CHECKLIST** (continued...)

Glossary

AHIMS – Aboriginal Heritage Information Management System

ACHA – Aboriginal Cultural Heritage Assessment Report

DD – Due Diligence Report

DCP Excluded Development Criteria table – Refer to the Development Control Plan, Part 2 to 9, 2.15 or 2.16 – Aboriginal Heritage, Table 4 or 5

DP High Water Mark - The position of the highwater mark as shown on the deposited plan.

GTAs – General terms of approval

IDA – Integrated development application (*National Parks Act*)

LM LEP 2014 – Lake Macquarie Local Environmental Plan 2014

Notes:

When no impact to AHIMS site is stated, it needs to be substantiated. An extensive search of the AHIMS can be undertaken to obtain additional information, such as coordinates and type of sites.

Substantially disturbed refers to earthworks which required removal of top-soil, slab-onground construction, terracing/retaining, etc. E.g. Buildings on piers do not constitute the same level of disturbance as new slab-onground construction. Previous disturbance should be substantiated.

APPENDIX 12 ABBREVIATIONS AND GLOSSARY

ABBREVIATION	DETAILS
Aeolian	Wind-borne
Aesthetic	Appreciation of the beautiful
Algae	Simple aquatic plants, often microscopic
Algal Blooms	Rapid growth of algae in surface waters often due to increases in temperature and nutrients such as nitrogen and phosphorus
Amenity	Cumulative aspects that define the character of an area
Approval	Approval from the relevant Council Officer through delegated authority of Council
APZ	Asset protection zones
Arboreal	Living in trees
Asset Protection Zone	A fire protection zone between a bush fire hazard and physical assets – refer NSW Rural Fire Service
Biodiversity	The variety of all life forms, comprising genetic diversity (within species), species diversity and ecosystem diversity
Catchment	The area of land from which water, stormwater or sewage drains into a specific water body (Lake, stream, lagoon, etc.)
ch., Ch.	Chapter
City	Lake Macquarie local government area
CLM	Crown Land Manager
Community Land	Land retained for public use such as a public park
CLM Act	Crown Land Management Act 2016
Degradation	Any decline in the quality of natural resources – commonly resulting from human activities
DCP	Development control plan
Development Control Plan (DCP)	A plan prepared by a local council to provide more detailed development controls and guidelines to accompany a local environmental plan
DLI	Department of Labour and Industry
DPIE	Department of Planning, Industry and Environment

ABBREVIATION	DETAILS
Ecologically Sustainable Development (ESD)	Development that improves the total quality of life, both now and in the future, in a way that maintains the ecological processes on which life depends
Ecosystem	A community composed of plants and animals which, together with its physical environment, functions as a unit
Edaphic	Influenced by conditions of soil or substratum
Edge Effect	Tendency to have greater variety & density of organisms in the boundary zone between communities
EIS	Environmental impact statement
Emissions	Gaseous or liquid discharge, or noise, given out by a source
Endangered Species	Those likely to become extinct unless action is taken to remove the factors that threaten their survival
Environmentally Sensitive Area	Land that is subject to an environmental constraint or land that is valued because it supports an important ecosystem
EPA	Environmental Protection Agency
EP&A Act	<i>Environmental Planning Act -</i> NSW Act that governs landuse development & work
ESCP	Erosion & Sediment Control Plan
Estuary	Tidal water bodies located behind beach foredunes
Exotic Species	An introduced species
Fauna	The animals peculiar to a country, area, specified environment or period
Feral Animal	A wild exotic animal, usually a domesticated animal which has become wild
Flora	The plants peculiar to a country, area, specified environment or period
Formal Recreation	Recreation that has an organised format
Fragmentation (habitat/ ecosystem)	The division of natural areas by vegetation clearance for human land use, isolating the remnants and the species within them and limiting genetic flow

APPENDIX 12 ABBREVIATIONS AND GLOSSARY

ABBREVIATION	DETAILS	ABBREVI	
Genus	Taxonomic category of animals or plants with common structural characteristics	Means of Achieven	
Groundwater	Refers to all water which occurs within the hydrologic cycle below the land surface	Microclin	
Habitat	The places in which an organism lives and grows. Many marine and estuarine organisms require different habitat at different stages of their lives	Minimum Area	
Heritage	Those places, objects and indigenous languages that have aesthetic, historical, scientific or social significance or other special values for future generations as well as for the community today.	Minimum Populatio	
in absentia	In absence [Latin]	Monitorir	
Indigenous Species	A species forming part of the natural biological diversity of a place	NPWS	
Informal Recreation	Recreation that has no organised format	Nutrients	
Issues	The opportunities & problems of the day	Objective	
Land Degradation	Refers to the decline of the condition or quality of land as a consequence of misuse or overuse		
LM LGA	Lake Macquarie local government area	Operatioı (OL)	
LG Act	Local Government Act 1993 (as amended)	· ·	
LG Regs	Local Government (General) Regulation 2005	Performa	
LM	Lake Macquarie	targets PoM	
Council	Lake Macquarie City Council	FOIM	
Local	A plan formulated by local government relating to the local government area; it is preceded by an environmental study	Propagul	
Environmental Plan (LEP)	and it sets out the land use allowed by zones; it must be consistent with any relevant regional environmental plans (REP) and State Environmental Planning Policies (SEPPs)		
Manner of Assessment	Manner in which Council proposes to assess its performance	Rec	

	ABBREVIATION	DETAILS
	Means of Achievement	Action (under LG Act) to implement performance targets
ycle	Microclimate	The climate within a very small area or in a particular habitat
at at	Minimum Viable Area	Native vegetation is self-regulating & relatively free from disturbance (except for the edge)
ave other	Minimum Viable Population	The size of the smallest isolated population, for any given species in any given habitat, which is required for the species to survive the foreseeable effects of demographic, environmental & genetic stochasticity (events), & natural catastrophes
	Monitoring	Ongoing survey of environmental conditions
y of	NPWS	NSW National Parks & Wildlife Service
	Nutrients	Compound required for growth. Nitrogen and phosphorus are the most common nutrients required by plants
26.2	Objective	Statement of direction (that is specific, measurable & achievable)
as a	Operational Land (OL)	Land held as a temporary asset or as an investment, land which facilitates the carrying out by a council of its functions or land which may not be open to the general public, such as a works depot or a council garage
	Performance targets	Strategies (under LG Act) that organise a response to values
	РоМ	Plan of Management
ocal udy	Propagules	Any spore, seed, fruit or other part of a plant or microorganism capable of producing a new plant & used as a means of dispersal
e ans	Public Land	Is any land (including public reserves) vested in or under the control of the council
/	Rec	Recreation

APPENDIX 12 ABBREVIATIONS AND GLOSSARY

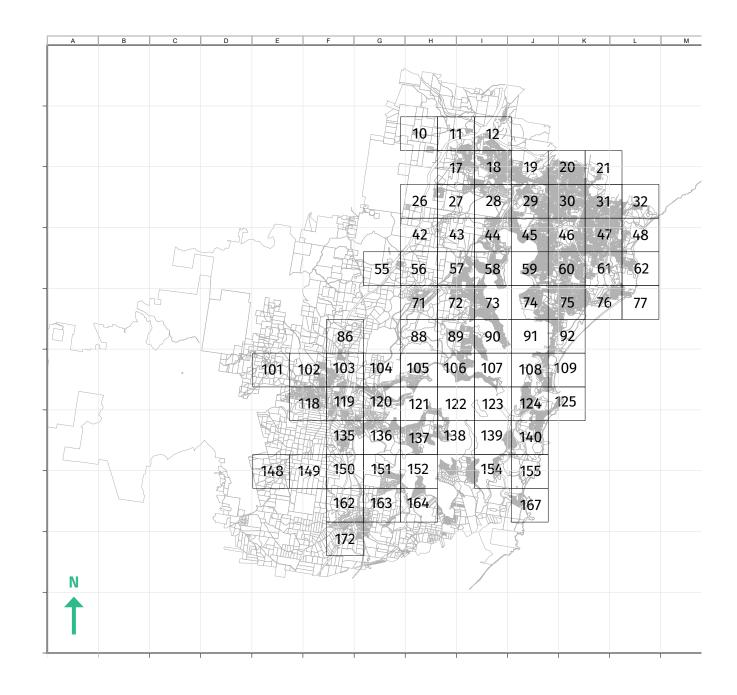

ABBREVIATION	DETAILS	Α
Recovery Plan	Is a recovery plan under Part 4 of the Threatened Species Conservation Act 1995 or under Division 5 of Part 7A of the Fisheries Management Act 1994	U
Remnant Bushland	A small fragmented or isolated portion of bushland vegetation, which once covered a larger area before undergoing clearing disturbance (e.g. human land use)	U
Res	Reserve	Vä
Riparian	Frequenting, growing on, or living on the banks of streams or rivers	W
S.	Section	
SEPP	State Environmental Planning Policy	W
SIS	Species Impact Study	
SOE	State of the Environment Report	
Species	Generally regarded as a group of organisms that resemble each other to a greater degree than members of other groups and that form a reproductively isolated group that will not normally breed with members of another group	W Co
Stormwater	Rainwater which runs off urban and agricultural catchments, often carrying rubbish, animal droppings, sewage overflows, grass clippings and heavy metals from car exhausts. This untreated water is carried in stormwater channel and discharges directly into creeks, rivers, the harbour and the ocean	
Threat Abatement Plan	Is a threat abatement plan under Part 5 of the <i>Threatened</i> Species Conservation Act 1995 or under Division 5 of Part 7A of the Fisheries Management Act 1994	
Total Catchment Management	Resource & land management based on entire drainage basins or systems	
Understorey	Vegetation layer between tree canopy & the ground cover in a forest or wood, composed of shrubs & small trees	

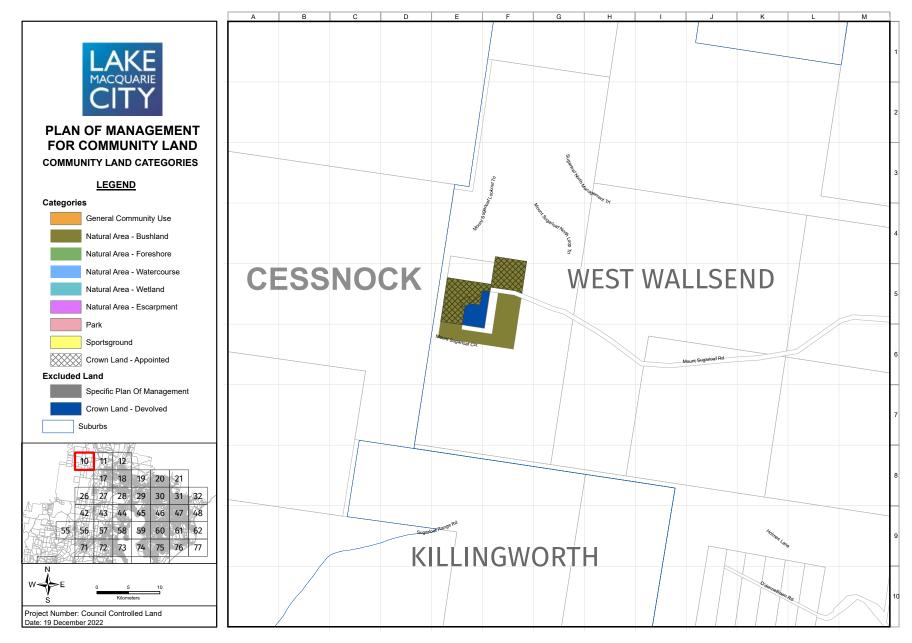

ABBREVIATION	DETAILS
Urban Runoff	The drainage of water from streets, houses, parks & all urban areas that contains pollutants from litter & oil to excess nutrients
Urbanisation	The movement of landuse from less intensive forms to more intensive forms. Bushland becomes agricultural which then becomes residential and industrial landuses
Values	The things that make it important & special
Waste	Any material which has not been fully utilised
Wetland	Habitat where the influence of groundwater has resulted in development of plant or animal communities adapted to aquatic or intermittently wet conditions. Wetlands include tidal flats, shallow sub tidal areas, swamps, marshes, wet meadows, bogs and similar areas
Wildlife/Habitat Corridors	Corridors of vegetation linking fragmented or isolated habitat areas; providing transport linkages for fauna with home ranges extending further than their immediate remnant vegetation area

APPENDIX 13 MAPS

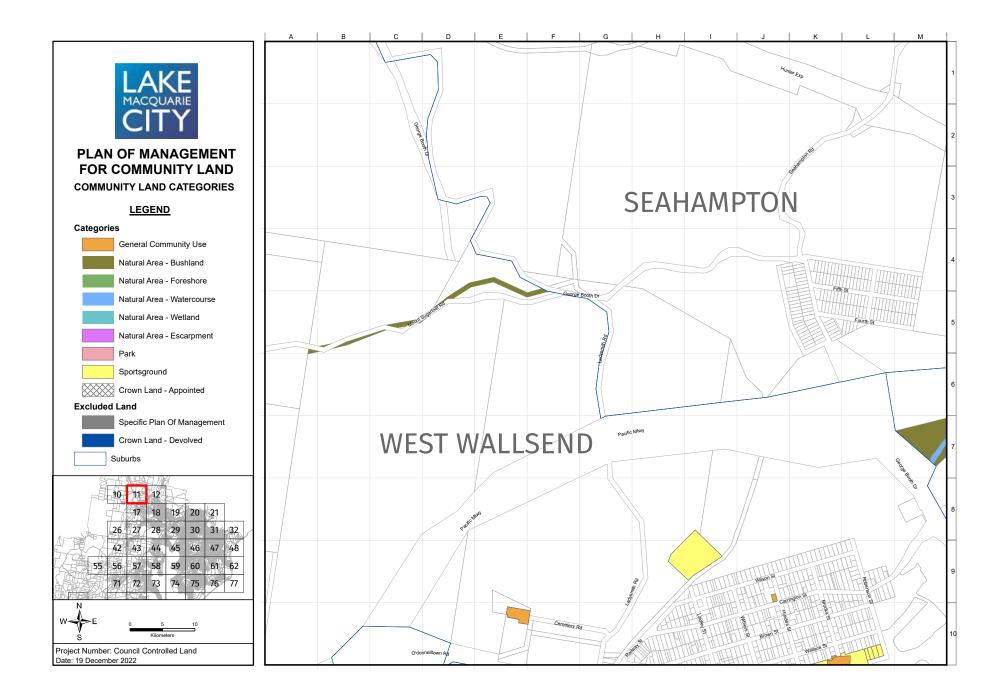

COMMUNITY LAND CATEGORIES INDEX MAP

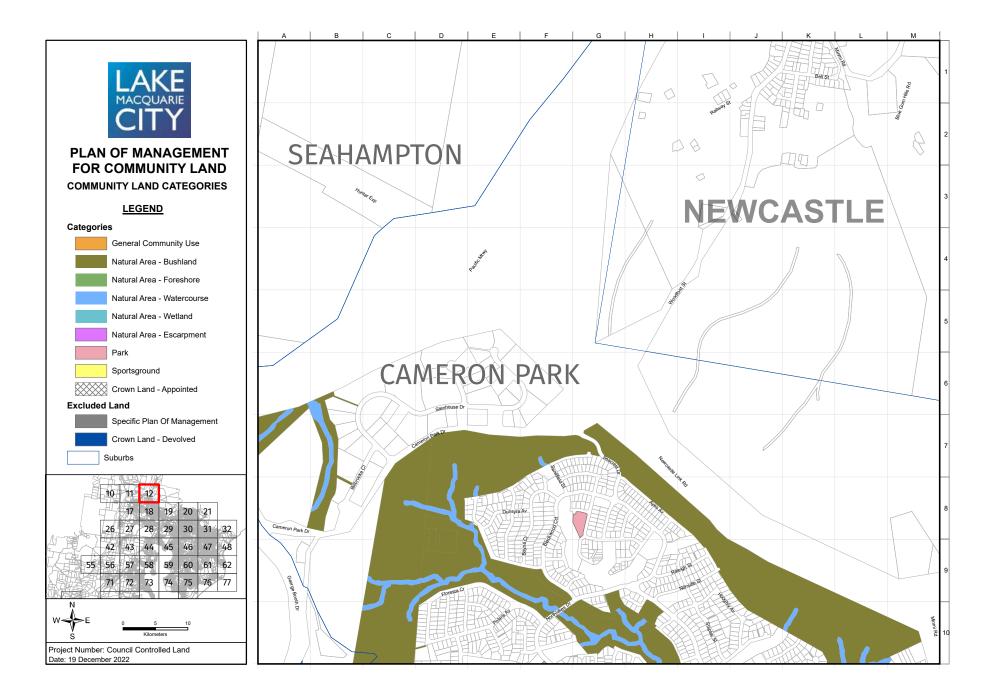

These maps display the categorisation of the included community and CLM Crown land. These maps also identify community land that is covered by a specific PoM and devolved to Council crown land. These parcels will not be categorised but rather identified to illustrate all community and Crown land that Council manages.

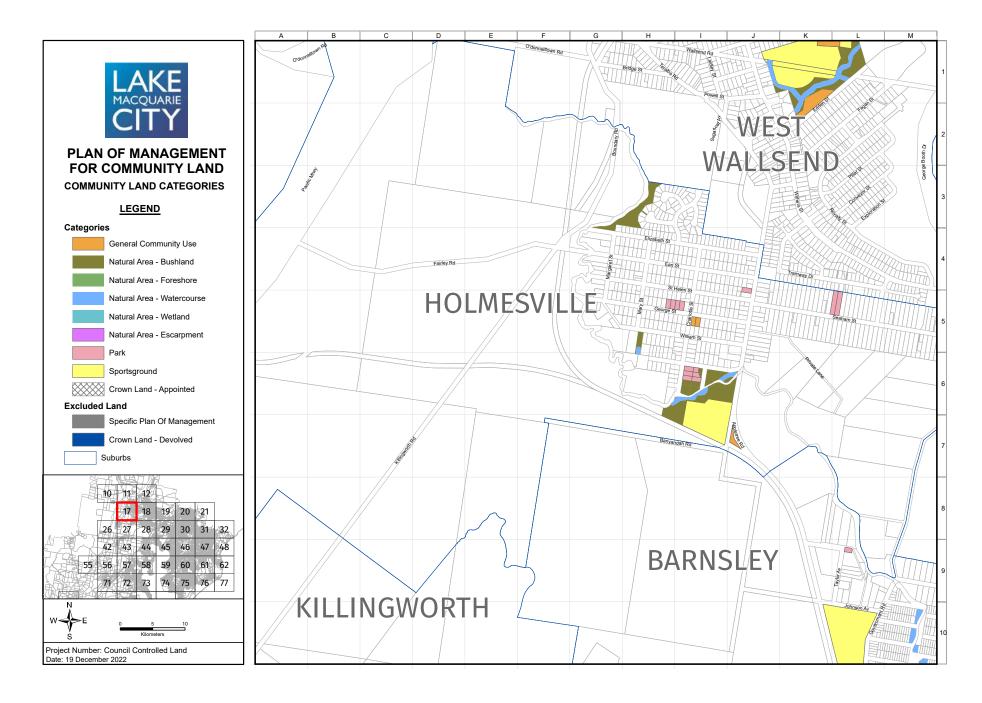

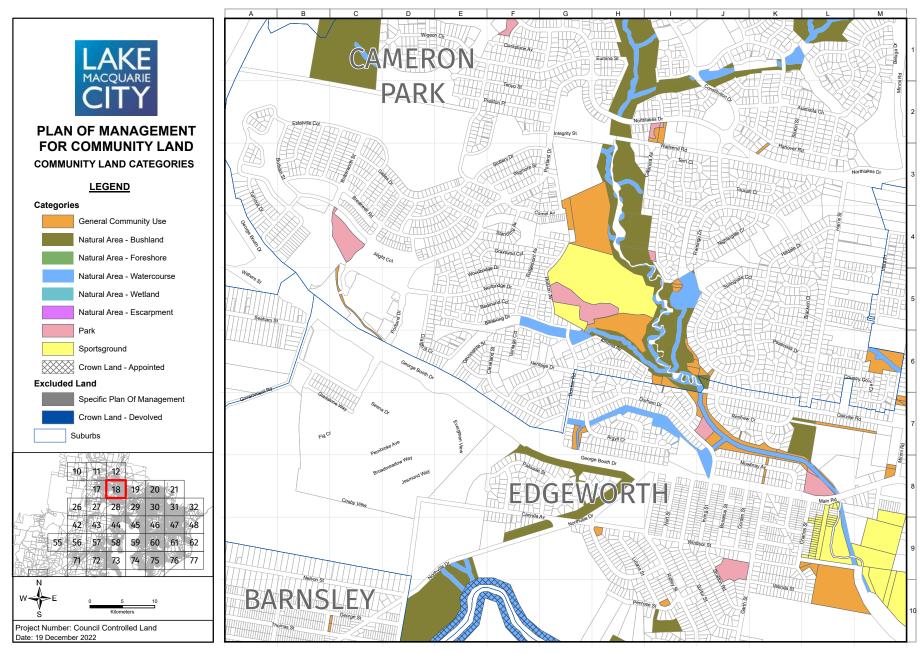

Crown Land - Appointed identified in this map include reserve numbers 89127.

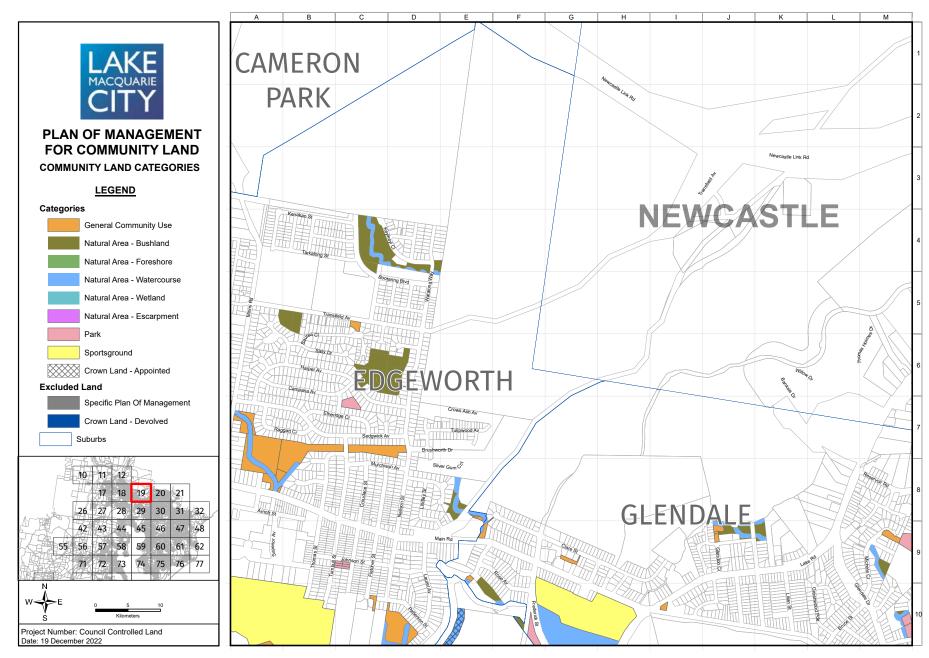

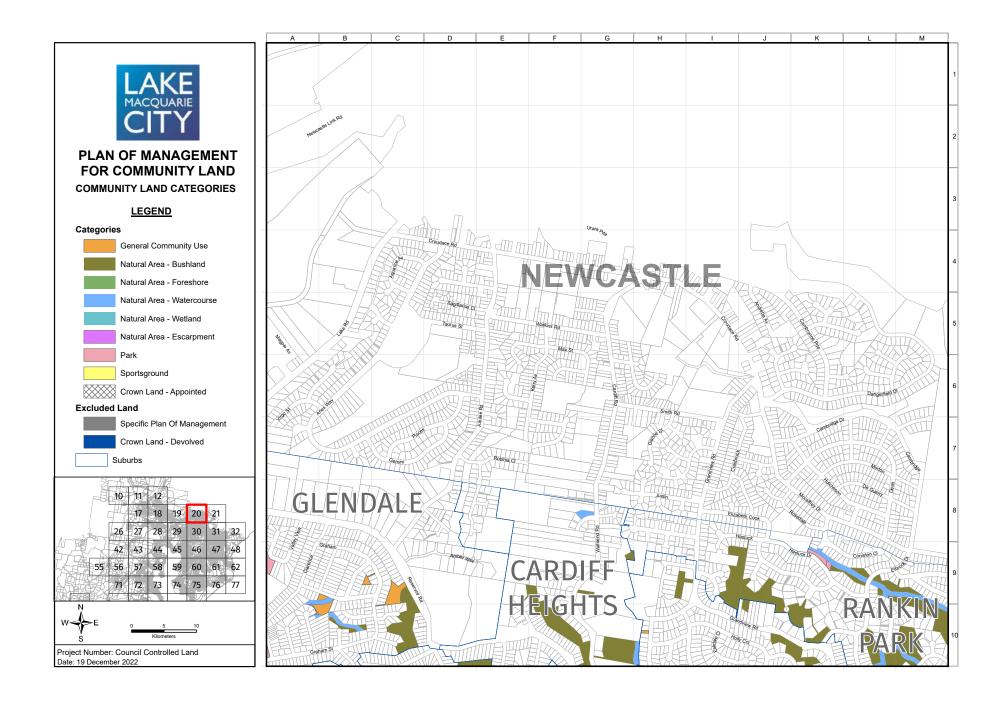

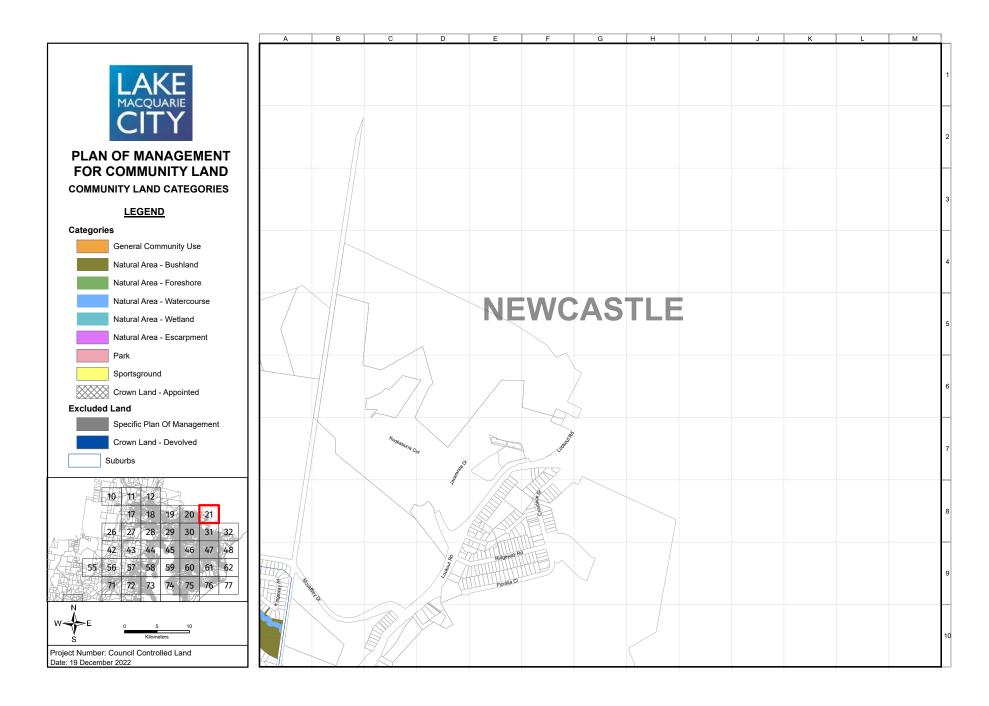

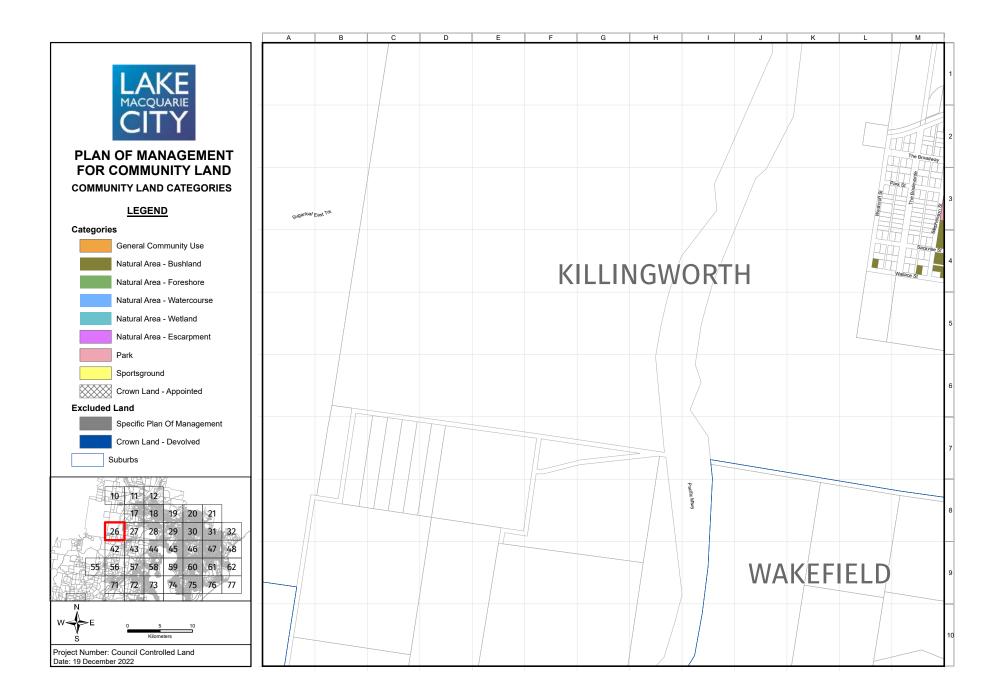

Crown Land - Appointed identified in this map include reserve numbers 57876.

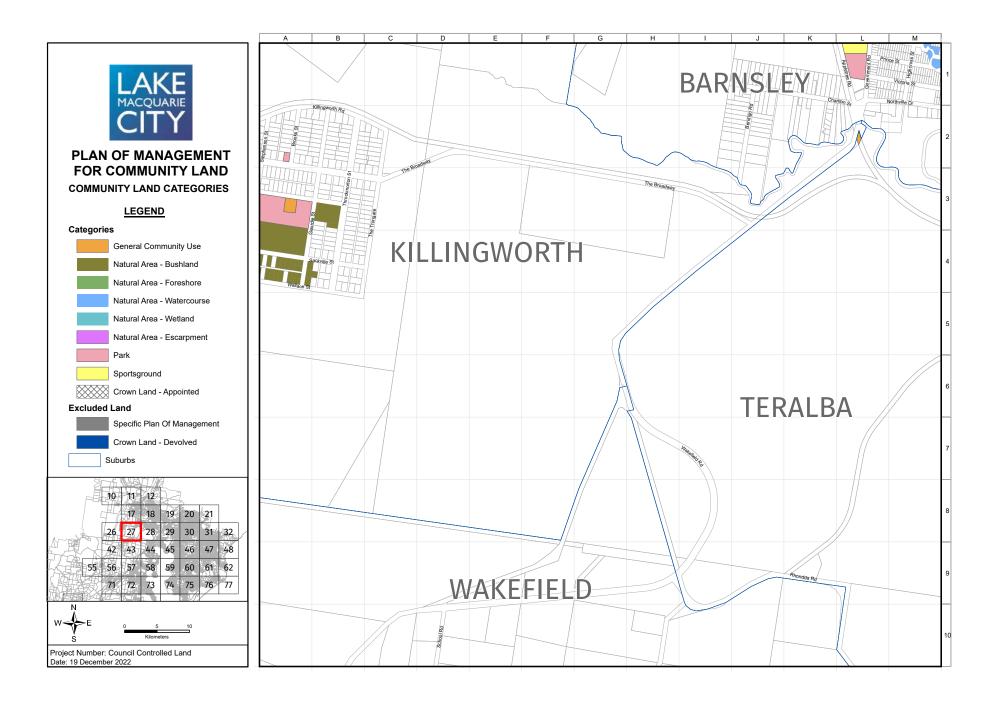

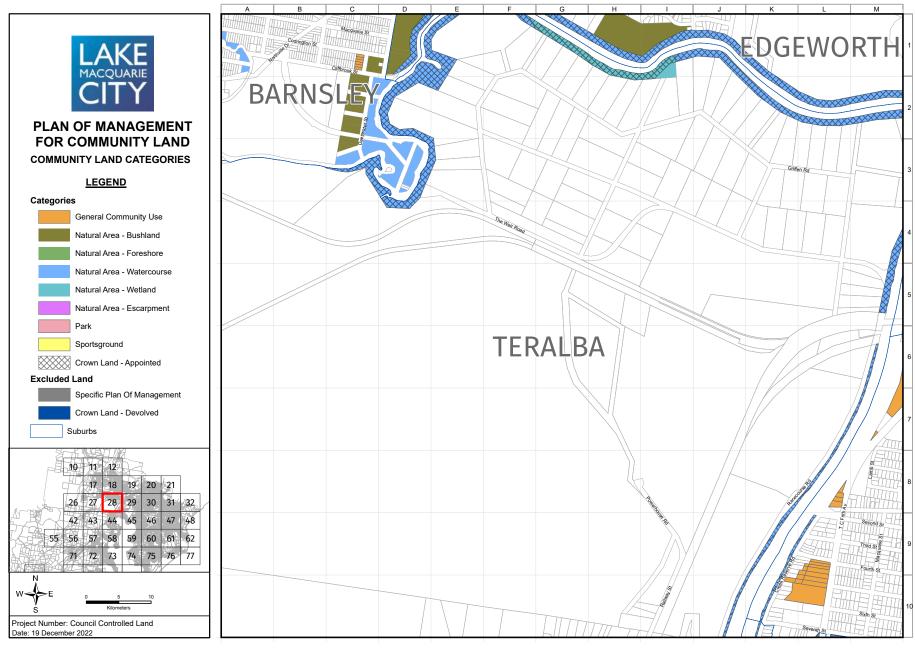

Crown Land - Appointed identified in this map include reserve numbers 1032688.

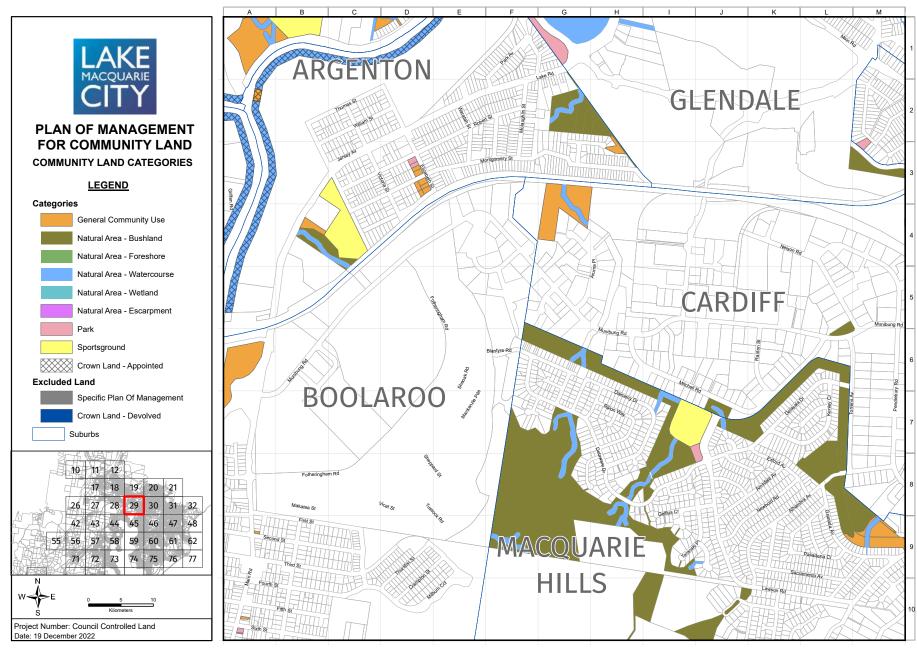

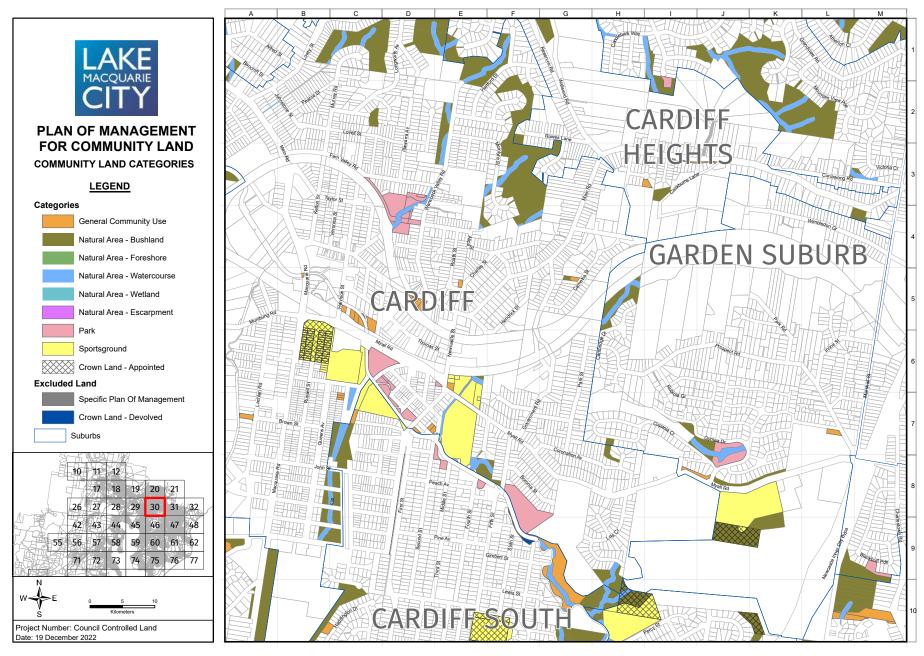

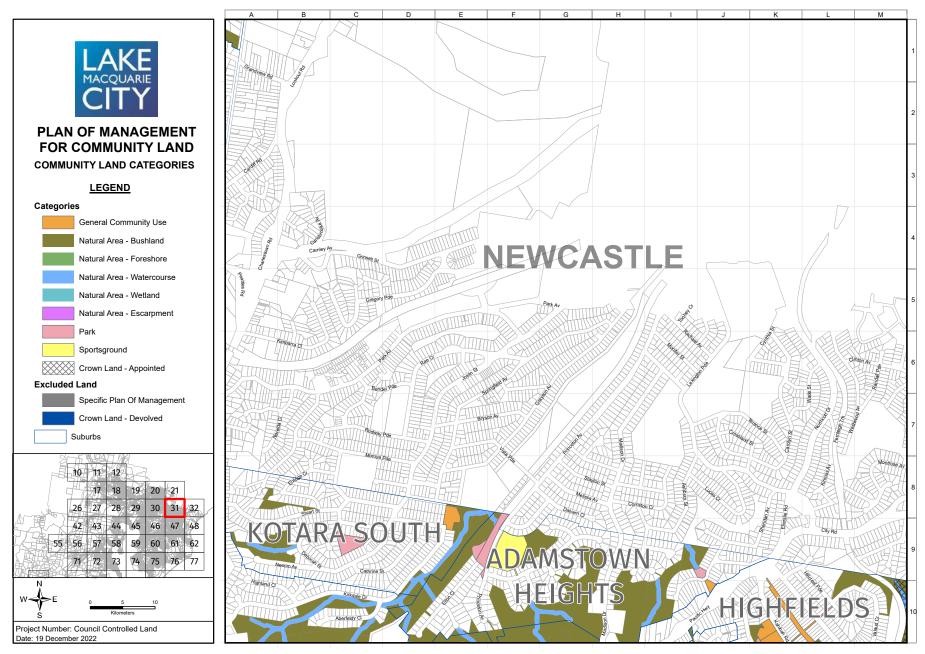

Crown Land - Appointed identified in this map include reserve numbers 1032688; 93706.

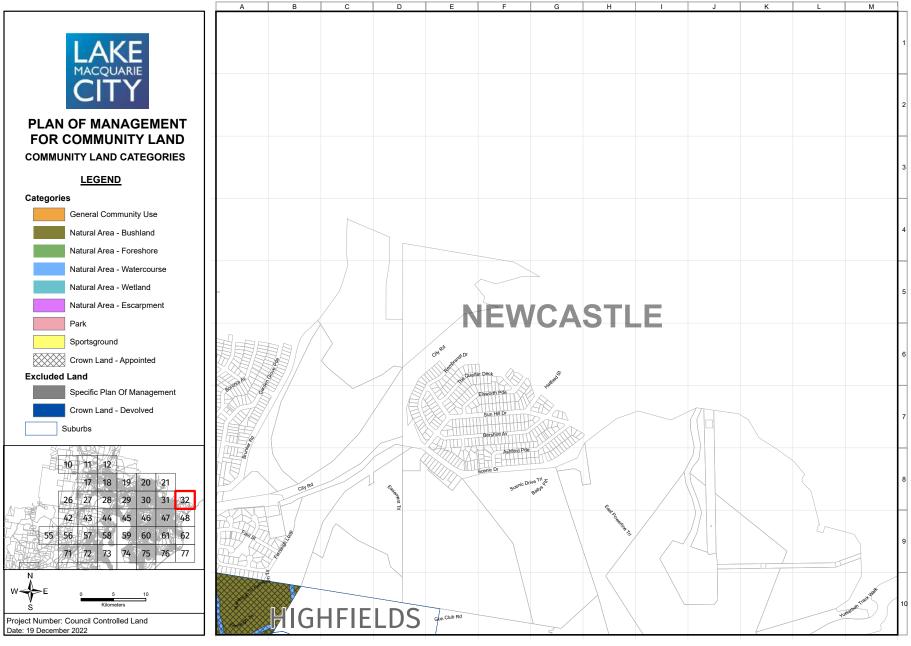

Crown Land - Appointed identified in this map include reserve numbers 57876; 1032688.

Crown Land - Appointed identified in this map include reserve numbers 570013; 84440; 570015; 91094; 97747.

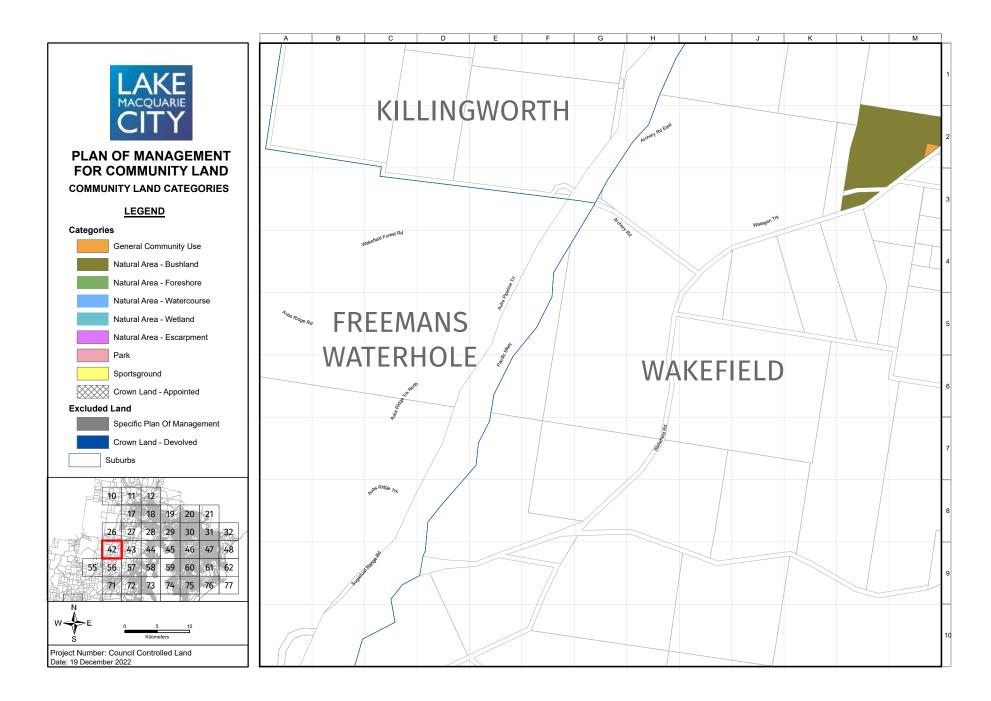

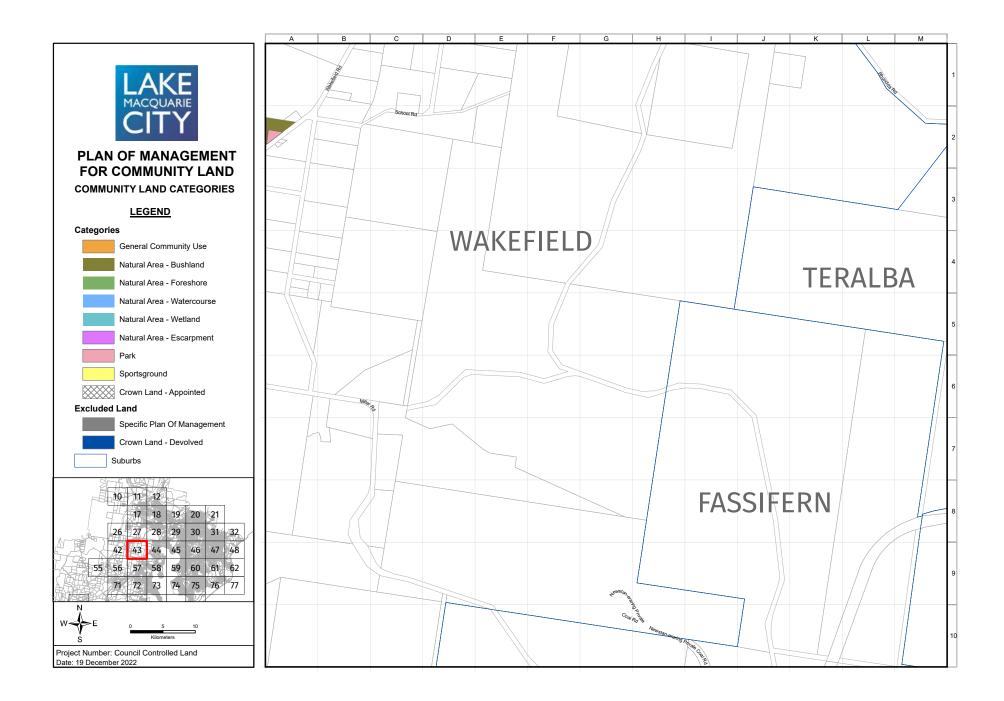

Crown Land - Appointed identified in this map include reserve numbers 73603.

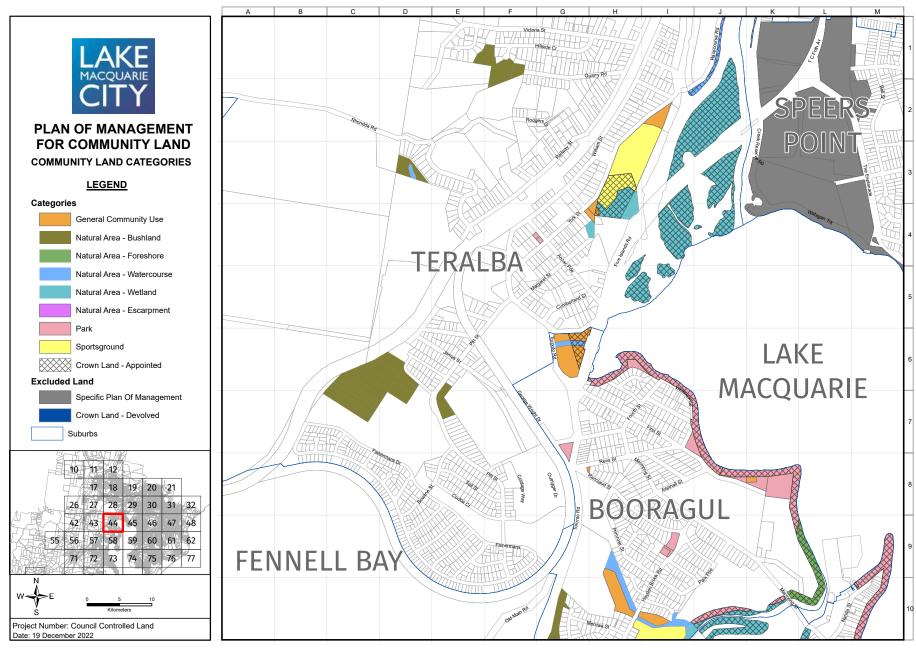

Crown Land - Appointed identified in this map include reserve numbers 73603.

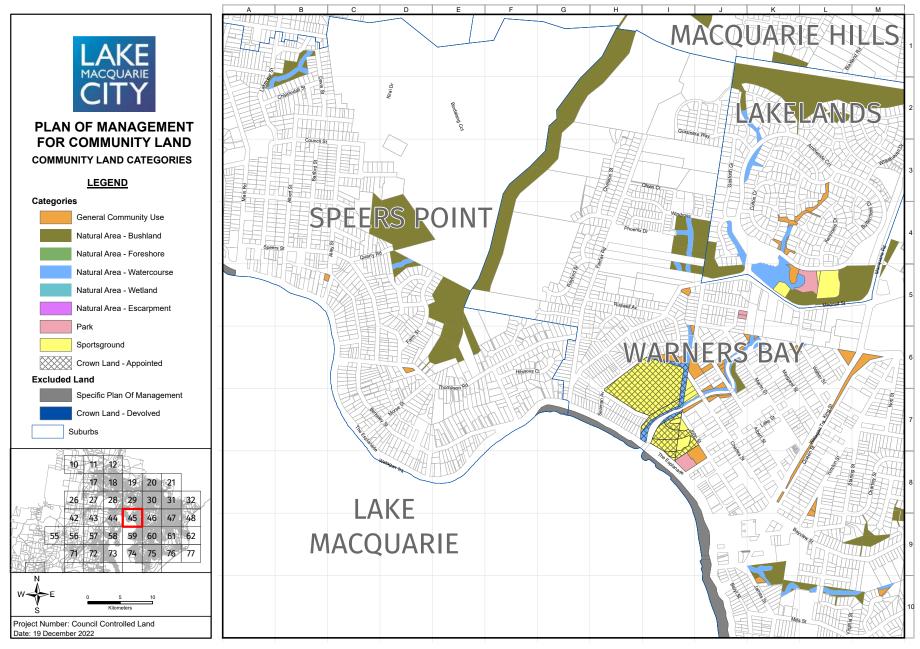

261

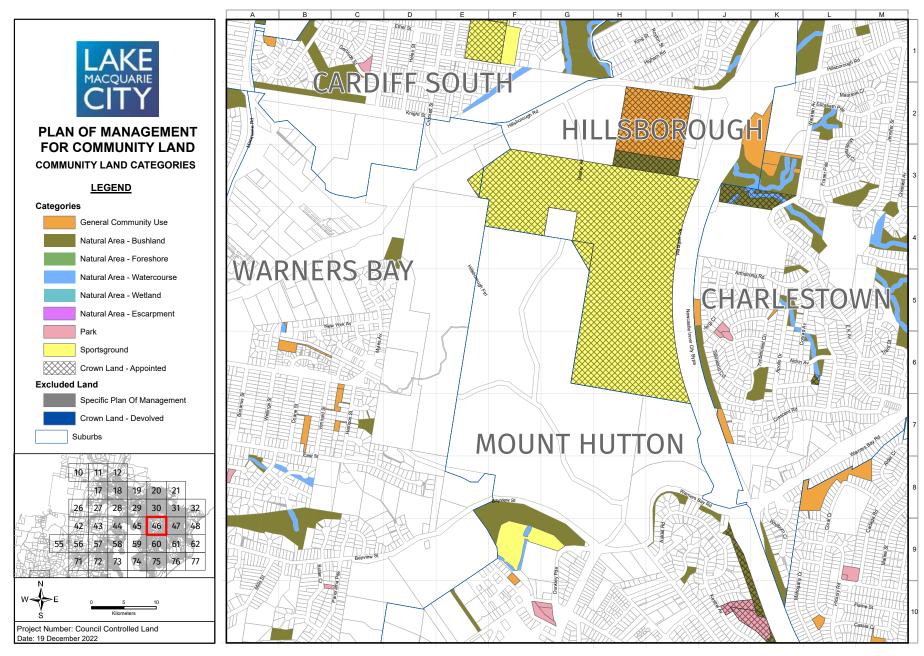

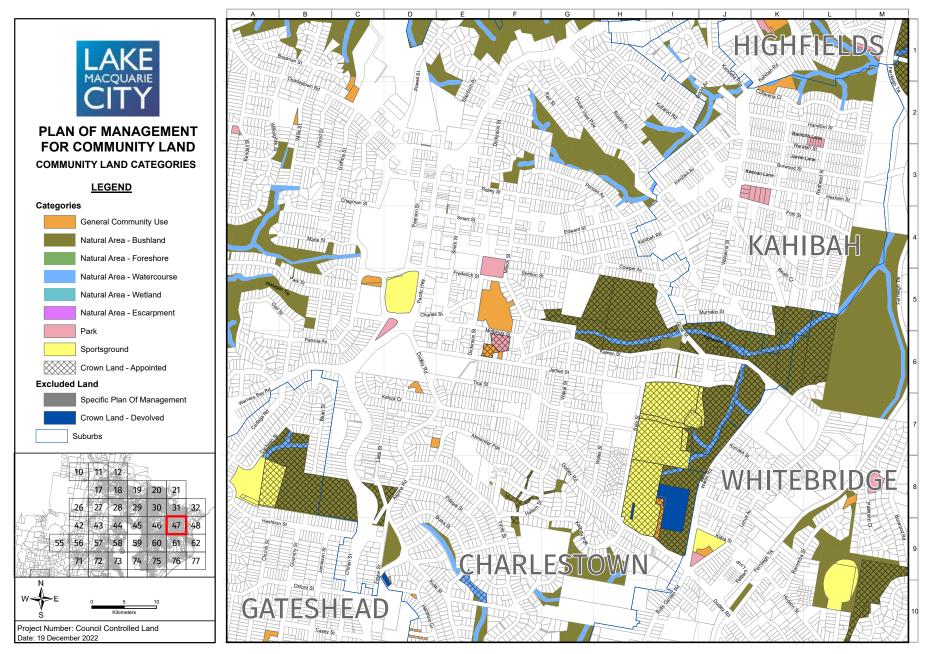

Crown Land - Appointed identified in this map include reserve numbers 90850; 47228; 93706; 1037808; 170163; 68035.

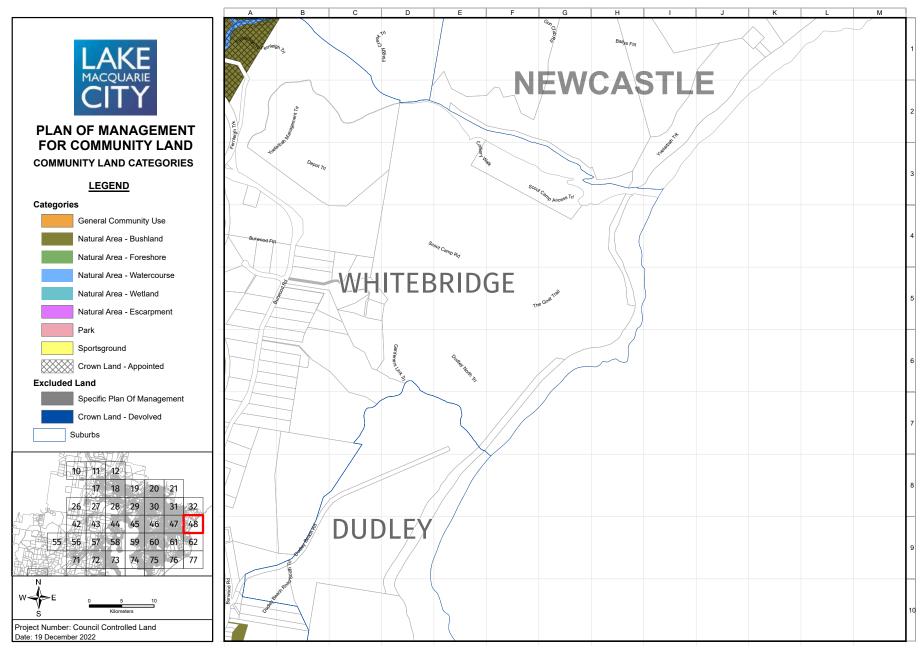

Crown Land - Appointed identified in this map include reserve numbers 82112.

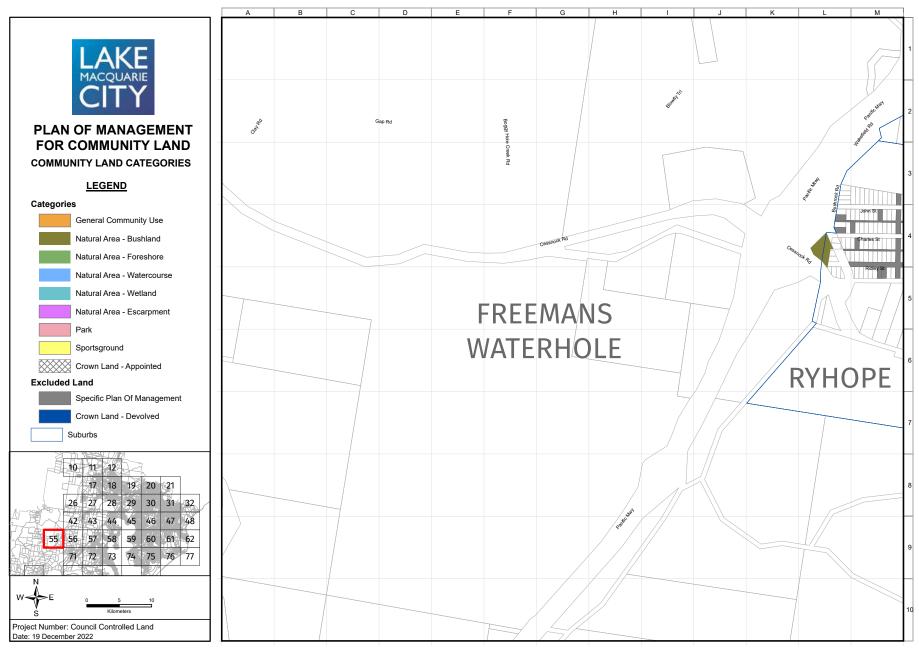

Crown Land - Appointed identified in this map include reserve numbers 570015; 86839; 88601; 89330; 97942; 91636.

Crown Land - Appointed identified in this map include reserve numbers 87914; 77233; 170025; 1013948; 87901; 88828; 80517; 74090; 97735; 73603.

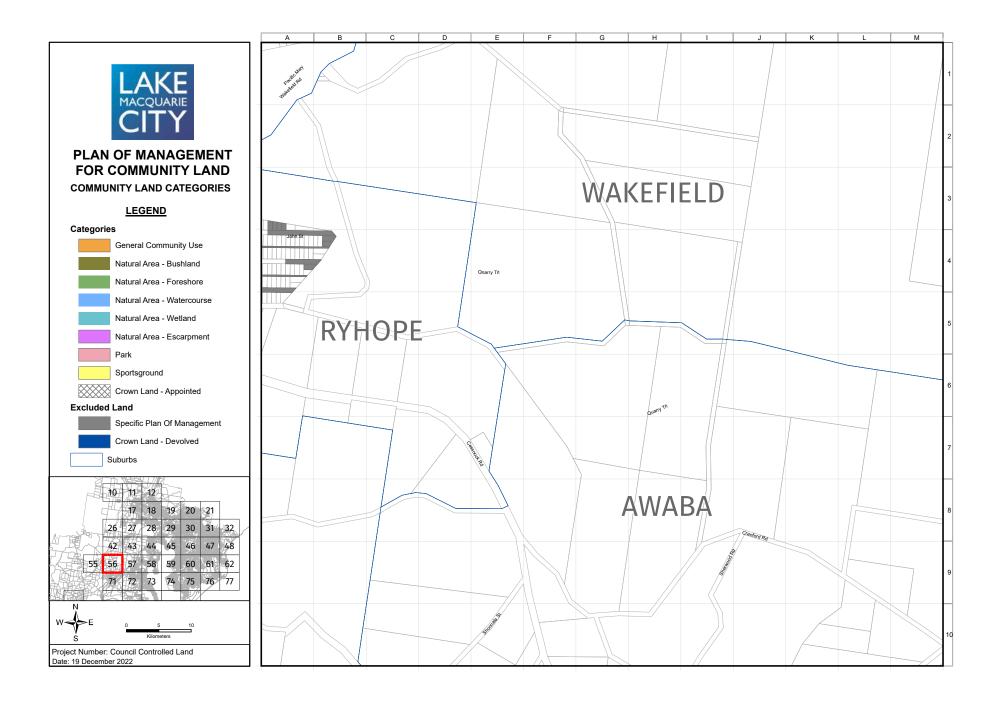

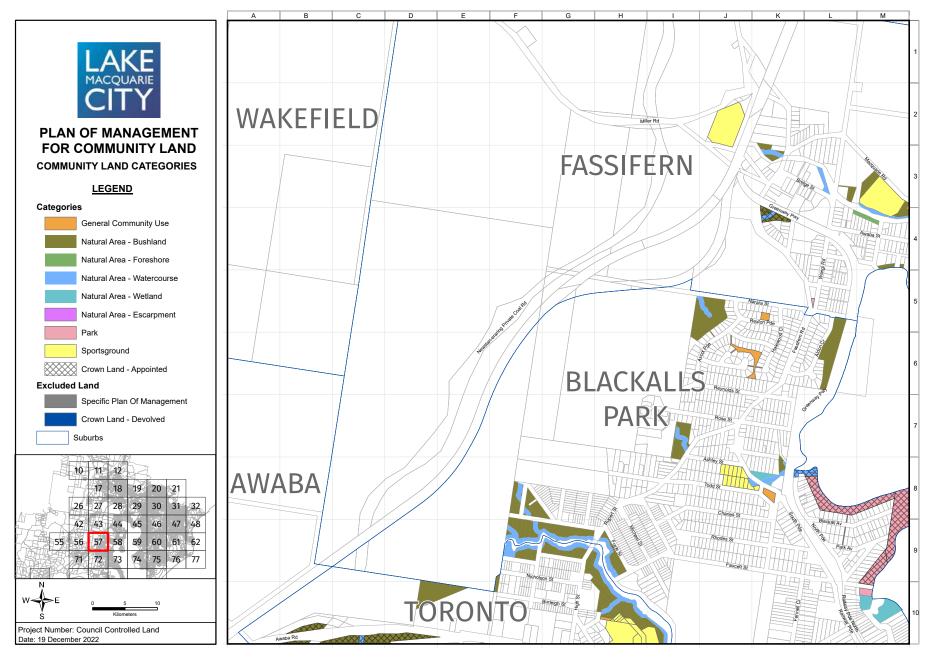

Crown Land - Appointed identified in this map include reserve numbers 73603.

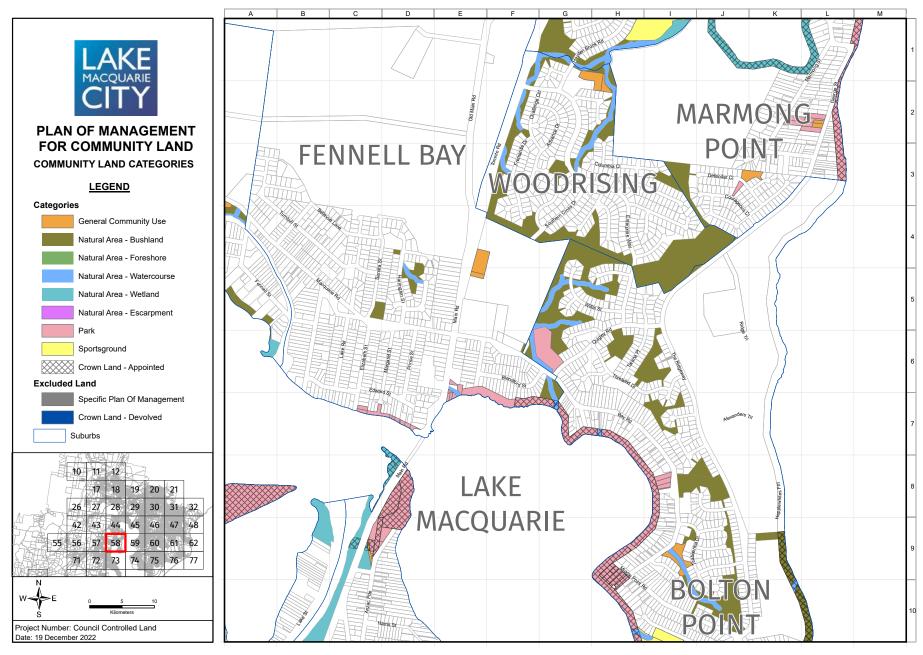

Crown Land - Appointed identified in this map include reserve numbers 84721; 52801; 89353.

269

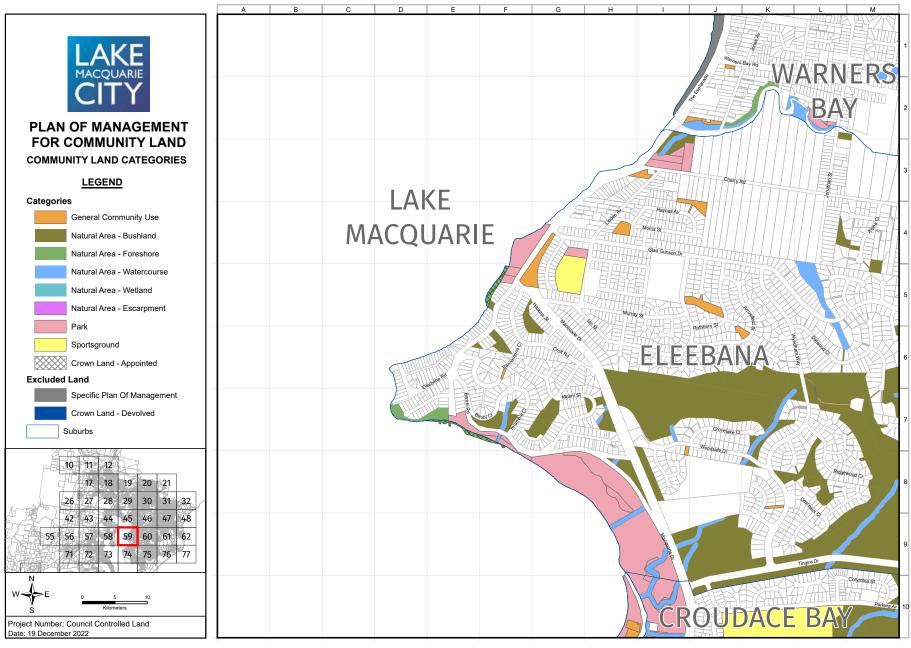

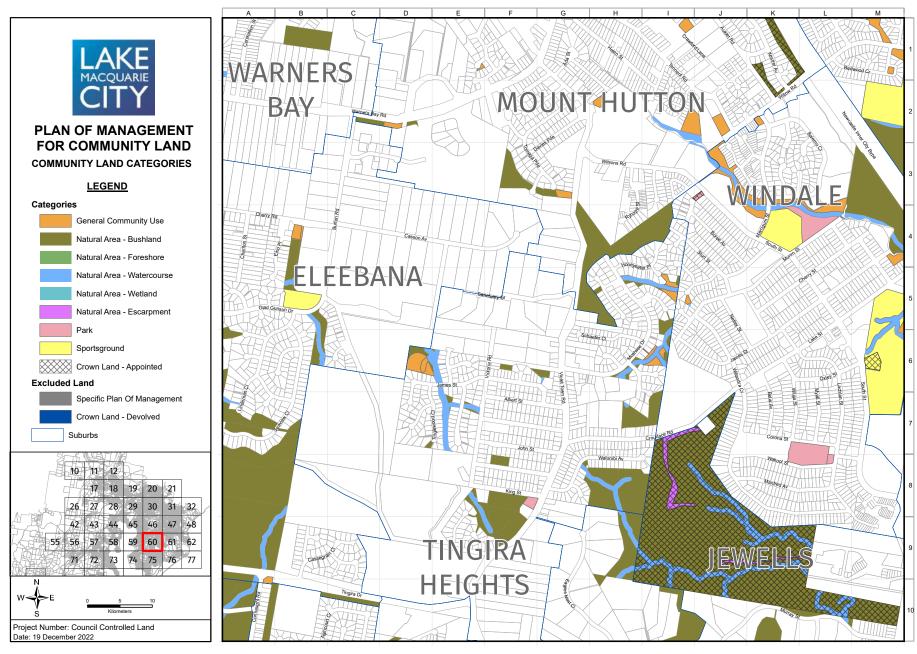

Crown Land - Appointed identified in this map include reserve numbers 84721; 52801; 89353.

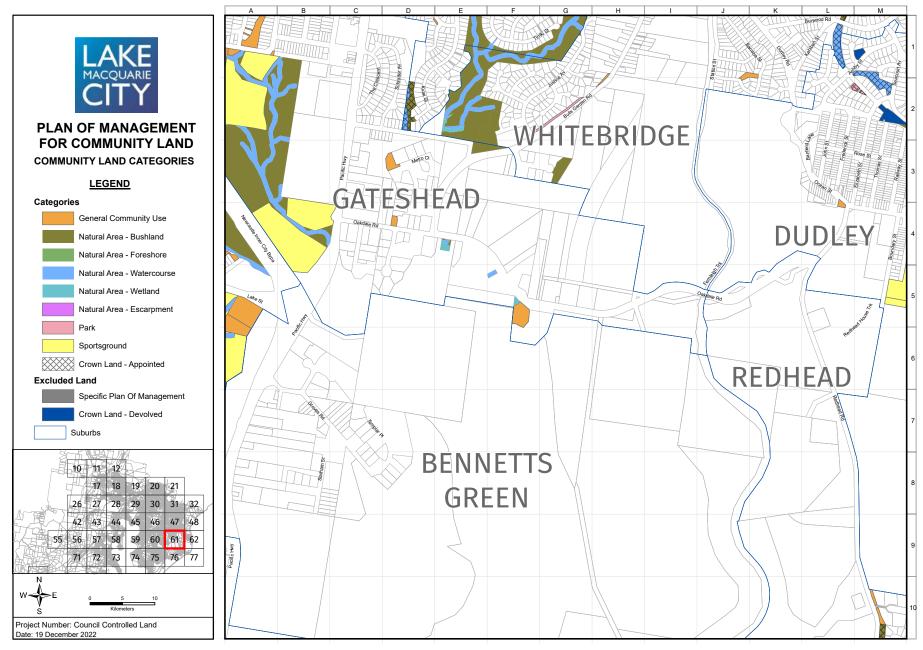

Crown Land - Appointed identified in this map include reserve numbers 52801; 66798; 66792; 68035.

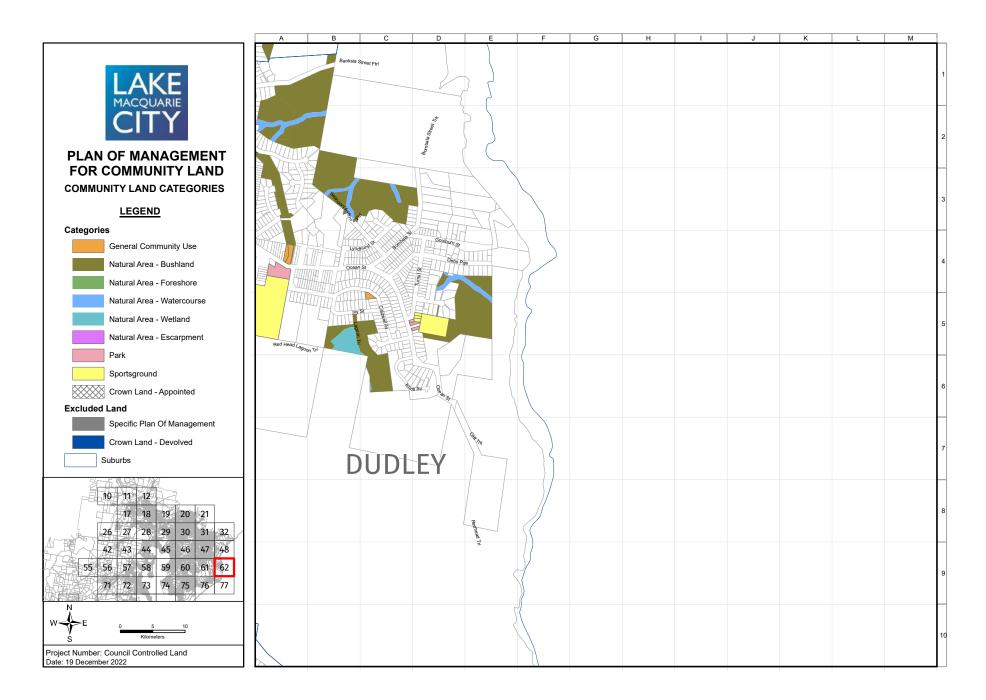

Crown Land - Appointed identified in this map include reserve numbers 170137; 89787.

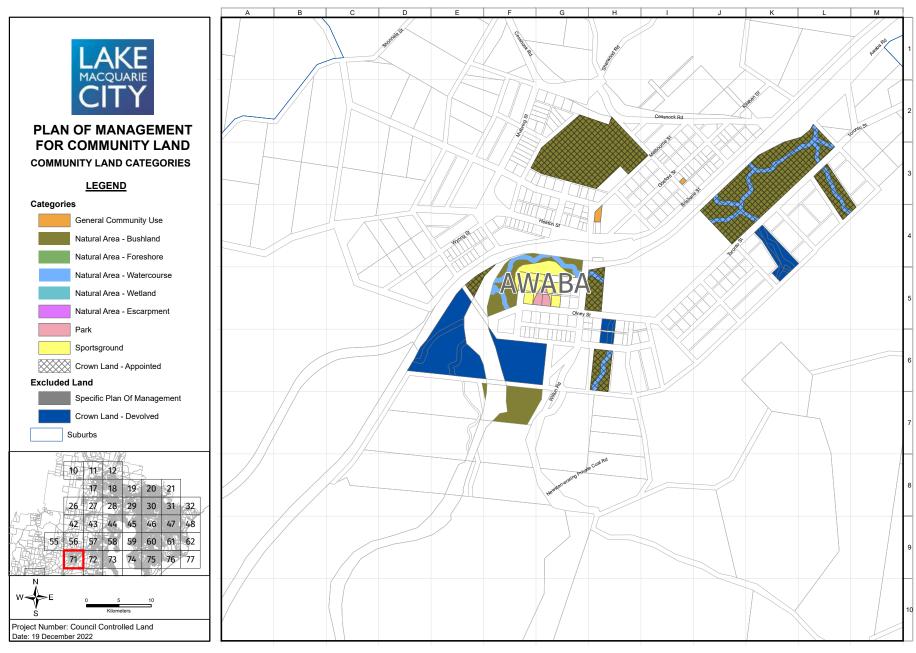

Crown Land - Appointed identified in this map include reserve numbers 88287; 96615; 97942.

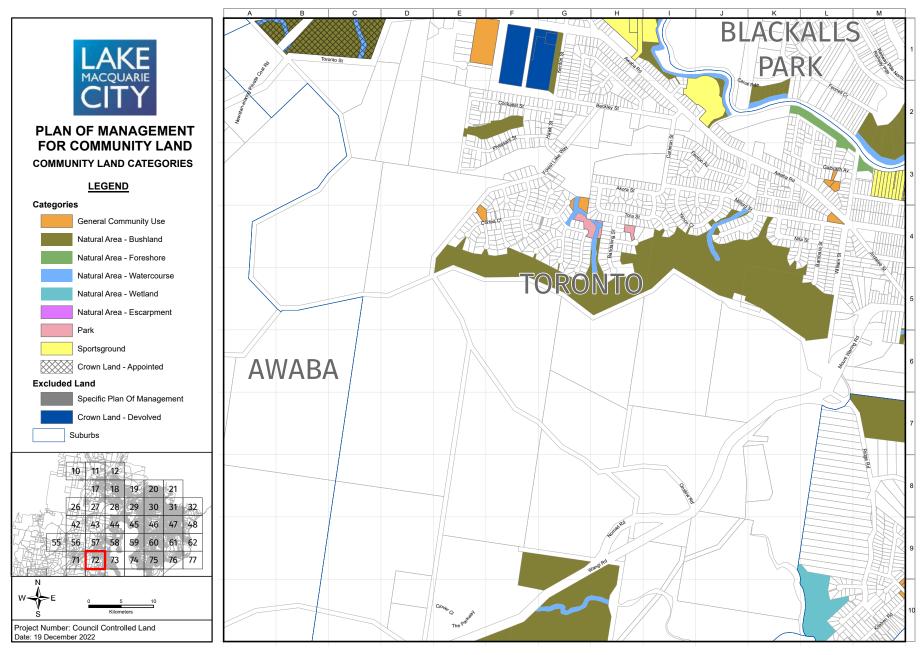

Crown Land - Appointed identified in this map include reserve numbers 98042; 91720; 89279; 97238.

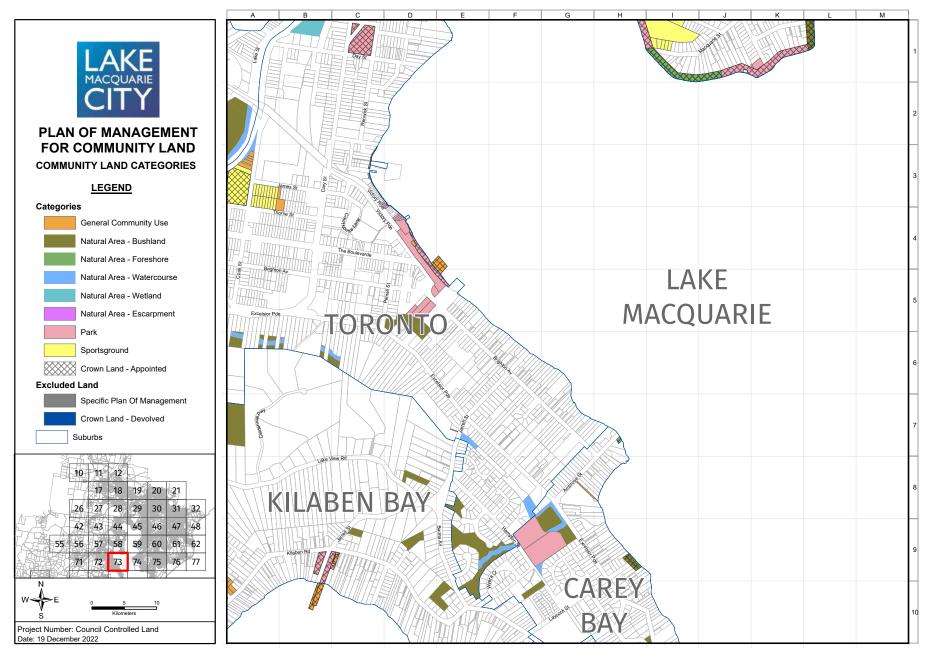

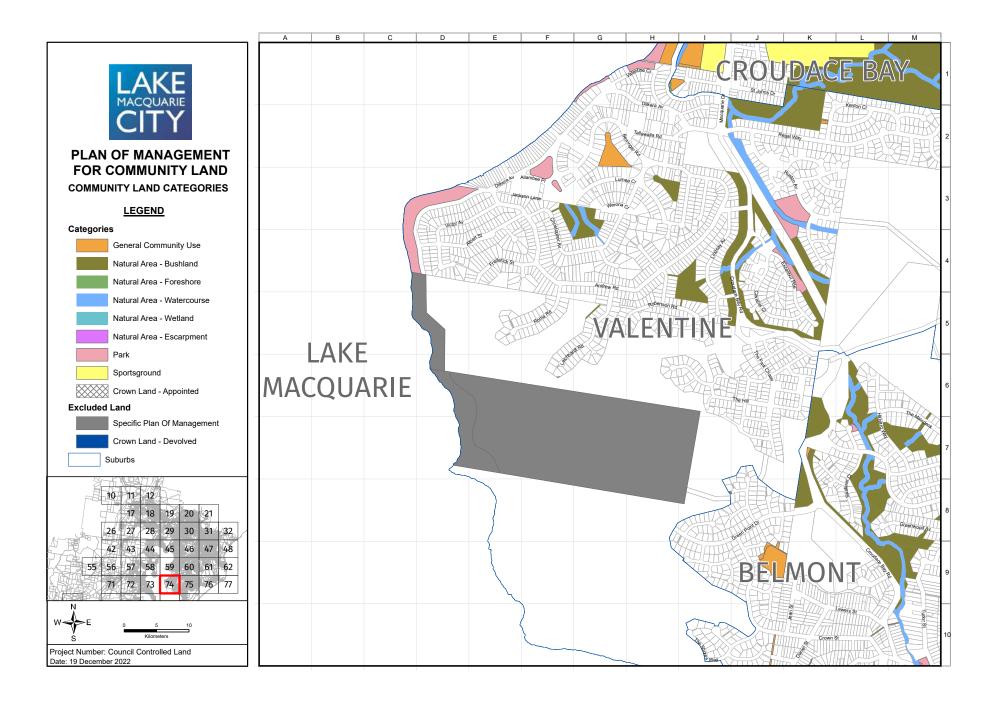

Crown Land - Appointed identified in this map include reserve numbers 71289; 19451; 19445; 19439; 19441.

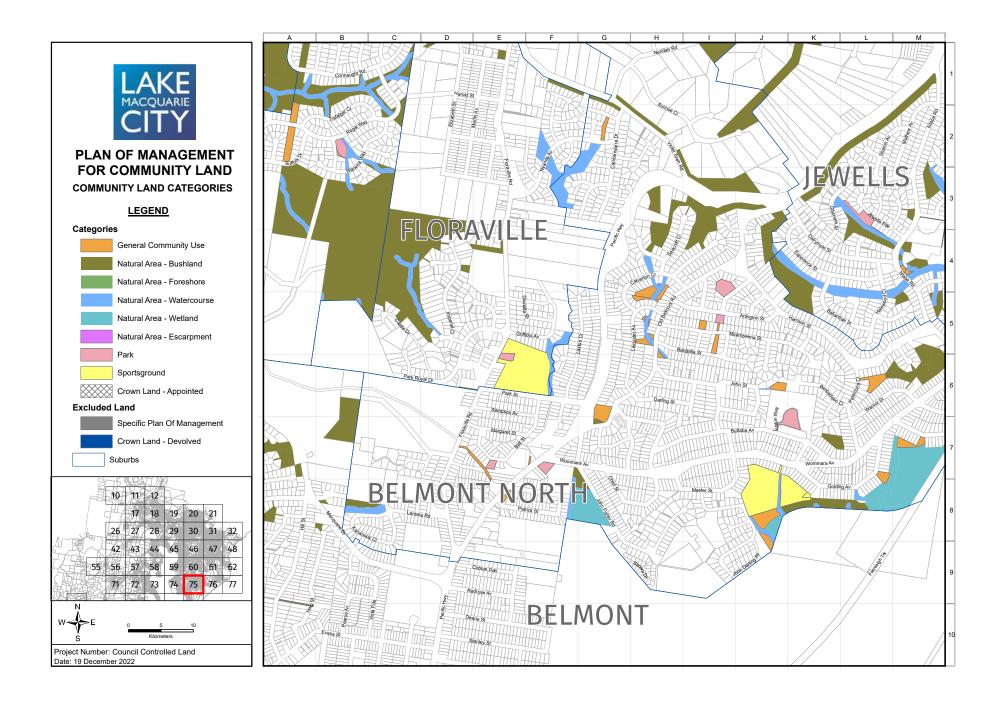

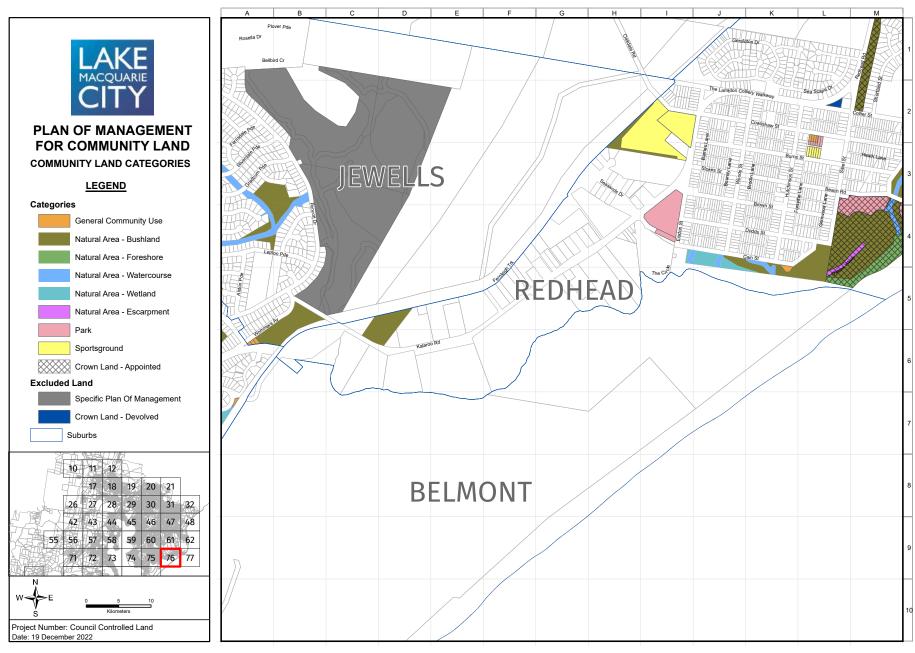

Crown Land - Appointed identified in this map include reserve numbers 89359.

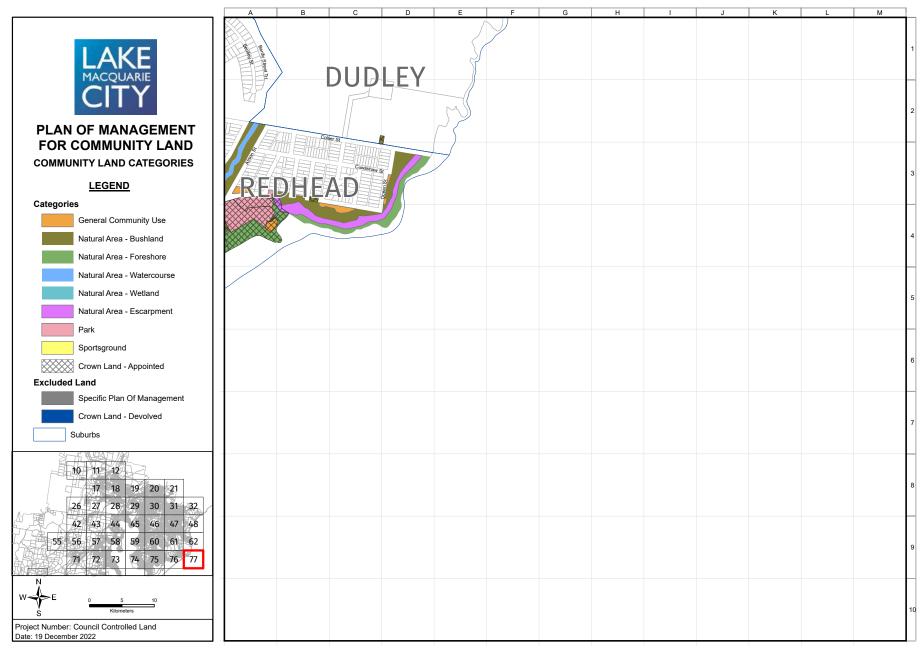

Crown Land - Appointed identified in this map include reserve numbers 61001; 570010; 86275; 91476; 68035; 67709; 86200; 66780; 66784.

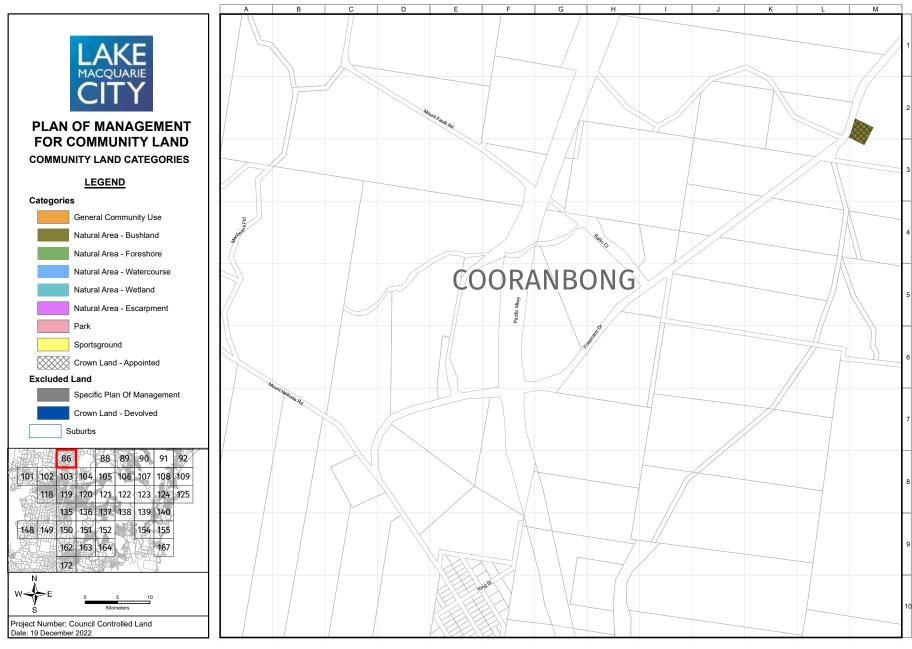

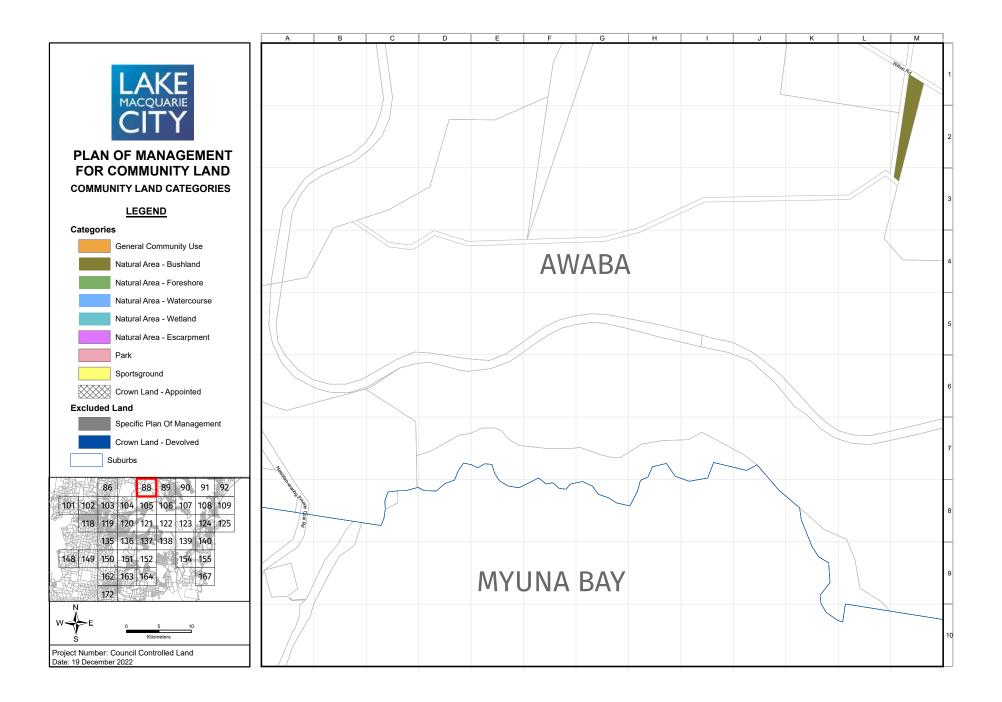

Crown Land - Appointed identified in this map include reserve numbers 97238; 78624.

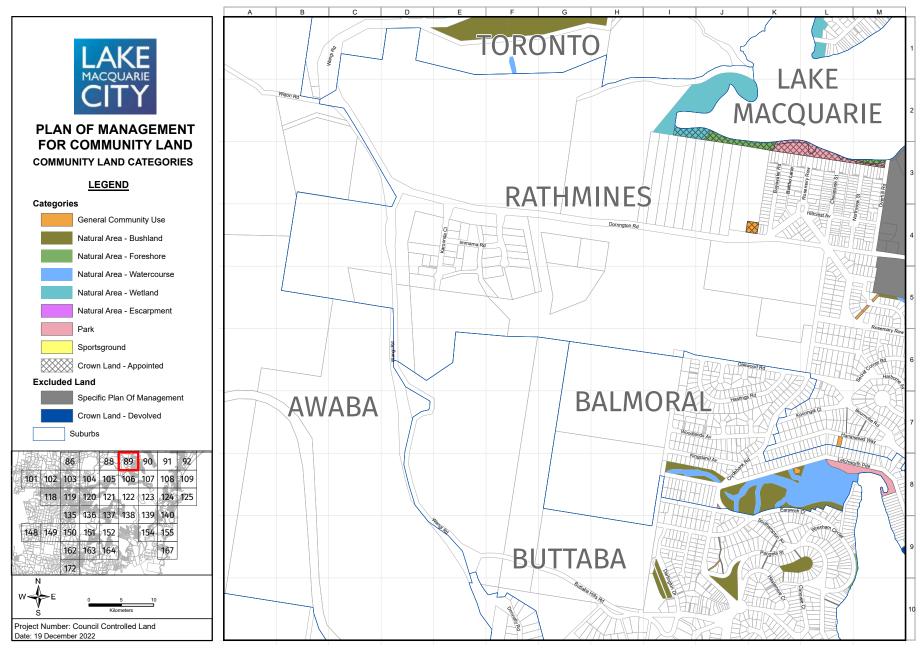

Crown Land - Appointed identified in this map include reserve numbers 78624; 170071; 170060.

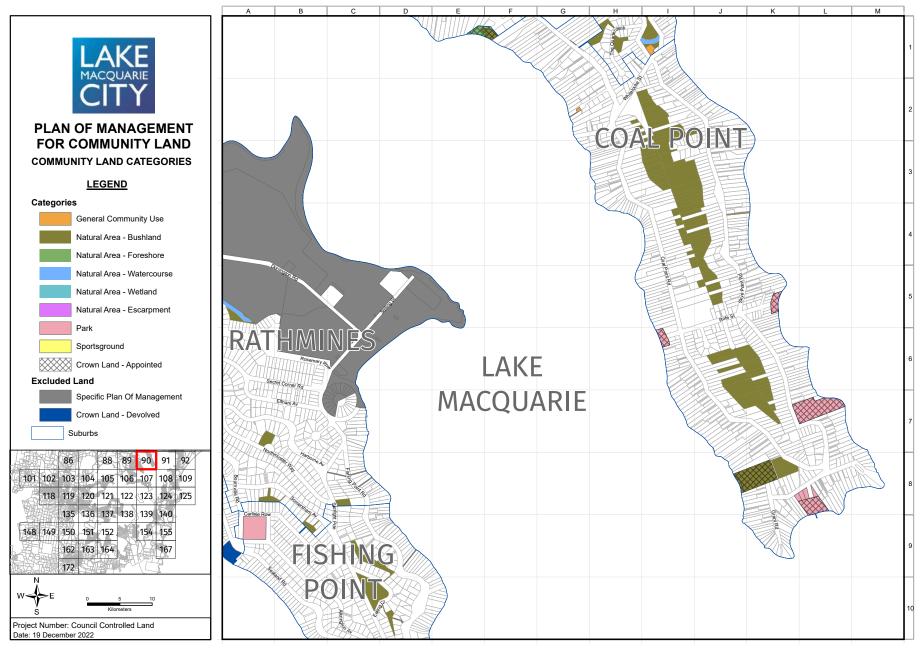

Crown Land - Appointed identified in this map include reserve numbers 96402.

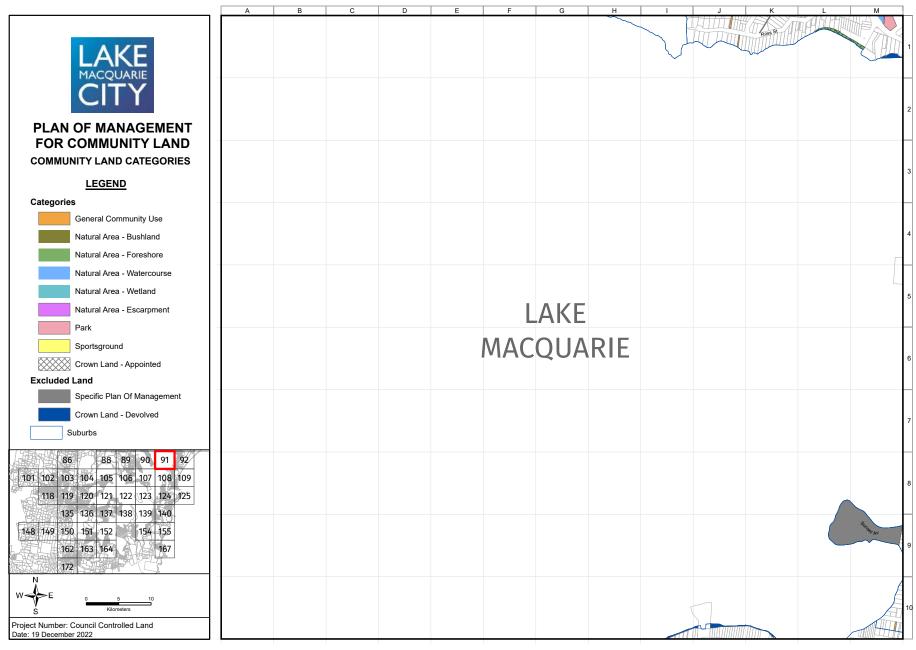

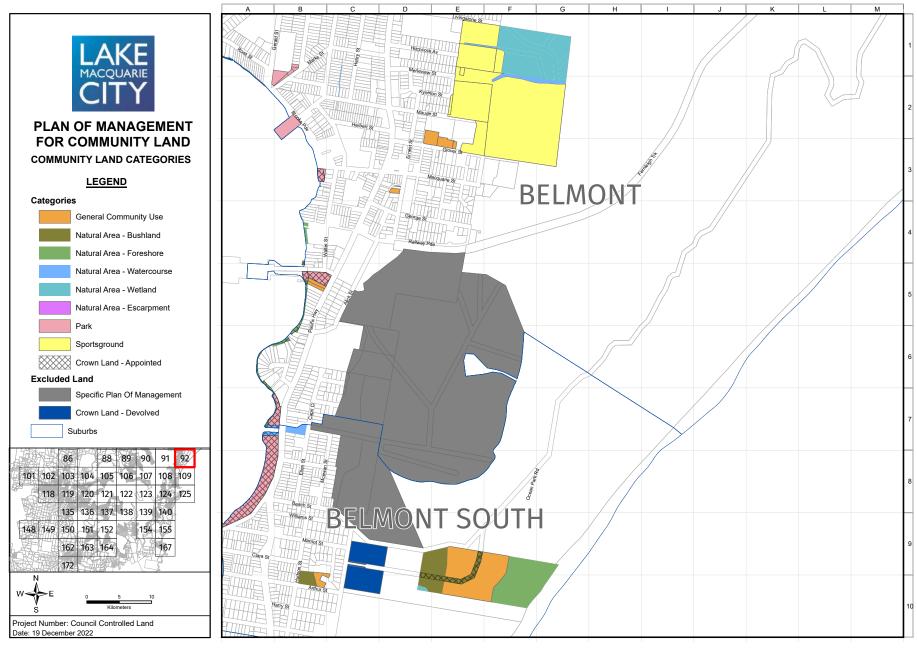

Crown Land - Appointed identified in this map include reserve numbers 83204; 81949.

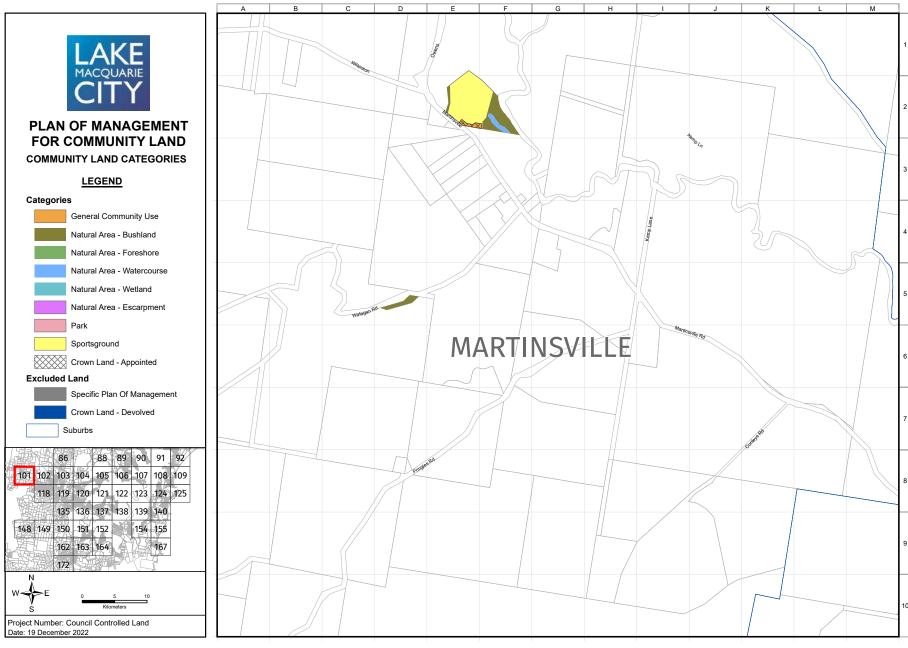

Crown Land - Appointed identified in this map include reserve numbers 66788; 66782; 66786; 66794; 66796; 88652.

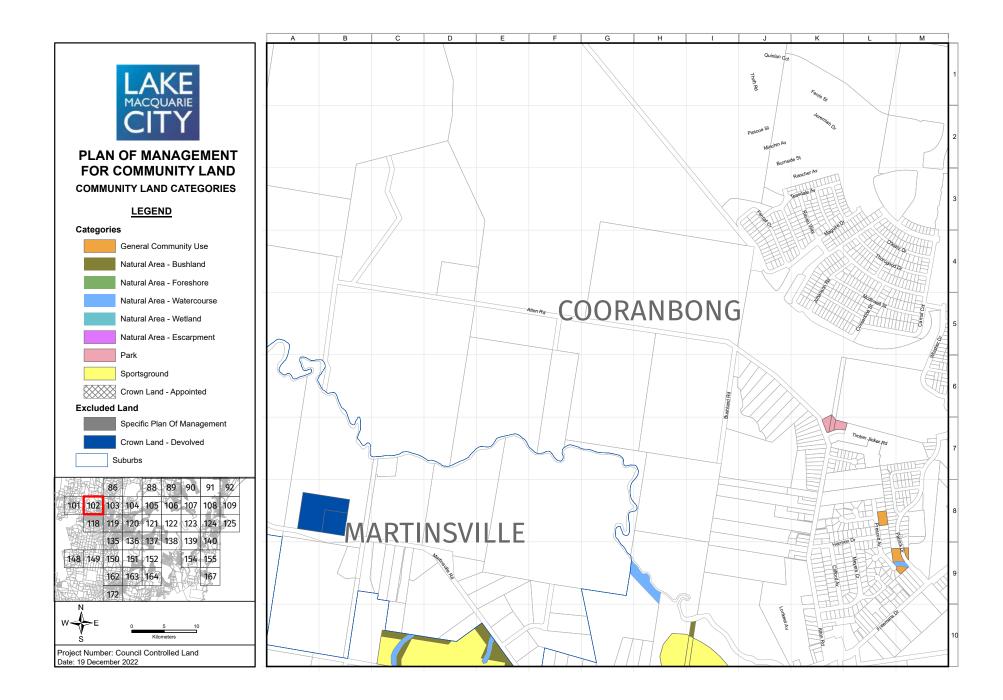

Crown Land - Appointed identified in this map include reserve numbers 1002913.

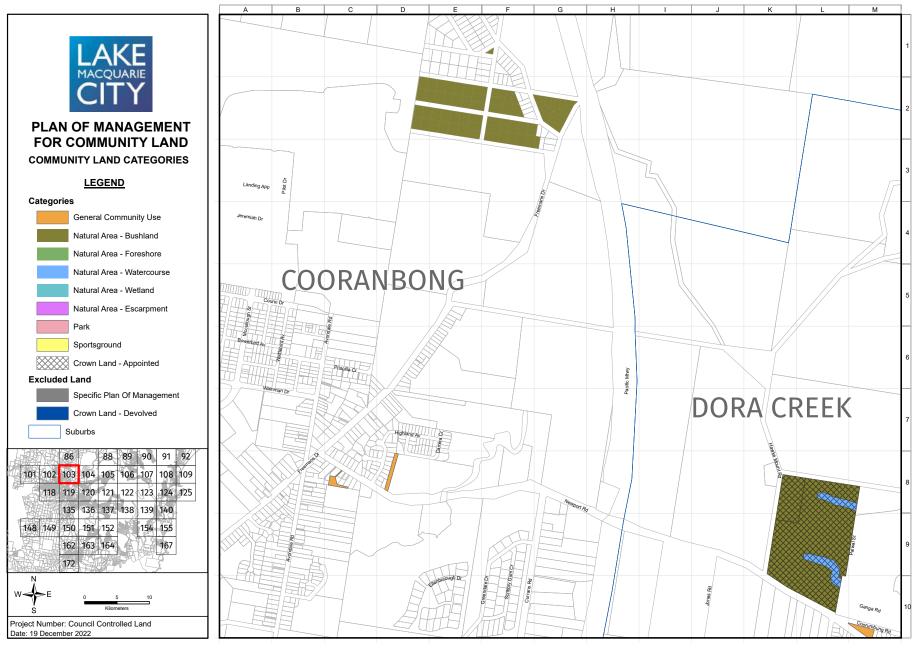

Crown Land - Appointed identified in this map include reserve numbers 90996; 68189; 88699; 570067.

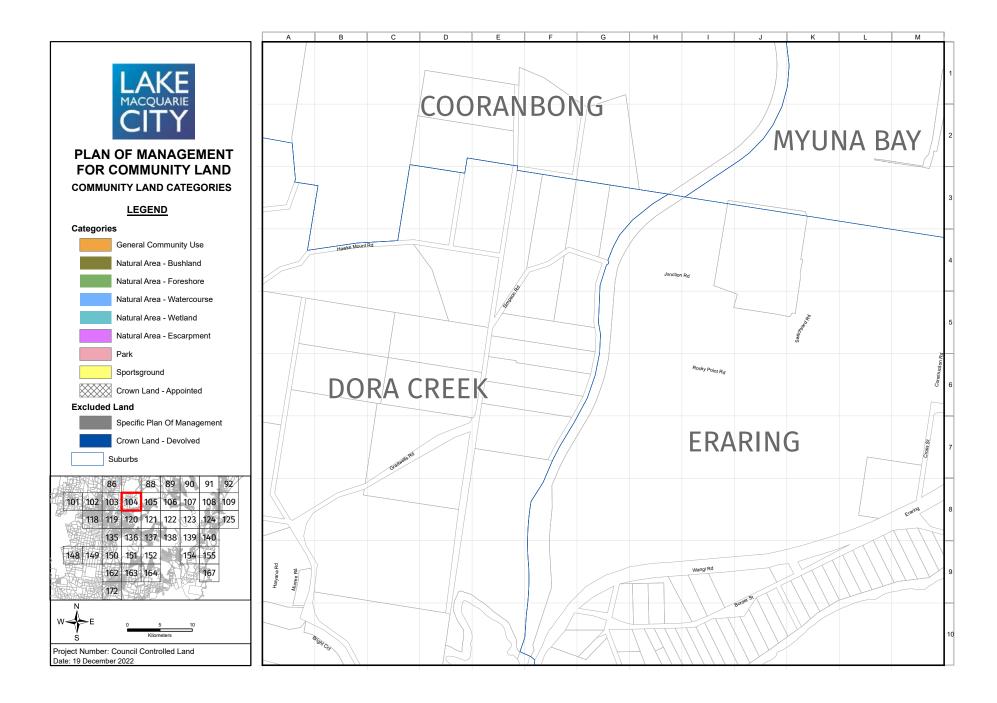

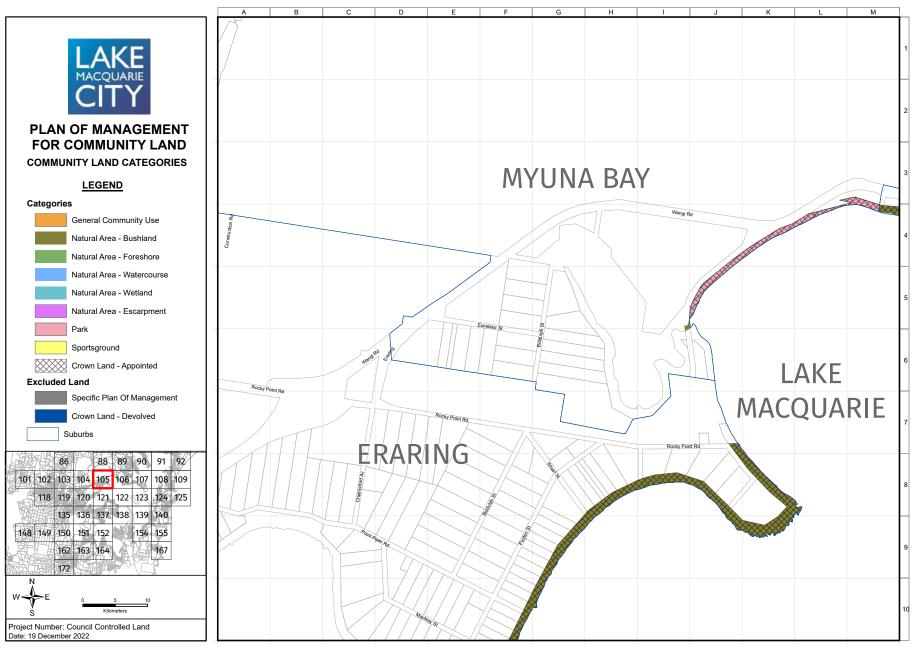

Crown Land - Appointed identified in this map include reserve numbers 170020.

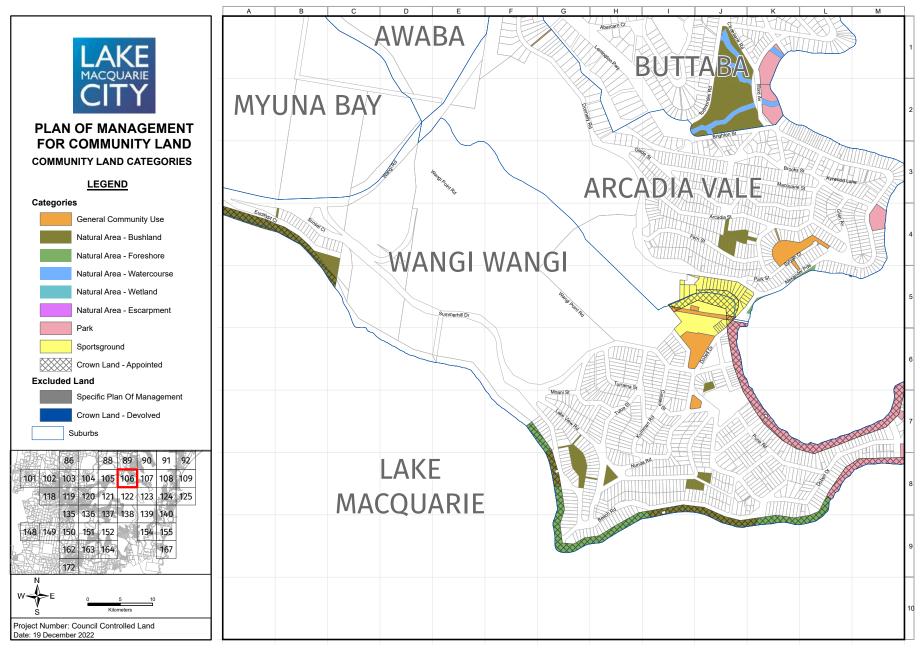

Crown Land - Appointed identified in this map include reserve numbers 38410.

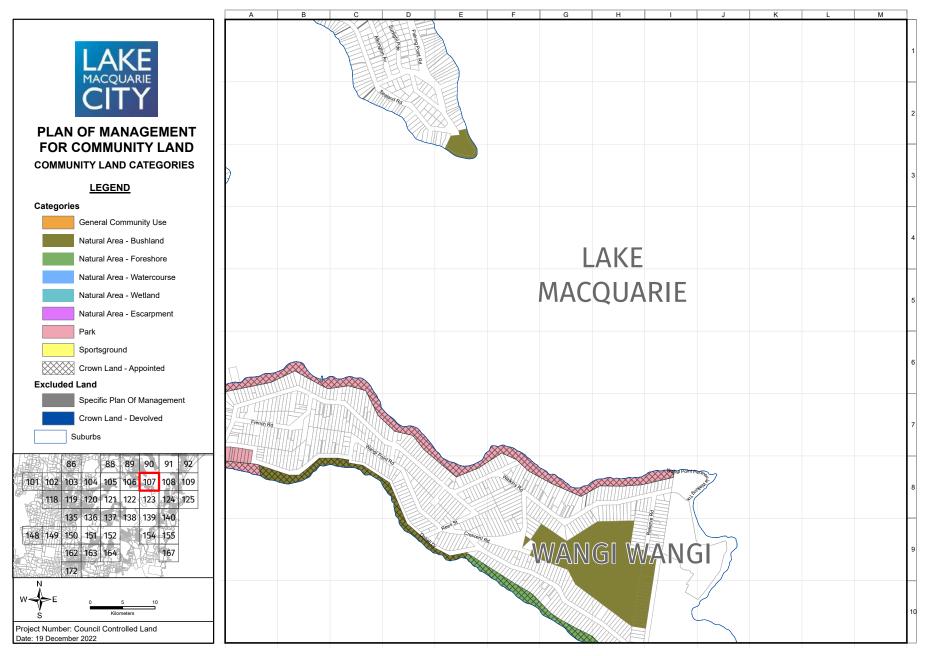

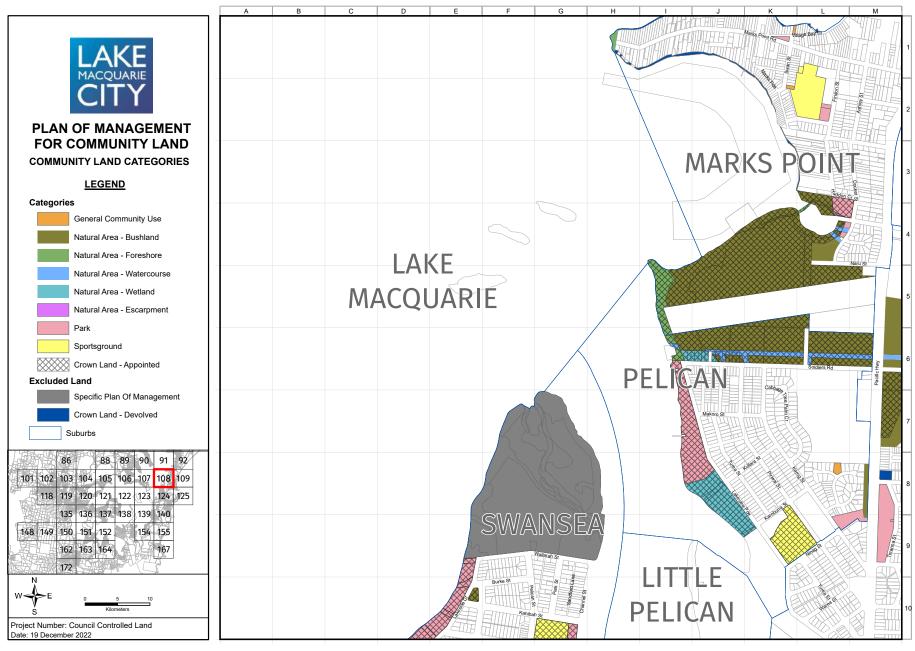

Crown Land - Appointed identified in this map include reserve numbers 60018; 57154.

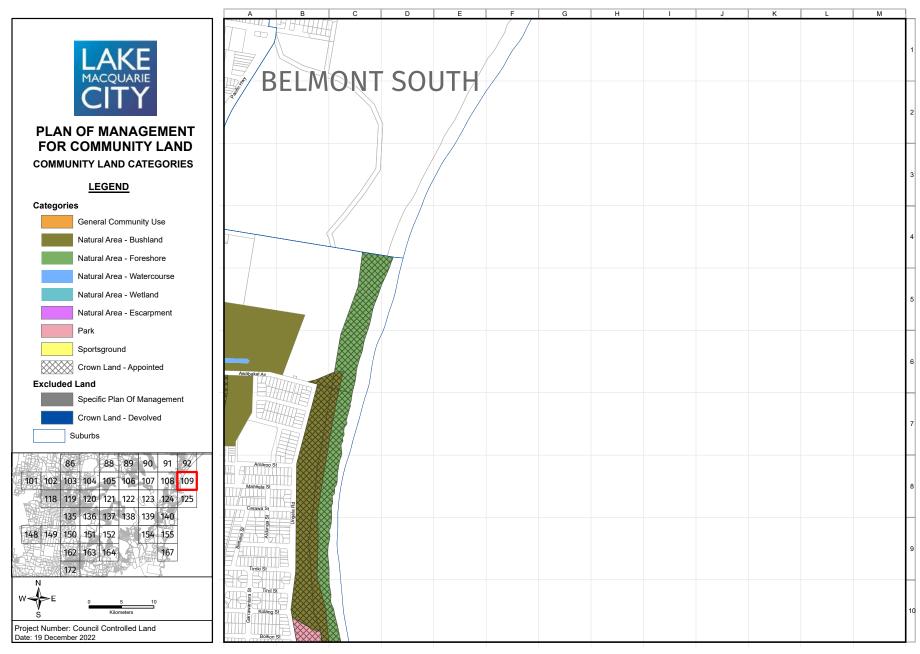

Crown Land - Appointed identified in this map include reserve numbers 57154; 83203.

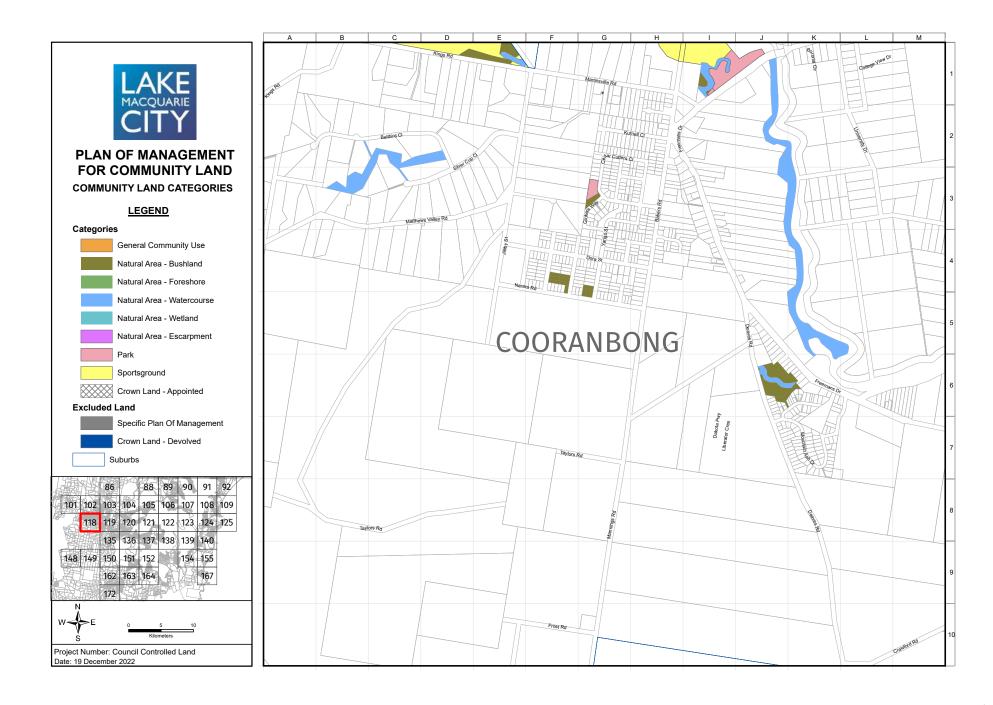

Crown Land - Appointed identified in this map include reserve numbers 57154.

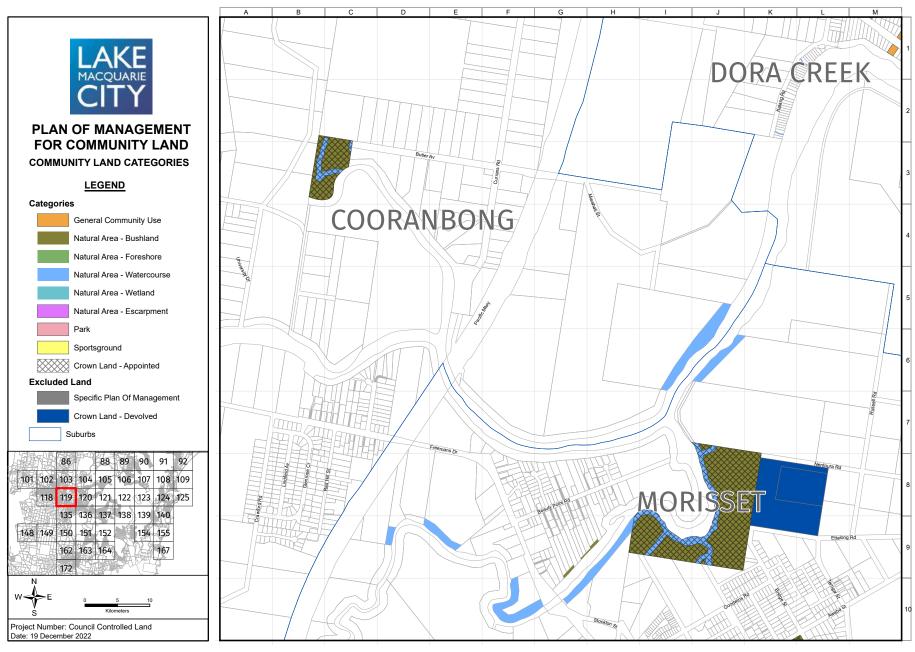

Crown Land - Appointed identified in this map include reserve numbers 56415; 72515; 88797; 64731; 97100; 89275; 89220; 40225.

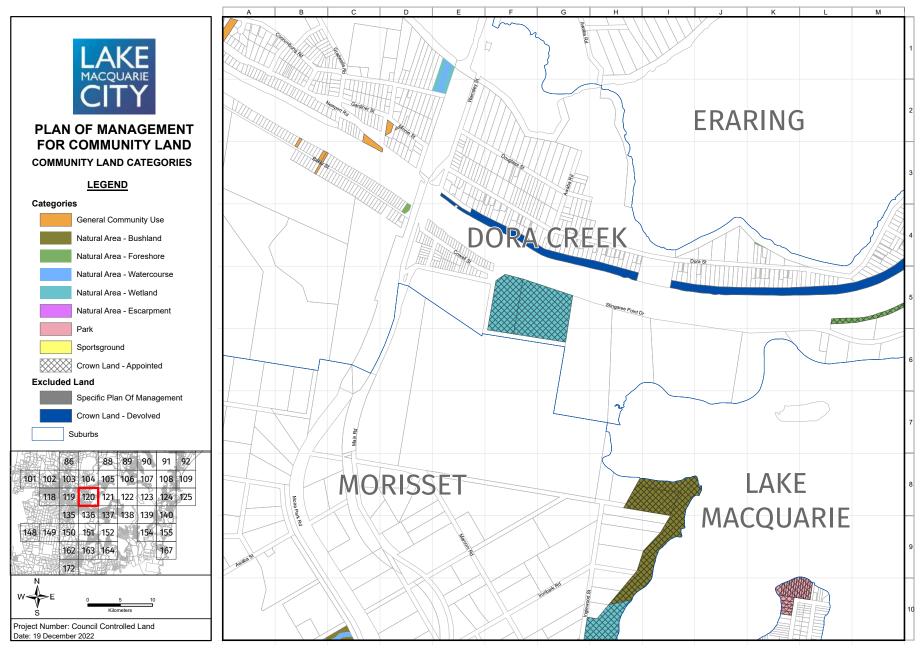

Crown Land - Appointed identified in this map include reserve numbers 85986; 97100.

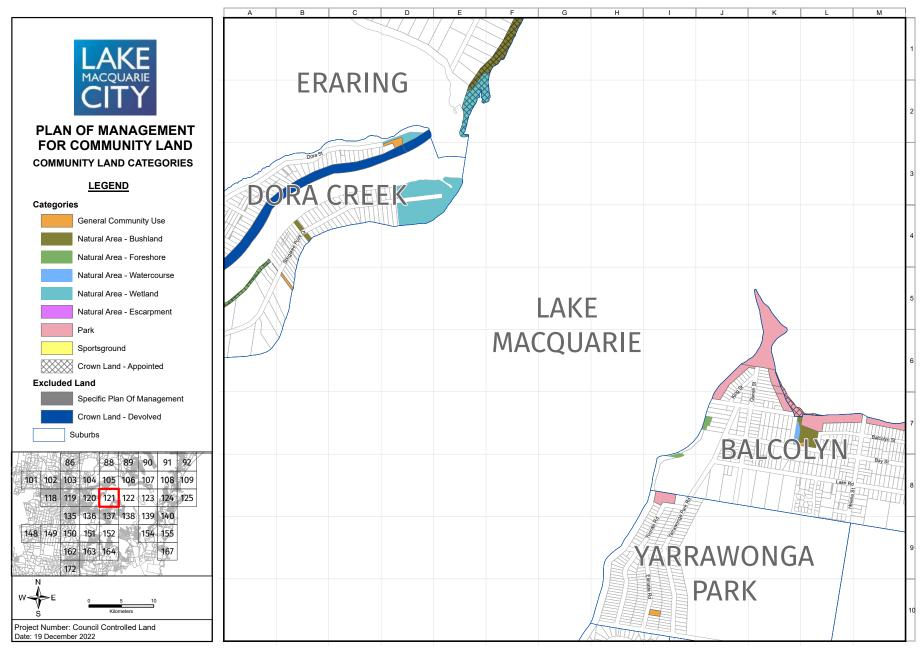

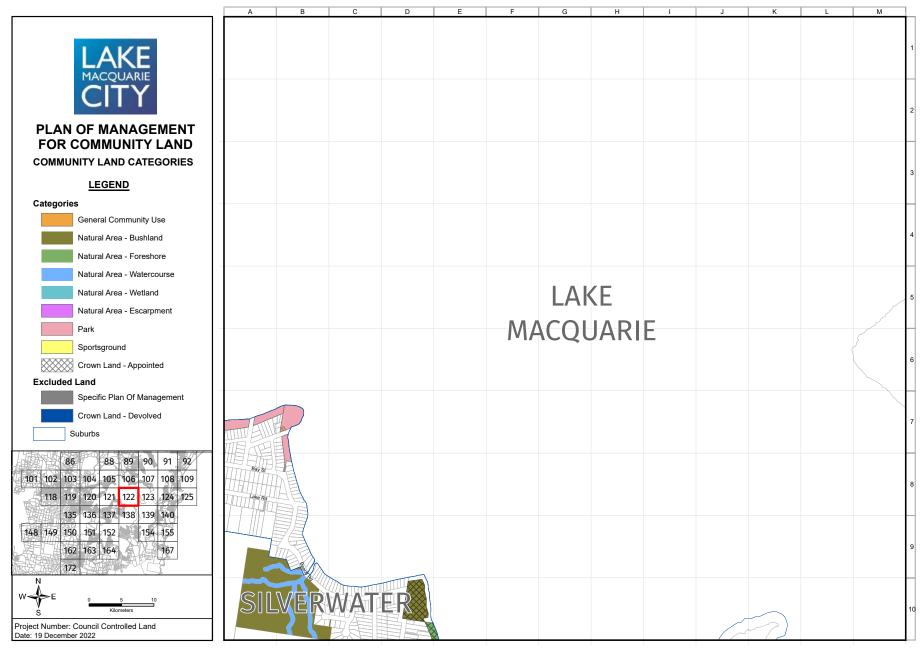

Crown Land - Appointed identified in this map include reserve numbers 71314; 89094.

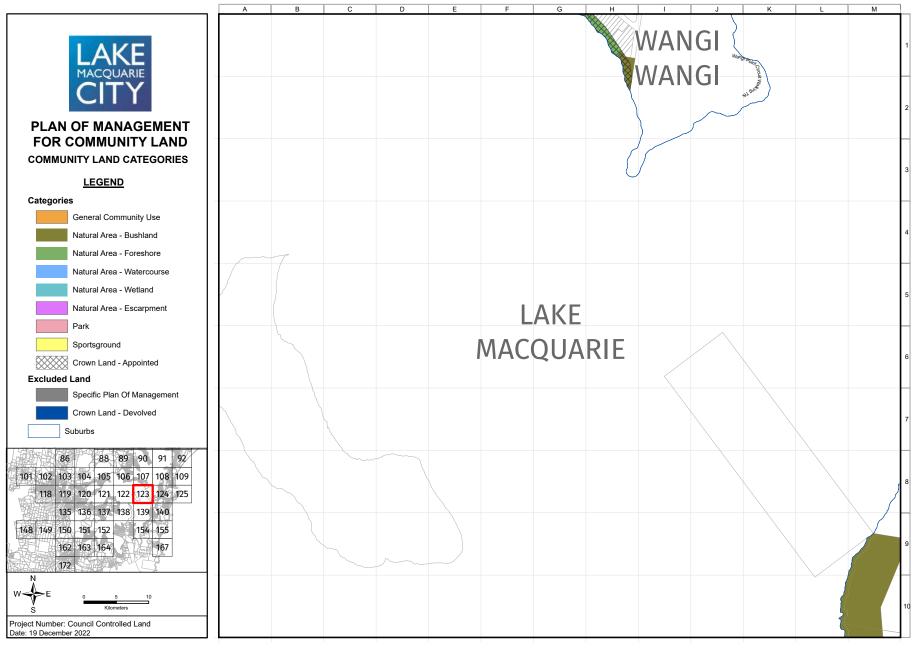

Crown Land - Appointed identified in this map include reserve numbers 80578; 84605; 69379; 170074.

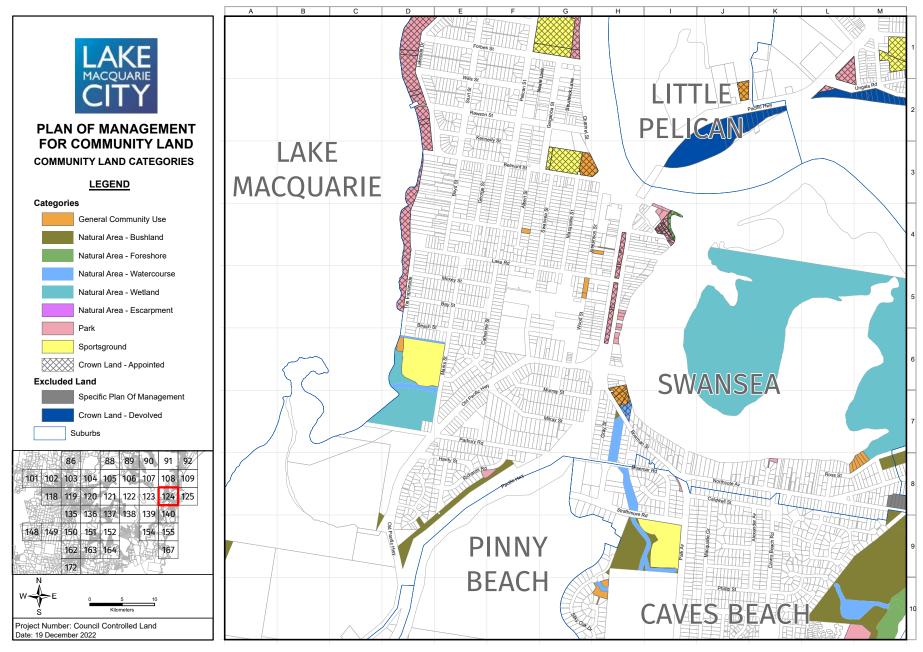

Crown Land - Appointed identified in this map include reserve numbers 60018; 170074; 91545.

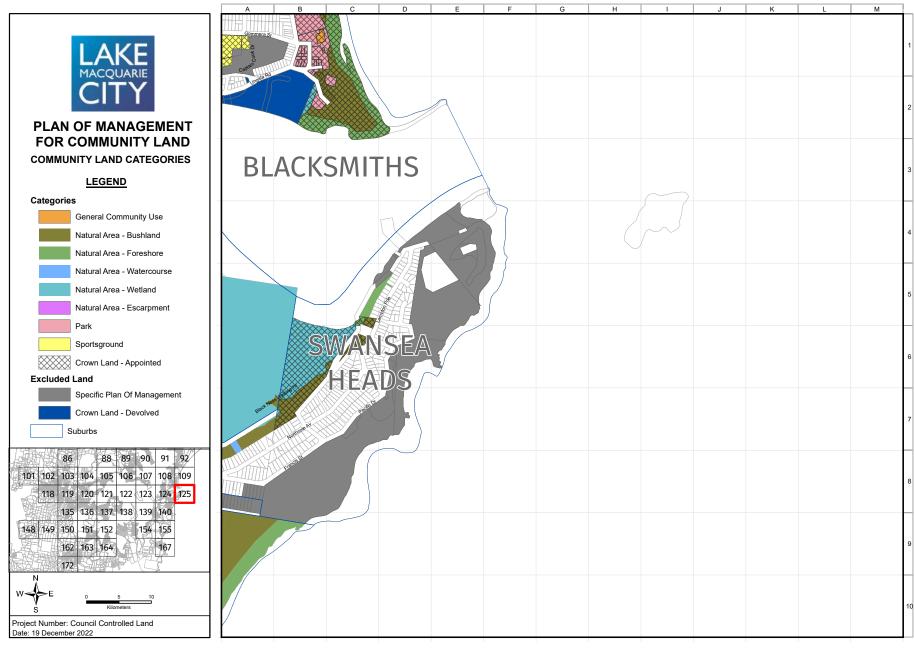

Crown Land - Appointed identified in this map include reserve numbers 83607.

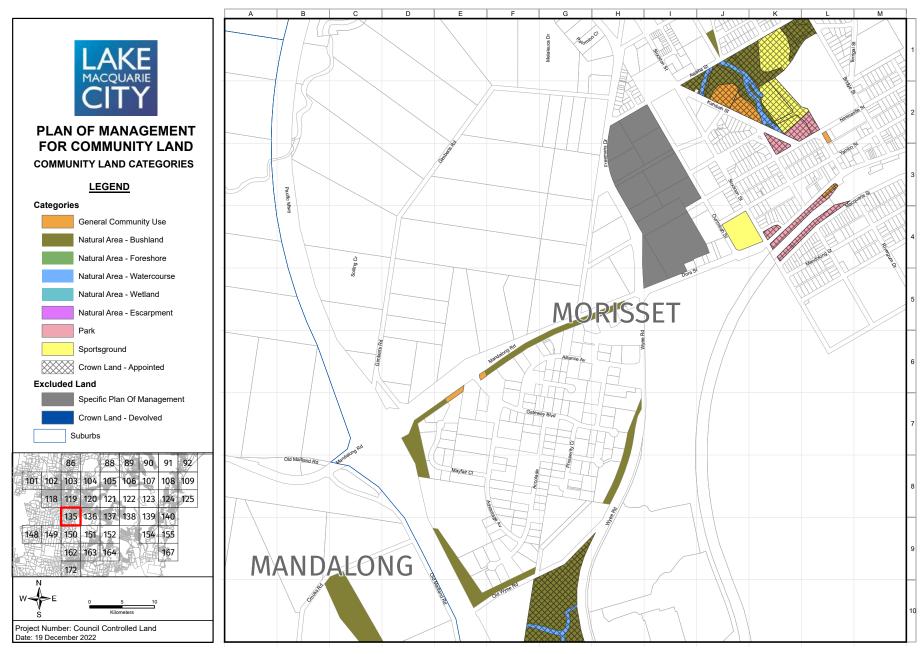

Crown Land - Appointed identified in this map include reserve numbers 57154.

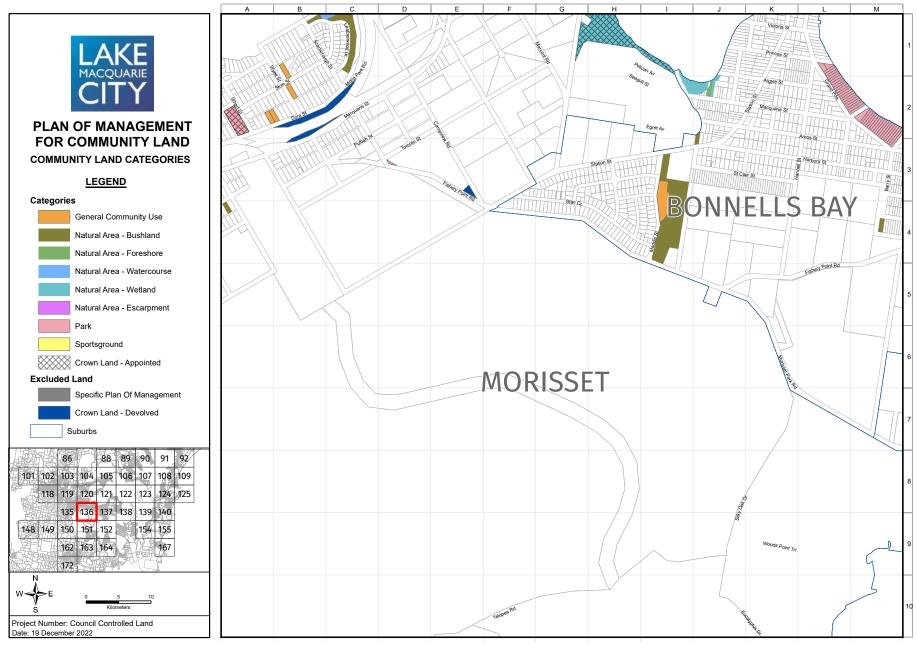

Crown Land - Appointed identified in this map include reserve numbers 89275; 40225; 82872; 57419; 1012249; 89492; 1014048; 70509; 66822.

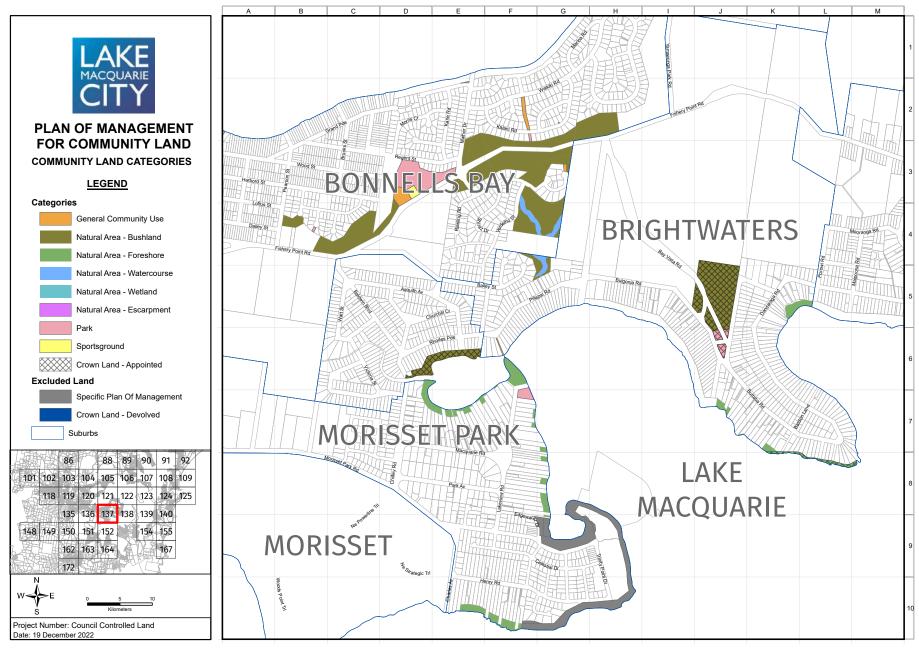

Crown Land - Appointed identified in this map include reserve numbers 66822; 85986; 91128.

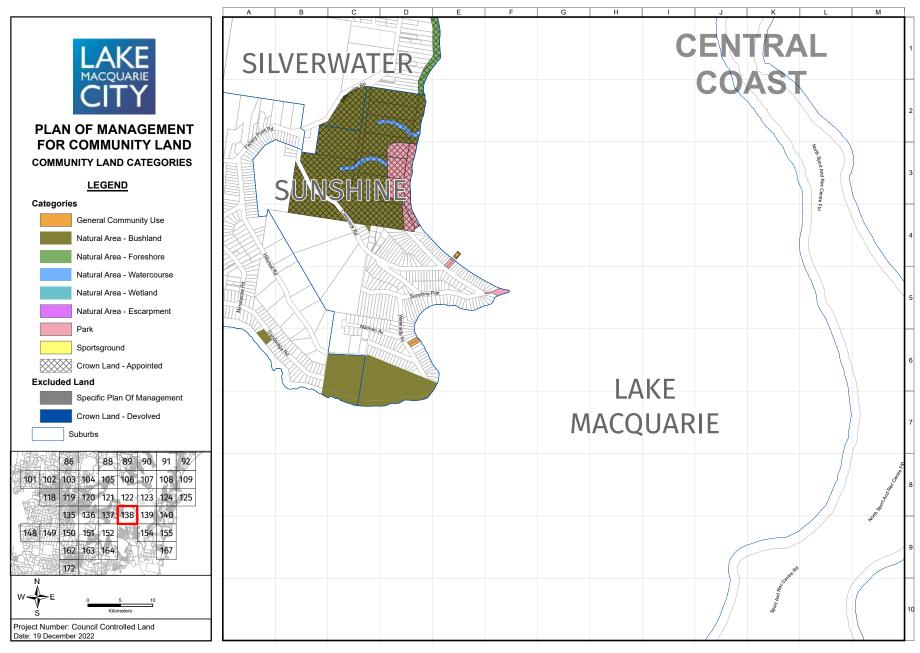

Crown Land - Appointed identified in this map include reserve numbers 89425; 68790; 68786; 68646; 91166.

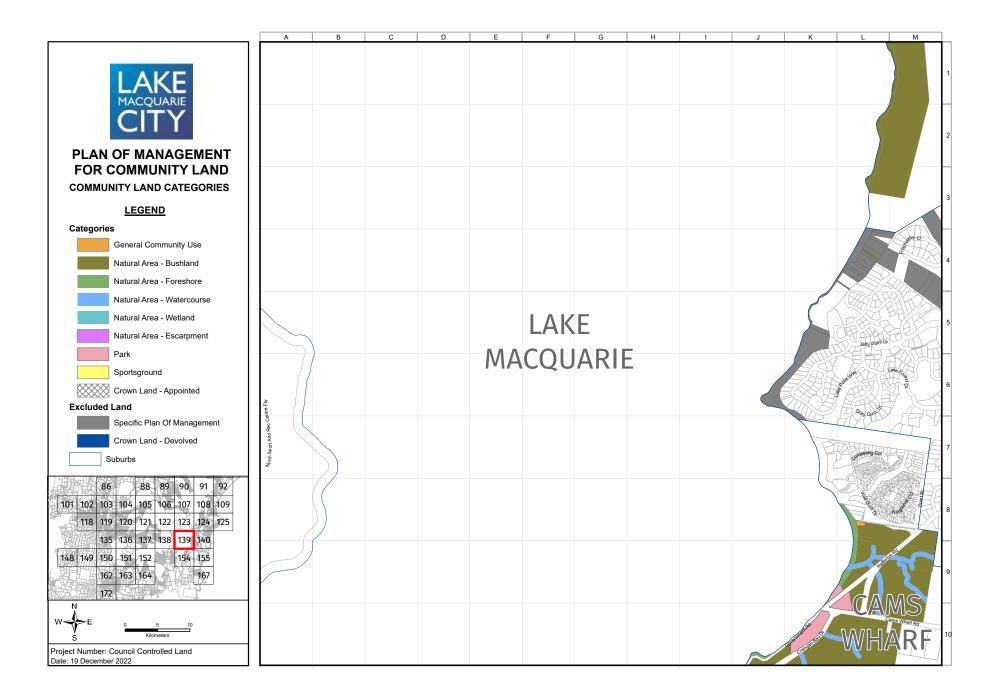

Crown Land - Appointed identified in this map include reserve numbers 67984; 84605.

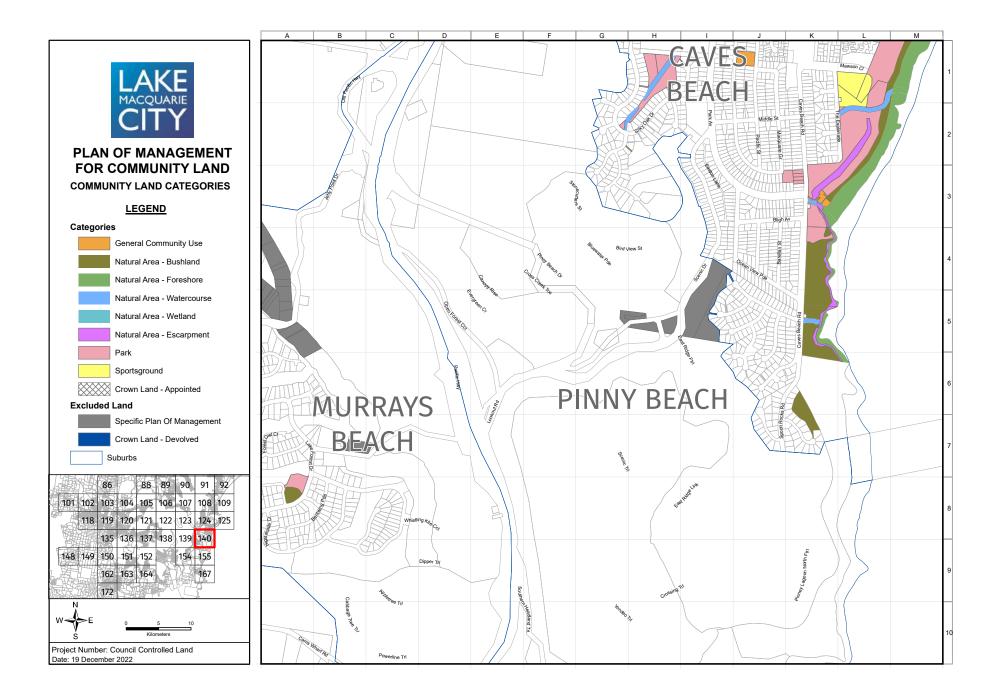

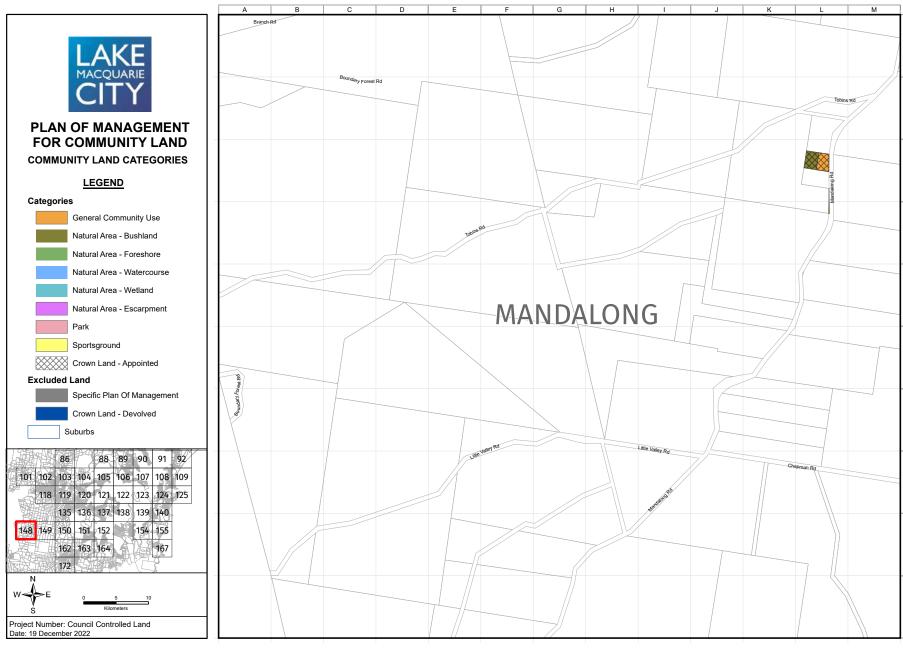

Crown Land - Appointed identified in this map include reserve numbers 170114; 70174.

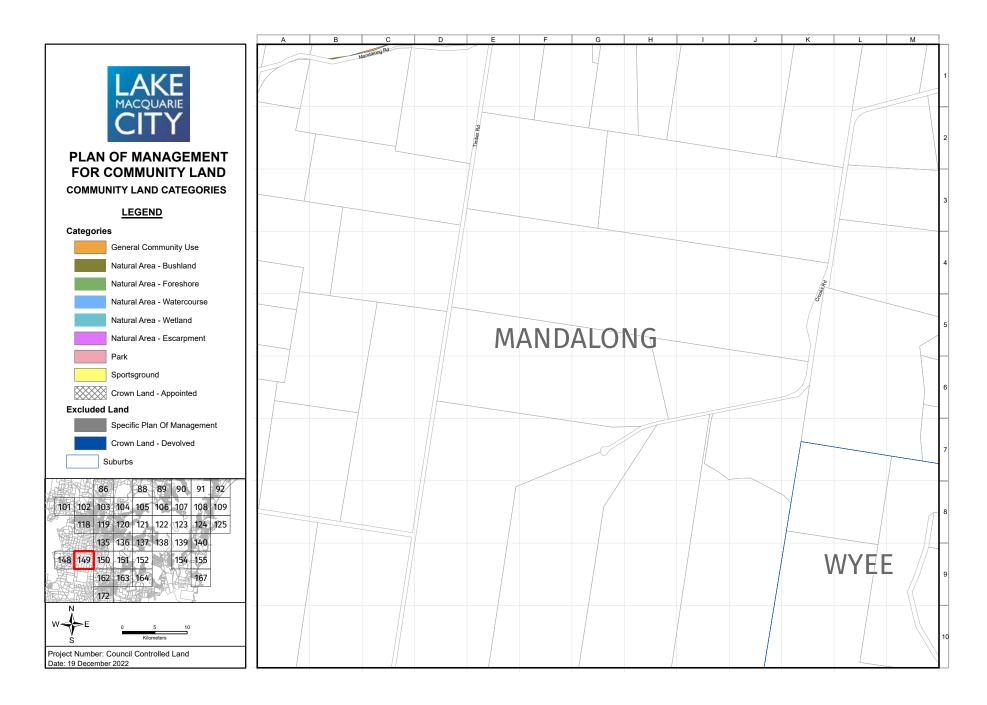

Crown Land - Appointed identified in this map include reserve numbers 83607; 97387.

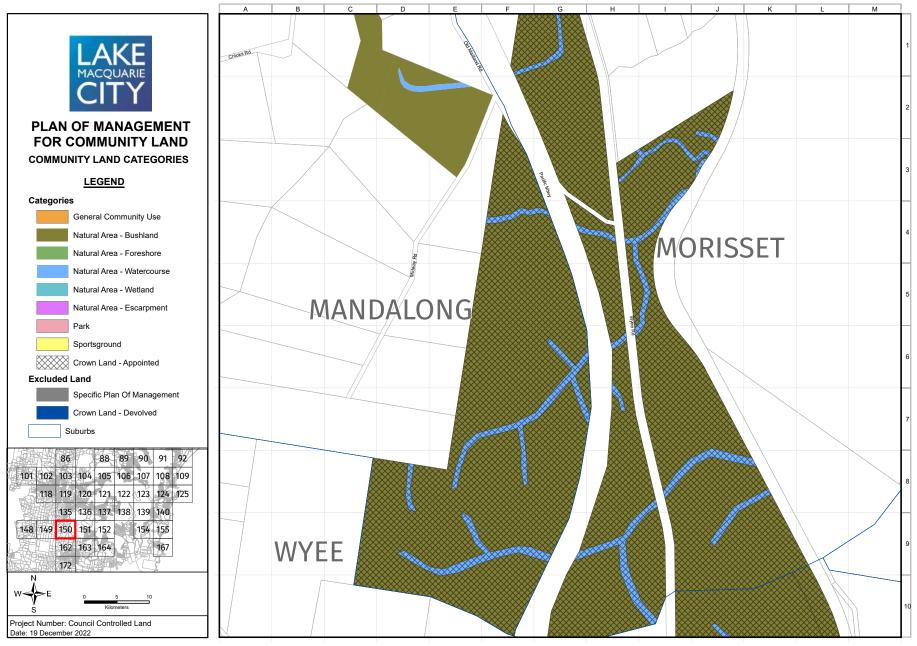

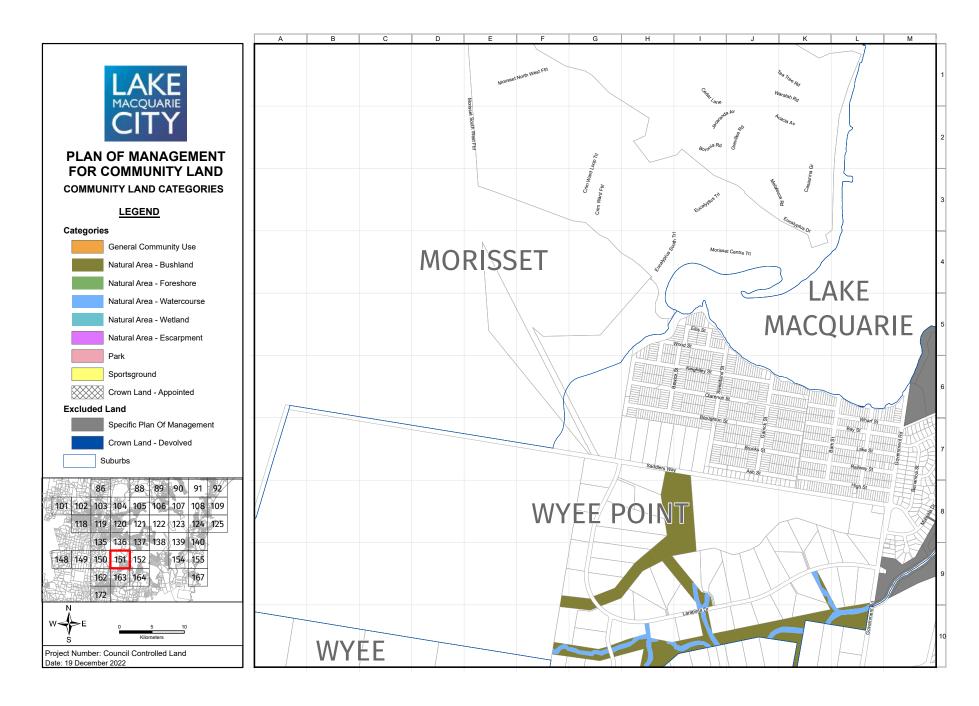

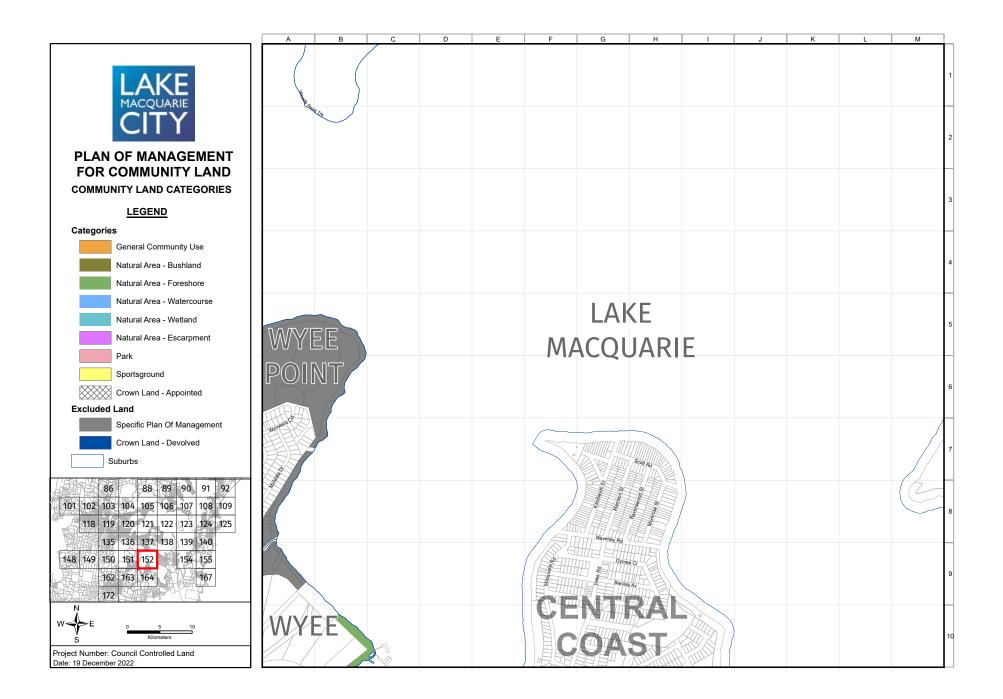

Crown Land - Appointed identified in this map include reserve numbers 84674.

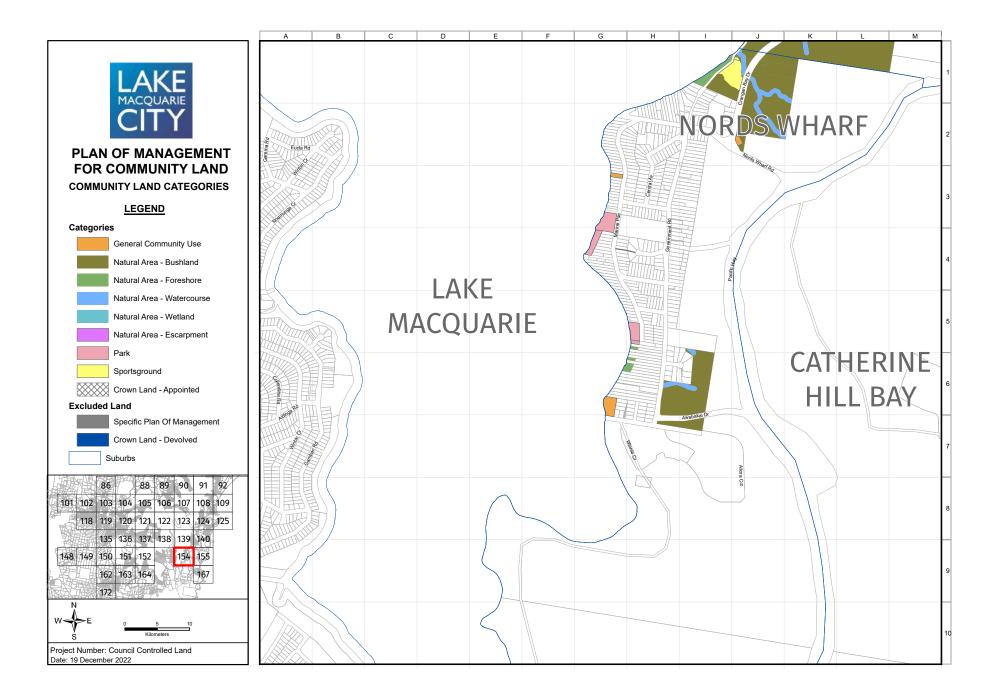

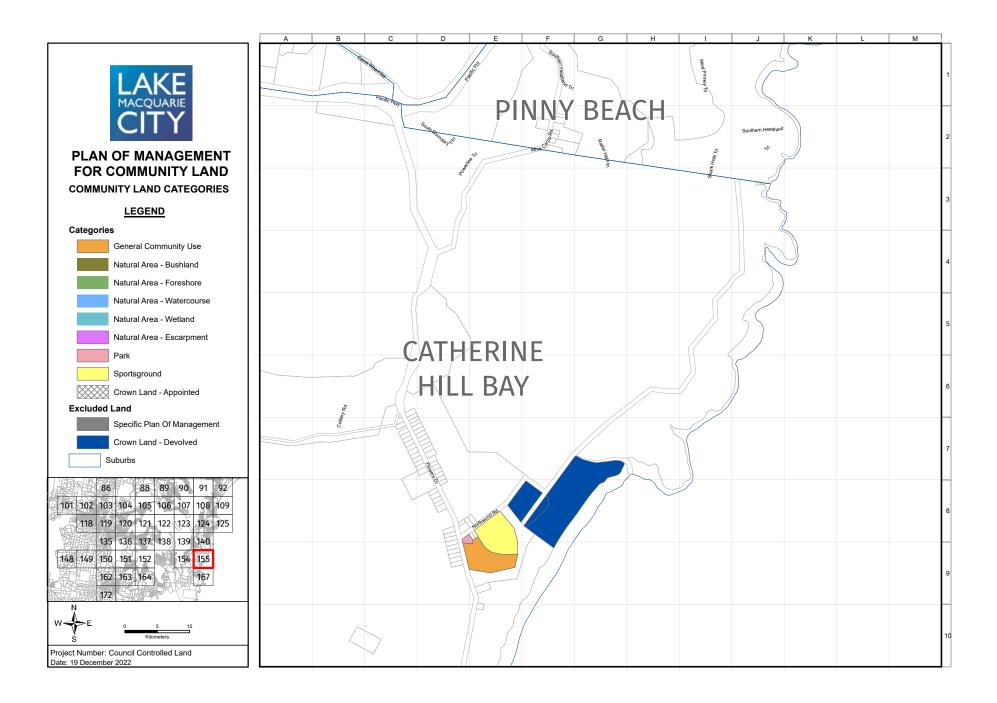

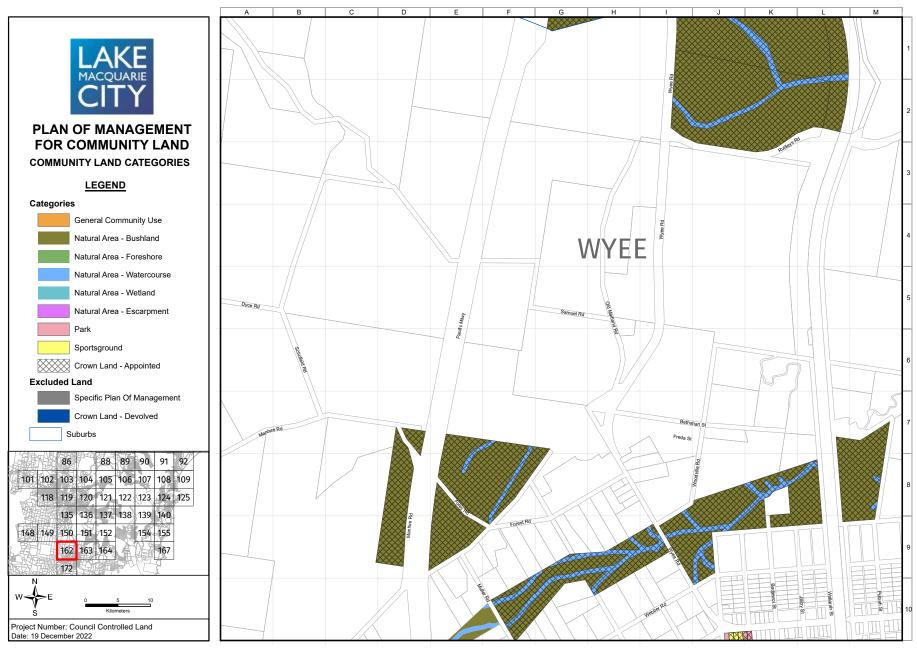

Crown Land - Appointed identified in this map include reserve numbers 91166.

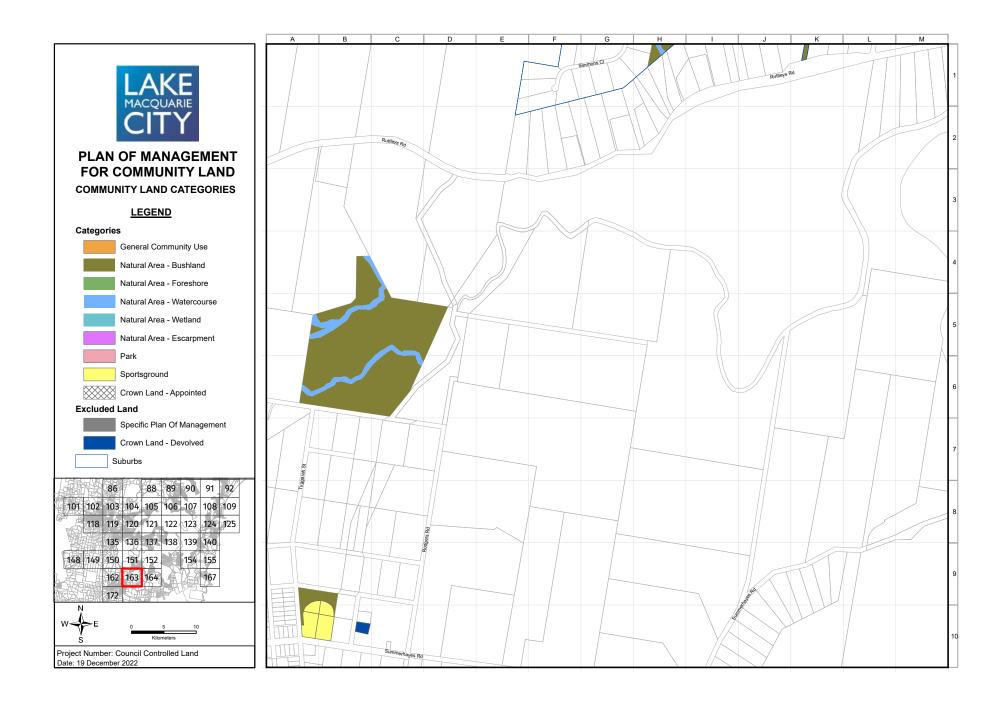

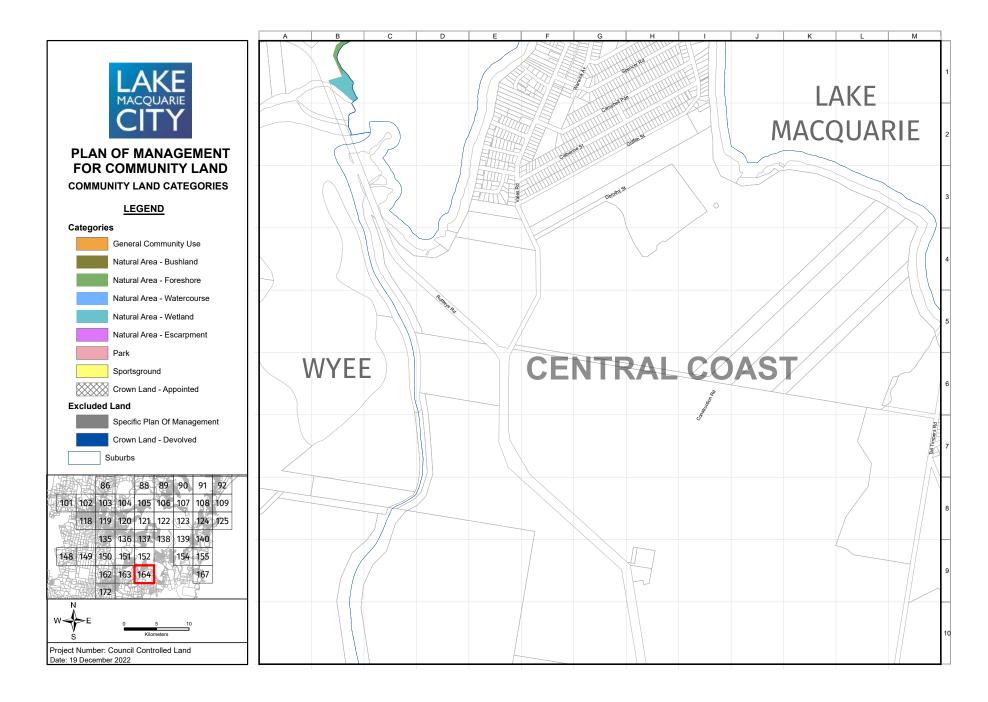

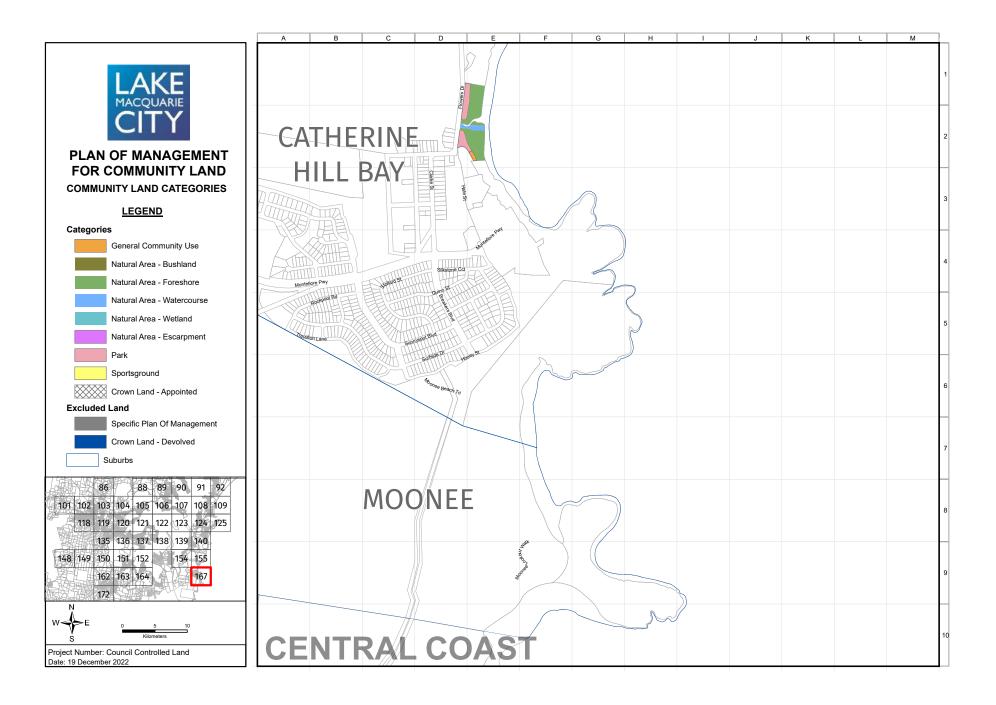

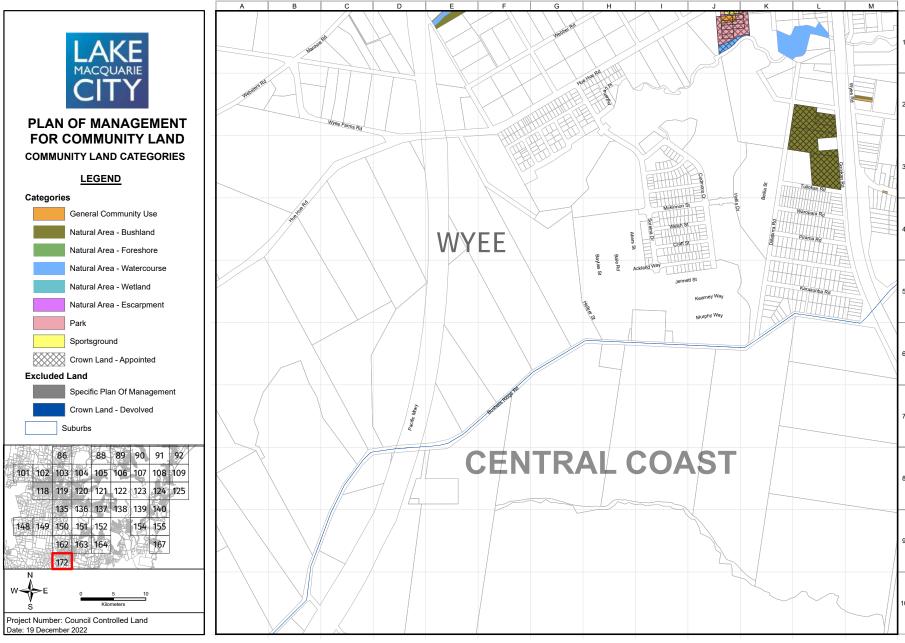

Crown Land - Appointed identified in this map include reserve numbers 91166; 152; 14353; 14359; 86864.

Crown Land - Appointed identified in this map include reserve numbers 86864; 14358.
